The pall bearers were the four. sons, H. J. Reid, son-in-law- and Mr. S. J. McKnight, nephew.

· A memorial service was held in the carry off the constipated waste matter Church on Sunday afternoon, a large poison from the intestines and humber of relatives and friends at-

to the Church, the singing from the choir with a duet from Mrs. W. Artley and Miss Abercrombie, being much appreciated.

Death of Mrs. Merle McCauley, of Lily Oak.

A sad gloom was cast over the community when it became known of the death of Mrs. Merle McCauley, beloved daughter of Mr. and Mrs. Adam Clark, occurred on Thursday, Novem

'The deceased was in her usual health until the day before the sad event; when a sudden and brief sickness of acute Brites Disease brought the promising career to a close. By her bright and cheery disposition and self-consideration for the comfort and welfare of others, she won the esteem and affection of a large circle of friends and relations.

The deceased was born in Holland township, March 5th, 1892, where she lived with her parents until September 26th, last, when she became the wife of Mr. Merle McAuley.

She leaves to mourn her loss, her father, mother, two sisters, three brothers, viz., Mary, Martha, Thomas, Wilmer, and Bert at home, also her sorrowing husband to which the whole community extend their deepest sympathy.

A large cortege sympathetically followed the remains to Harkaway church and thence to the cemetery. The pall bearers were the three brothers and three brothers-in-law of the deceased.

The Rev. W. Lee, of Temple Hill, officiated and was assisted by the Pastor of the Harkaway Methodist church, Rev. W. G. Wakefield.

The floral offerings were both numerous and beautiful, showing the high esteem in which the deceased

Seldom has a more tragic talebeen told than that of this young woman, whose parents, brothers and sisters have all died of consumption, leaving her alone to make a living as best she

Never robust, hard work and worry soon undermined her health, when she, too, become a victim of this dreaded disease. Shunned by friends who feared contagion, without funds, for she had been unable to save from her small earnings, she seemed doomed, like the others of her family, to an untimely grave. Fortunately, she was discovered and sent to the Muskoka where she is now doing well, with every chance of ultimate recovery.

Appeals are now being made for the Muskoka Free Hospital for Consumptives to enable it to continue the great, work of caring for just such cases at this. No matter how small the gift.

Contributions may be sent to W. J. Gage, Chairman, 84 Spadina Avenue, Toronto, or no Geo. A. Reid, Secretary Treasurer, Gage Institute, Toronto.

We do wish we could impress on the farmers of Canada that at the close of this world war, the live stock business of this continent will face hie greatest era of prosperity hey have ever known. No doubt about it. The reasons for this is evident, for before agricultural activities can be renewed on the devastated farms of war-ridden Europe, those farms must be re-stocked with horses. and all kinds of breeding stock. which the ravages of the war have so materially reduced in numbers. Where will Europe go to supply this demand for horses, cattle, swine and sheep? Who can supply these units so necessary for profitable agriculture? Why Canada and the United States, of course, and to meet this unprecendented demand for breeding stock, it is up to our Canadian tarmers and live stock breeders, to bestock in shape to stand inspection of foreign buyers who will scour this country when Europe lays aside the sword to take hold of the plough handles once more.—Bowmanville

This war, has demonstrated as never before the absolute dependence of all parts of the Empire upon its naval defence, and mercantile marine. Realizing this the Navy League in Canada is being extended throughout the land for the purpose of a thoroughly organized educational campaign in matters pertaining to the Navy and Mercantile Marine, to encourage volunteer naval brigades and to educate the boys and young men in seaman ship, that the Canadian sailor may continue to play his part in the Dominion and the Empire.

Another very important function of the Navy League, which has the support of His Excellency, the Duke of Devonshire, Vice-President of the Navy League of Great Britain, is to raise funds for the relief of the British and Canadian sailors and their 1 cow, ten years old; 1 pure-bred dependents, many of whom are in raised by a multitude of patriotic societies for the relief and comfort of the men of the Army, but little done for the Navy, though the need. here is even more pressing. As a due Aug. 6; "1 cow rising 5, due July class the men of the Navy are the poorest paid in the world, and their service calls for great sacrifice, In suffering great hardships.

