ESPECIALLY FOR FARMERS.

A Real Magazine, For Farmers Only Is Now Printed in Canada.

Did you know there was a magazine printed in Canada, especially for farmers?

There is! It is FARMERS' MAGAZINE, and it is not a farm paper, but a real magazine. Like other high-class magazines it is printed on smooth finished super-calendered paper, which enable FARMERS' MAGAZINE to reproduce photographs in a strikingly lifelike manner.

Everything growing out of the ground seems intended for some use. I have seen natural conditions. Dr. Pierce, of Buffalo, N. Y., long since found out what is naturally best for women's diseases. He learned it all through treating thousands of cases. The result of his studies was a medicine called Dr. Pierce's Favorite Prescription. This medicine is made of vegetable growths that nature surely intended for backache, headache, weakening pains, irregularities and for the many disorders common to women in all ages of life.

Orillia, Ont.—I suffered from a bad case of woman's trouble with backache, nervousness, disordered digestion, irregularity and I had great pain all the time, sometimes I would faint at my work. I had one physician after another but they did me no good. I then took Dr. Pierce's Favorite Prescription and it fixed me up all right. I look much better and feel fine. I will recommend the "Prescription" to all suffering as I did." MRS. MAYBELLE B. GRATIK, 118 Albert St.

REMARKABLE MACHINE.

The Linotype is Regarded as the Most Wonderful Machine Given to the World.

The following appreciation of the Linotype was written by a New York editor. It is such a machine as this that sets up the bulk of the type for The Standard every week, and much of the type for our job printing department. Those who love machinery never cease wondering at the marvel of this "mad machine that Mergenthaler made."

"During a recent visit to one of the greatest American textile weaving establishments, I stopped in fascination again and again to watch the great Jacquard looms weaving the most elaborate and intricate patterns at top speed and with a perfection that the human hand could not possibly rival. I thought that perhaps no other machine in the world was so magnificent in the performance of so many difficult and complex motions as once a mill manager.

"What was that?" I asked. "I went into a newspaper plant, replied he, and saw a machine called the Linotype. It made me jealous for my Jacquards, for my technical mind had to admit unconditionally that, wonderful though my looms are, there is in existence a machine truly far beyond them in marvelous operation. The Linotype is without doubt the most wonderful of all machines that have been given to the world."

Orders for counter check books are being satisfactorily filled right along by The Standard—no better black leaf check book made.

On and after December 1st the charge for reading notices (bores) in the Standard will be 10c per line to transient advertisers and 5c per line to contract advertisers.

Mary Pickford

JOHANNA ENLISTS

By RUPERT HUGHES

She lives on a lonely farm, does Mary Pickford in this picture, and then the soldiers came.

Never a beau before and now Lovers, three! A hardy aristocratic Captain, a handsome Lieutenant, and a peppery private. Who gets her? You call it guess. The private knows he is heavily handicapped, and calls the Lieutenant "a piece of cheese"—which naturally gets him introduced to the Guard House, followed by a Court Martial. The Captain is the Prosecutor in the case, but Cupid adds the brains of everybody concerned, and eventually Mary Pickford rides away on a gun carriage to be married.
