THE BLIND AT THE FALLS

How They Enjoyed Niagara, Though

They saw Nothing of its Wonders.

The strangest tribute ever paid to

the splendor of Niagara was the visit

of more than 100 blind men and wo-

men, who saw not a single drop of

the precipice, but only sensed its won-

ders by the uncanny perception which

comes at last to those who make their

life's journey through unending dark-

No more curious spectacle was ever

this gathering of sightless people, who

made their excursion the last feature

of the great international pow-wow

of blind folk at Toronto recently. It

included people from many walks in

life and of every social status. There

was an aristocrat from the first fami-

lies of Virginia, who had driven from

his estate on the Potomac in his own

eight-cylinder Panhard; there was

a millionaire from eastern Canada,

whose fortune was founded by tuning

pianos and soliciting custom from door

to door! There was a blind clergyman

teacher of ancient history in a ligh

school for sighted children. There

were many librarians, many managers

of the schools for the blind, a retired

broom shops, who used their good

oyes to guide their sightless brethren,

and there were all kinds of working

As this strangely incongruous pro

ession groped through the trees along

the river's edge their expressions did

not differ greatly from that of an equal

number of sighted tourists. Many of

them showed no trace of interest or

emotion. But others seemed to sense

almost fully the beauties that lay

everywhere about them-the wooded

sides of the gorge, the white-fiecked

river winding its way through circling

pools and whirling rapids and disap-

pearing, as though by magic through

walls of rock and verdure, the tumb-

the vast, white volumes of water

thundering over the precipice, the

pink-shot mists rising from below and

the multitudinous roar which seemed

to shake the heavens.

ling magnificance of the Niagara basin,

women and working men.

Among the crew of the Poigat, a passed to and fro between the ship ship that foundered off Malabon, in and the but all the time that the cable the Philippines, was a half-breed sailor named Alejandro Lorenzo. -In the bingined what unremitting attention moment of the ship's sinking he was agile enough, and lucky enough, to leap clear of the wreck and escape the deadly suction of the disappearing vessel. He was alive and uninjured,

and there was no help in sight. After swimming an hour he found a hatch cover on which he rested. the cable tooks who are handling Then pushing the hatch cover ahead of him he started for San Nicolas. He freely. The works of course, proceeds was just reaching shallow water when the tide carried him out to see again.

Bleishs take their turns of testing the As night came on the wind increased and the waves tossed him and his hatch cover back and forth till he was almost exhausted, but toward midnight he found that he was being washed toward the Cavite shore. For several hours he drifted in, but just as his hope grew strong the tide and

struggles once more out to sea. Something brushed against his leg. He thought that it was a shark and the bottom of the boat. screamed in fear. "It did not touch me, or I should have gone mad," he himself able to talk again, his reswas dark and the rain beat down on lance. Alejandro in reply said that, of him. He heard a cry in the darkness course, he had done the best he could. and pushed his hatch cover in the He wanted to live, he said:

lirection whence the sound came. He found a Flipino boy, another survivor of the wreck, clinging to an oil box.

They drifted together. When daylight came they could see oats, but could not make themselves neard or seen. They were tortured by thirst, salt water got into their ouths, they drifted all day.

Night came againt, Soon after dark lights grew larger and more distinct. They were being washed toward the shore. But the boy could not hold out. Taken with cramps, he lost his hold on the oil box and went down. The man 'was washed into the middle of the bay and drifted all night. .

At dawn he was almost ready to give up, but the wind and waves headed him for the, shore and he took heart. Then he saw boats and used his last strength in trying to reach them. The boatmen saw him, were able to get to him in time and picked him out of the water. There was not much of the man left and, shricking for water, he collapsed in

As he lay on a pallet, after he found The water was cold, the night cuers spoke of his wonderful endur-

No season of the year is so dan gerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order they saw the lights of a preakwater so quickly that unless prompt aid is and with new hope noticed that the at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentry and colic are most prevalent. Any one of these troubles may prove deadly if not promptly During the summer-the mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 ents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

POWER OF THE FUTURE.

