

## THE MARKDALE STANDARD

WEDNESDAY, OCTOBER 27th, 1920

Canadian exchange is now rapidly approaching normal rate and may reach par by the New Year.

The Canadian Dept. Waterways and Power Association is putting up a very effective propaganda for the development of our waterways from the seaport, up the St. Lawrence to the head of the Great Lakes. Profiting for the advent of ocean freighters to the lakes of Canada would give opportunity for the shipment of almost the entire exportable *timber* transfer from rail to Europe direct with only one transhipment from vessel and save millions of dollars in freight charges. While railway freight rates have been increased 35 to 40 per cent the rates on ocean shipments have decreased 66.2 per cent.

**MUCH NEEDED ACCOMMODATION**  
Since the bar has been abolished it becomes more and more recognized that there should be some place of meeting where citizens could get together for social purposes or for the interchange of ideas of a business character. A community hall, with fire place, rest room, daily papers, and a few books, would serve a good purpose. Recognizing this, the Ontario Government is offering to pay one quarter of the cost, up to \$2,000, wherever such a community hall is erected. It stipulates that there shall be in connection therewith an athletic field for games, sports, school fairs and other neighborhood gatherings.
