PRACTICAL FARMING

The Importance of Sparing Good Breeding Stock.

During the past four years, millions of men who had previously been producers of the largest part of food stuffs required in Europe, have been engaged in fighting for their country.

A pure-bred sire of good type and individuality is the one that should be used by every live stock breeder in the country.

Poisonous Plants in the Hay. Much loss may be avoided by paying a little more attention to the quality of hay that is fed to live stock.

Losses Due To Controllable Diseases. Among the diseases of economic plants there exist some for which effective control measures have not yet been discovered.

Everyone should celebrate the renewal of peace by planting Roses, they will grow anywhere in Canada.

HOT LUNCHES IN THE RURAL SCHOOLS

A chance visitor entering some of our rural schools just before noon is very likely to get a whiff of savory vegetable stews, or a splash of hot pudding which are being prepared for the noon lunch.

Each week two girls on boys act as book-keepers. The work is rotated so that each member who is of enough (ten to eighteen years) will get practice in each line of work.

Each night the materials needed for the following day's cooking are apportioned to different children, convenience being the deciding factor for each individual.

The poor hill for having to stand against all the winds and storms. "Now I am protected and I am never lonely," she would boast proudly.

Bedtime Stories. The Hill That Wanted To Be a Hollow. Once upon a time there was a little green hill with a necklace of lovely mossy stones and a crown of wonderful willow trees.
