Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Offices of Markdale and at the office of the Post Office Inspector, Toronto.

A. SUTHERLAND, Post Office Inspector. Toronto, Dec. 14th, 1920. 80-2

Early Proton History

(In the Farmers' Sun by Agnes Campbell MacPhail)

All my life I have enjoyed pioneer stories, and it has always been a delight to me to listen to the tales of early days in Grey County, Ont., from the lips of my two dear grandmothers. Both my grandfathers died before I was old enough to appreciate their conversations, and my remembrance of both is very hazy.

I will try to give the Sun sisters the stories as I heard them: beginning with my maternal grandmother, Mrs. Jean Campbell, because she is the elder of the two by ten years, and if she lives until Oct. 31st, 1920, she will be ninety years old. In the year 1851 Jean and Jack Campbell and their baby son left Glasgow, Scotland, on board a sailing vessel bound for Montreal to try their fortunes in this new land. The trip took six weeks, and during that time the baby died. It was not buried at sea but at the first place the ship could land. From Montreal the journey was continued by boat to Toronto.

For a short time they worked at a brick yard, owned by Jim Read, at The Gore of Toronto, but the following Spring they went further into the bush seeking land; because their desire was to have "got a farm for themselves."

Finally they settled on what is now the third concession of Normanby township, where Grandma bought 200 acres of land from a negro for \$75.00. A very eridic shanty was built and the clearing began, but the first summer of their stay they both took the ague. Grandma had it for six weeks and Grandpa for five. The shaking came every second day, and after it a burning fever that made them very thirsty; it happened that they didn't take the severe shaking on the same day, so the well one would take a pail and a stick to help them climb the sharp hill and go to the creek for water. They were so sick that at the end of three weeks Grandma gave the cow the loaf of bread that had been in the shanty, but which they had never tasted.

Some potatoes brought by a neighbor, and quantities of hemlock tea soon made them well, although Grandma always said he got well a week sooner on account of a big drink of whiskey he took. Grandma wouldn't taste it.

The next Spring two more Campbell men, Tom and George, and one woman, Georgie's wife, Lizzie, came to Canada. They didn't like the land their brother had chosen, and leaving the women there the three men went through the bush with their supplies strapped to their backs, and located on what is now the 15th Concession of Proton township, where their descendants still live.

They stayed in Proton about nine months, getting a little clearing made and a shanty built. They had flour and water to eat and they had the choice of eating it raw or cooked. Their bed was brush with whatever blankets they carried.

When the log house was fit to live in the men went back to Normanby and with two yoke of oxen hitched to jumpers they began their return journey, taking all their goods, with them, also eight bags of flour. They often had to cut a road for the oxen through the thick brush. The women walked and carried a baby each, and drove a cow and five pigs. One of the babies was only nine weeks old; the distance was eighteen miles. The first night they stayed at Jackson Reid's MacCadden's on the 15th Con. further west, where the land was so wet that hewed logs were laid on the floor on which one could walk with dry feet. The women were home half a day, before the oxen. They all lived in Georgie's house until one could be built on Grandpa's place.

Grandma says their new shanty was a good one and warm. The floor was made of split logs. The chimney and fire place were built of mud and sticks like thick lath. The chimneys between the logs were filled in the same way. There was one window with six small panes, but the house was so dark that the sewing was done by the fire place where the light came in through the chimney.

The chimney smoked very badly and after putting up with it for a long time Grandma tore it down. She then dug a hole in the ground and with her bare feet tramped water into the clay until she had a suitable mortar, then alone she rebuilt it and it never smoked again.

At first they used the "chests" for table and chairs, but after a time Grandma got Archie Fullerton to make her a big strong table, that she still has for fifty pounds of flour.

Are Gifts Worth Giving—Always in Good Taste.

J. H. STEPHENSON, The Gift Store.

When the clothes were seven sheep were shown but the sheep got the sheep years no more sheep were so every blanket in the house was made of wool. The wool was colored by boiling in a Golden Rod, straining using the liquid as dye.

When they were new Mrs. John MacEchnachan put on his high hat to attend the other men were wearing the suit or hat and Grandpa to cut their boys.

After a time the MacEchnachans and the MacEchnachans had been in before the Community Life became Grandpa says they had the only clothes they were working clothes. Mrs. MacEchnachan's talk is full of skill and kindness.

