THE MARKDALE STANDARD

deceased, their Christian names and surnames, addresses and descriptions, the full particulars, in writing, of their claims, a statement of their accounts, and the nature of the security, if any, held by them.

And further take notice that after such last mentioned date the said Executor will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and that the said Executor will not be liable for the said assets or any part thereof to any person or persons of whose claim notice shall not have been received by him at the time of such distribution. Dated at Markdale this 15th day of November, A.D. 1920.

P. McCullough,
76-8 Solicitor for said Executor

**NOTED CHANGES
IN COURT ROOM**

Mr. Justice Lennox paid a compliment to the County Council on the greatly improved condition of the court room in the county building since his last visit here. It compared very favorably now, so he said, with any in the province. He made note of the improvements when he first entered the room and looked about with considerable interest. On his last visit the building was in a rather dilapidated condition, was lighted by gas, and needed paint badly. These conditions have all been changed and the change was quickly noticed.—O. S. Sun-Times.

**INTERESTING FACTS RE:
GARDING FOX TRAINING.**

Some interesting facts regarding fox farming are forthcoming from the Veterinary Director General, Dr. Torrance. In an article in the Agricultural Gazette of Canada for November he tells us that the main difficulty connected with the raising of foxes in captivity is the protecting of them from disease. It is noticeable that the female, instead of giving birth to a litter of four or five at a time, as she does when free, rarely produces more than two, the average for the farms in Prince Edward Island being at the rate of one and a half. Individual fox ranchers, however, by care and improved methods do succeed in securing an increase of three or even four per pair. With a view to making this success more general, under the direction of Dr. Torrance, research work has been undertaken. Land and equipment have been acquired, two scientific experts from the Health of Animals Branch employed, six pairs of foxes from the Island ranches furnished, and a small laboratory fitted up for the studying of the diseases and parasites that affect the animals.

**HOW SHOW STEERS WERE BRED
FROM GRADE HEIFERS**

It is generally conceded by all stockmen that a good sire has a handsome dividend when used on the herd, but here is a concrete example: John Kopas & Sons of Elora, who have no purchased cattle on their farm, but are believers in good sires, bred ten grade heifers in 1918 to Gainford Matchless, a son of that noted Shorthorn sire Gainford Marquis. It is a foregone conclusion that the service fee would be several times that usually charged, and Messrs. Kopas actually paid \$10 for each service. These ten heifers were only of average quality, and they dropped six heifer and four male calves. The heifers have been retained on the farm for breeding purposes, and the males were castrated but kept in a thriving condition and are now being fitted for show purposes. These steers have been given every chance, but they had no nurse cows, and as their dams were heifers it is natural to conclude that the milk provided was somewhat limited. Had nurse cows been used, undoubtedly better gains would have been made; as it is, four Gainford Matchless steers, at an average age of twenty months, showed an average weight of 1,371 pounds. Taken as individuals, "Pete," born January 15, 1919, weighed 1,425 pounds on October 15, 1920; "George," born January 18, weighed 1,350 pounds on October 13, 1920; "Mack," born Feb. 17, weighed 1,420 pounds and "Duke," born April 16, scaled 1,280 pounds.

By the way, we understand that Messrs. Kopas were offered 35 cents per pound, live weight, for these steers some time ago, but this they refused, preferring to hold them and exhibit them themselves.

Everyone may not be so fortunate as Messrs. Kopas in mating grade heifers with a sire of the stamp of Gainford Matchless. However, the quality of the sire is an important factor and the quality of the offspring nine times out of ten is superior to the offspring of the average quality sire. Comparatively few are willing to pay ten dollars service fee, even with registered stock, let alone grade.

**"But I Am Not Nervous, Doctor, See How Strong I Am"**

"YES, you are strong, all right, and I find after a careful examination that there is no indication of organic disease."

"Then what does seem to be the trouble?"

"It is your nerves, the internal nerves which control the action of the vital organs such as the heart, the stomach, the liver, the kidneys, etc. This is called the sympathetic nervous system. It is not at all uncommon for strong, healthy-looking people to suffer from this form of nervous trouble."

"I never thought I was nervous."

"How do you act in the dentist's chair?"

"Well, I generally keel over in a faint."

"That is just it. Your sympathetic nervous system is affected by the thought that you are going to be hurt. Your digestive troubles are due to the run-down condition of your nerves."

"I never thought of that."

"No, and not many people realize the all-important part played by the nerves in the digestion of the food and the functioning of the vital organs. The slow of the digestive fluids in the stomach, the filtering of bile from the blood by the liver,

the purifying of the blood by the kidneys—all these functions and many more are controlled by the sympathetic nervous system. Consequently when the nervous energy runs low all these processes are slowed up and you suffer accordingly."

"While examination shows that there is no organic disease, the action of these organs is weak because of the exhausted condition of the nerves. You need a good tonic."

"What about Dr. Chase's Nerve Food?"

"There is nothing better that I know of. Find evidence everywhere I go of the medicinal restorative power of this treatment. But do not expect to feel well in a day. It takes time to bring back strength and vigor to an exhausted nervous system."

"How long will I need to use the Nerve Food?"

"That is hard to say. Perhaps two or three weeks. But you will soon feel the effects of this treatment and then keep on using it until you are fully recovered."

"Chase's Nerve Food, 30c, in a box, Edinborough, Ont., & Co., looks for a name and signature of A. V. Chase, and on the box you will see his name and signature."

**Preserve the Love that Prompts the Giving this Xmas
with****Gifts That Last****Jewelry is the Peer of Lasting Gifts**

There can be no gift more joyously received, more treasured for its worth and lasting sentiment than Jewelry.