This Writer is Convinced That the Atom Contains Source of Energy. Some people will tell you that the coal age is passing, and that we are now entering upon the age of oil. All nonsense! There will be coal left when the last oil well has sucked

dry. But coal won't last forever. gration of the atom.

atoms break up of themselves. If we parts of Canada, electricity ought to can once learn how this is done, and be cheap enough to be freely used by do it ourselves, we have a source of everybody. power so amazing that it fairly makes one gasp to try and realize it.

It is, however, a known fact that the disintegration of one pound of Minard's Liniment Cures Colds, Eta. matter-say lead-will give as much power as will the burning of over four thousand tons of coal: Once the trick is done, we shall be

able to bring a year's fuel home in a waistcoat pocket. Instead of a stove, you will have a small machine called a disintegrator. Once a year you will feed it with an ounce of lead, then for twelve months your house will be

HISTORIC FURNITURE IN PALATIAL HOTEL

Champlain, Jacques Cartier and Montcalm, three of the heroic figures in the early settlement of North America along the St. Lawrence River have been happily united in a suite of rooms which have been named after them at the famous Chateau Fron tenac, in Quebec. This suite is in the seen beside the great cataract than baronial tower which forms one of the most noticeable landmarks in the ancient city, and commands a wonderful panorama of the great river and of the blue Laurentian Mountains.

The central room, named after Montcalm and used as the sitting room, has among other curious furniture of two hundred years ago, a table and chair of rough design made by soldiers who served under General Montcalm in the Siege of Quebec in 1759, nd actually used by the General up to the date of his last fatal battle with the troops of General Wolfe. The and a blind doctor. There was a blind writing desk in the same room was ormerly an alter in the old Ursuline 'John," remarked the lady. Chapel, while the autique Grandfather's Clock used to figure out the hours and minutes in the Old Jesuit School. The habitants, or peasant proprietors of French Canada, are amous for their skill in handicraft. particularly weaving. The floor-covering used in these rooms is a specimen of this habitant handicraft, known as 'catalogne," a washable material of

fast dyes. . . The two adjoining rooms, one on each side, are used as bedrooms, and except for the private bathrooms which have been built in to meet with the requirements of modern habit, are faithful replicas of rooms in the seignorial Chateau of Old French Canada. The four poster beds, chairs, fire frons, crockery and charcoal burners are actual antiques. Here can be seen the old warming pan of the pre-radia-

tor days and the old pipe lighters of the days before matches were invented. The old fashioned open hearth with its bellows standing by and the family kettle give their welcome and tell their tale of hospitable byegone On the walls hang and priceless tapestries.

ELECTRICITY IN THE HOUSE. Picture of the Day When Current Will

Do All the Hard Work. A writer on agricultural subjects oning in the morning would touch a button and that breakfast would thereby be prepared without further personal attention. The time seems to be here. At the latest electrical shows the accomplished fact is witnessed.

The demonstration shows how a family can go out to spend a day, to return at 6 p.m. in time for dinner. : Un cooked food is placed in the electric range, and a clock attached is set t start the cooking at 4 in the after noon, to be completed an hour later The clock of itsek regulates the cur rent, turning it off at the time desired but leaving enough heat to keep the food warm. If the family is delayed the meal is still ready for the table It is simple and also dependable When it is called simple due con sideration must be given to the inger nity of the machinery employed; in cluding the clock, whose performance is so familiar that its mechanism perfected step by step through the centuries, is seldom given a thought. Electric appliances for the house hold are just getting a start. Their The power of the future, the source evolution is rapid as well as strikingof all the energy that we can possibly and power—what a broad foundation require, will be found in the disintefor new utilities in the home as well Atom means a thing that can't be as in all forms of industry!