In this age of brotherhoods and societies their get-together talk, nowhere compared to the unity of those pioneer their real friendships, found together with the "ging" chain of "commo" shared.

When Priceville came a new style began for a blue derry skirt with a smock was the very latest woman who had one dressed.

Of all the old settlers mentioned no men remain, only three women, my two grandmothers, and Mrs. Dunca MacPhail, who now lives in Fieserton.

The rugged honesty, the devotion to duty and the real character of these early settlers are very small. We do not have the debt of gratitude that is a duty as well as a privilege to preserve the pioneer days in Ontario children of to-day and will realize what a struggle clear the land and make cultivation, and that there is a general disposition to stop buying there will soon be a general inability on the part of the manufacturers to keep their plants operating.

GROWTH OF GRAIN ELEVATORS

The grain elevators have grown enormously in the last few years. This growth and development have so far been mainly confined to the Prairie Provinces of Saskatchewan and Alberta, but the system is attracting more attention in the other parts of the country, particularly in Ontario, where wheat growing and shipping is rapidly increasing. The erection of elevators, not only in numbers but in size has been such that some of them can fairly be termed mammoth. For instance as those at the

There are, according to Hon. George Langley, Minister of Municipal Affairs for Saskatchewan, not fewer than 2,000 (thirty-six hundred) elevators in the three provinces referred to, from 40 to 60 feet high and capable of storing from 20,000 to 30,000 bushels of grain on the average, a few reaching to twice the greatest enumerated capacity. In other words upwards of 110,000,000 bushels of wheat can thus be stored at one time. These facts and figures are taken from an interesting article by Mr. Langley in the September number of the Agricultural Gazette of Canada. By the terms of the Canada Grain Act, the owners of the elevators, mostly private individuals or incorporated companies, are compelled to accept all grain offered by farmers, unless well or unworkable with safety, hence the general and common use of the system. The elevators are all licensed by, and are under the supervision of the Board of Grain Commissioners of Canada.

MEMORIAL FOR LION'S HEAD

Mr. J. J. George, of Port Elgin, received the contract from the East-ern Conical East work for supplying and erecting a large Memorial Monument at Lion's Head. This Memorial will cost the Township \$1,000. It will be erected in memory of their six warrior sons who fell in the popu-lar wars of Flanders having made the supreme sacrifice in the late world war.

A VICIOUS CIRCLE

(Peterborough Examiner)

About the worst thing that could happen to Canada at the present time would be a decision on the part of anybody to refrain from buying anything but the hardest necessities, waiting for prices to drop. There is a tendency, just now, to adapt that as a motto, and the effect upon trade and industry is already felt. We heard much about the "vicious circle" when wages and prices were climbing during the war and immediately after. It was another kind of vicious circle, may be, but it was a vicious circle, and it proved to be a general disposition to stop buying there will soon be a general inability on the part of the manufacturers to keep their plants operating.

"My! How I did used to dread having the Threshers come—but I don't mind now."

"WHY, a year ago I could no more think of cooking a big dinner than I could fly.

"I did not seem to have any strength then, and a little extra work or excitement would use me up for a week.

"The doctor said my nerves were weak and that I had nervous prostration. I was certainly very nervous and irritable. I was always worrying about something.

"It all looks very foolish now. But that is just the difference between being weak and strong!

"Why doesn't every woman use Dr. Chase's Nerve Food when she gets run-down in health?

"But I suppose they do not all know about it or do not realize what it will do for them. Then perhaps some of them do not use it long enough to build up their exhausted nervous systems.

"One thing sure, the women of this community will know all about Dr. Chase's Nerve Food, for they know how miserable I was, and I will see that they know what I used to make me well.

"I certainly did get into a terribly run-down condition, but no one would believe it to see me now since using Dr. Chase's Nerve Food. I can now take a real pleasure in life and its activities.

"And why shouldn't I? I sleep like a top, enjoy my meals and get outdoors where the fresh air and sunshine help to keep me feeling fine.

"I don't believe people appreciate good health until they have been sick for a time. I am sure that I did not. The credit for my splendid health now is undoubtedly due to the use of Dr. Chase's Nerve Food, and I want every woman to know it."

Dr. Chase's Nerve Food, 50 cents a box, all dealers, or Edmondson, Bates & Co., Ltd., Toronto. Look for the portrait and signature of A. W. Chase, M.D., on the box you buy.