To help these worthy cases, th registered; 9 store pigs; 1 brood Navy League held a Sailor's Day sow, one April 12; 30 ewes; 1 aged | throughout Canada on December 8th. ceeds went to Canadian sailors and their dependents, the League admin-Peter Hamilton drill; 1 disc; 1 steel istering the fund, instead of sending roller; Oliver corn cultivator; 1 it all across, as was the case last year, to the British Navy League. RESCUE OF THE BUFFALO.

No Danger Now of the Valuable Ani mal Becoming Extinct.

The American bison, or Juitalo, is increasing in number, according to the annual report of the biological survey. and the danger of complete extinction that once threstened, appricently no longer exists. The rescue of the buffalo from the slaughterers is one of the most inter-

esting of our attempts at conservation. It is estimated that at phe time within the last century there were as many as. 75,000,000 of these great, unwieldy creatures on the North American con-tinent. Early travelers fell of herds that were days in passing, that halted steamboats on the upper Missouri and stopped wagon and railway (rains on the western plains. The number killed by the Indians in their hunts was not equal to the natural increase of the

The slaughter began when the railroads crossed the prairies and opened up unexplored tracts to/the bide hunters, Thousands were killed merely for gin at once preparations to have a slice of their hump or tongue. For years hunters sold an average of 2,000,-000 hides annually. In 1889 the num ber of American bison, wild and captive, was only 1,091. There are now perhaps in North America as many as

The buffalo was the most numerous and valuable animal of this country. Its flesh was sup dried in great quantities and made excellent beef. The bones, horns and sinews were all utilized, and the bide was made into lodges, harness, canoes and winter clothing. Had the buffalo been conserved in time, instead of being so ruthlessly slaughtered it would today have had an conomic value to the country difficult to overestimate.

HATCH CHICKENS EARLY.

A Tip on How to Obtain a More Steady

In annual vacation, and the moulting season, which begins in late summer, is the holiday time for hens. The hens is the holiday time for hens. The hens a chewan, at the former's father; Oats..... er dress for a new one, requiring three or four months in the operation. When the hens take this vacation new laid eggs are scarce and remain scarce until the pullets hatched during the pre-

ceding spring begin to lay.

The remedy is very simple and is under the control of the poultryman.

The first step is to have chickens hatched early, so that the pullets begin to lay when the hens begin to moult. This is not difficult, Pullets of the American breeds begin laying at about seven months of age. Leghorn pullets begin when about six months old. North of the Ohio river this means that all hatching must be over by May 1 at the latest. The best plan is to have the chickens coming at intervals during March and April. The earliest hatched pullets will, of course, begin to lay first. If any of them begin to, moult their places will be taken by the later ones, and a steady supply of eggs will be more certain.

The difficulty in the way of the practical application of this matter is that so many poultry keepers are dependent have late hatched chickens we willhave late sitters. The poultry keeper who wants to change from the late hatching to early hatching must therefore either get broody hens from some one else or use an incubator. After he has "changed the dates" on his flock he will have no trouble, especially with the American breeds.-New York Sun.

To Got Out of Debt. In the Woman's Home Companion is an article on debt and how to get out of it by a woman who was almost ruined by her husband's carelessness and extravagance. Among other things she says:

"If a family that has been living outside its income wants to start to live inside, something more than a good resolve is negessary. Usually that man and woman have got to form a wholly new circle of friends. They must leave those who are living outside and take up their abode among, those who are living inside. Man is a gregarious animal. His will power needs all the help it can get from a congenial and approving public opin-

A. Very Short Street. One of the shortest and most obscure streets in all Greater New York is Chestnut street, and it's as small as its name implies. This street is less than fifty feet long and runs from New Chambers to Madison street, separating in two a triangular block, the whole of which would not have an area large enough for a modern building even if located in a section that would warrant the improvement.

The Schemer Mrs. A.-Don't you think you lose patience with your husband on rather slight provocation? Mrs. B.-I have to provoke him sometimes so that he will lose his tomper and then give me anything I want so as to atone for the irritable way he has acted.
