

BRITISH COLUMBIA PULP AND PAPER

GROWTH OF THE PAST TEN YEARS.

Province Possesses the Largest Remaining Stands of Pulp- wood in the World.

The birth and development of the pulp and paper industry in British Columbia has been phenomenal. A decade ago not a single ton of pulpwood, mechanical or chemical, was manufactured in the Pacific Coast province. In 1919 the total value of the products of this industry amounted to \$12,554,257. To-day British Columbia stands third among the provinces of the Dominion in the amount of capital invested in the industry. The surprising rate at which this has grown in the last few years and is continuing to grow, is indicated in the jump effected between 1917 and 1920 of from \$22,684,652 and \$50,000,000 in 1920.

This is a remarkable history of development of what will doubtless become one of the most important industries of the Pacific Coast, but it is more than probable that the next decade will exhibit still more rapid expansion. Great Britain and the United States are drawing the greater part of their paper supplies from Canada, and eyes are turned to British Columbia, possessing as it does the largest remaining stands of timber in the world suitable for the production of pulp and paper. The province's annual export to Australia already amounts to more than 20,000 tons, whilst the demand for pulp from the far east far exceeds available supply.

Nearly Three Hundred Million Cords.

Of the 370,370,000 cords of pulpwood estimated to exist in Western Canada, British Columbia is credited with 285,370,000 cords, consisting of spruce, western hemlock, and balsam, whilst for the coarser grades of pulp a certain amount of Douglas fir is used. It should also be observed here that British Columbia is highest among the provinces of the Dominion in the average production of pulp per cord of wood, the national process giving an average of 2.485 cords.

Today there are only seven plants in British Columbia producing pulp, groundwood and chemical—and no mill. No other industry offers such boundless opportunities of development. In addition to the enormous mass of suitable timber are the tremendous unharvested water powers awaiting utilization, which are estimated at 5,000,000 horse power. The temperate climate of the Pacific Coast gives assurance of open harbors the year around, whilst apart from the demand in the United States, there is an unlimited market for the product of the mills immediately across the ocean.

No Export Embargo on Raw Product.

This may be instanced from the fact that the entire pulp product of one of the largest mills on the coast goes to Japan for manufacture there into newsprint. Up to the present time the Provincial Government has placed no embargo on the export of the raw product.

British Columbia is producing sufficient newsprint to supply the whole of Canada, taking the most recent estimates of the annual consumption of 20,000 tons. The figures of the province's output of pulp and paper of all kinds for 1919 were as follows:—sulphite, 80,047 tons; sulphate, 9,473 tons; ground wood, 99,769 tons; paper, newsprint, 123,607 tons; wrapping, 7,202 tons. In newsprint production British Columbia already stands third among the Canadian provinces.

From the standpoint of timber resources, waterpowers, climate, shipping, a bright future awaits British Columbia in the pulp and paper industry, and the coming decade will see it placed high among the paper producing sections of the American continent.

Peanuts in Baby's Bath.

When a new baby arrives in China it is the custom of the mother's parents to supply it with several outfits of clothing. If the baby's maternal grandparents are wealthy it is not unusual for them to furnish all its clothes until it is two or ten years old.

Though custom vary in different provinces, just as infants do, it is a common thing when the child is three days old for the parents to present boiled eggs, dyed red, to relatives, friends and neighbors, thereby signifying that they hope that their children will be as numerous as the eggs. Frequently the number of eggs given away totals 2000 or more.

For a baby's bath, two tubs of water are made ready, one for its body and one for its head. Dragon's eggs and peanuts are thrown into the water in both tubs, this being supposed to insure long life and success in all undertakings of the child's adult life. It is customary for relatives to drop money liberally into the water.

Earliest Standing Army.

The earliest standing army in Europe was that of Macedonia, established about 358 B.C. by Philip, father of Alexander the Great. It was the second in the world's history, having been preceded only by that of Sesostris Pharaoh of Egypt, who organized a military caste about 1,600 B.C.

Boy Scout Notes.

Patrol Leader Frank B. Johnston, of the 64th Toronto Troop, Boy Scouts, has just been awarded the bronze medal of the Carnegie Hero Fund for saving Miss Daisy A. Hooper from drowning in Lake Scugog. Scout Johnston was awarded the highest award The Boy Scouts Association could give him—the Bronze Cross for Gallantry—some time ago.

Le Comite American pour les Redevances Devastees de la France, which conducted a large Boy Scout Training Camp at Compiegne, France, last summer, will next summer conduct five similar camps for French boys. Last year The Boy Scouts Association, the Boy Scouts of America, the two Belgian Scout organizations, and the several Boy Scout Associations in France co-operated in this work and some 275 older boys and young men from the devastated regions of France graduated from this "Camp-ecole," as it was called. Mr. Frank C. Irwin, Executive Secretary of the Boy Scouts Association for Ontario, represented Canada on the staff of the 1920 camp.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds which rack his little system; his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep up baby's own tablets in the house. They regulate the stomach and bowels and break up colds. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

It Never Fails.

Disraeli used to say that although he was always forgetting faces and never remembered their names, he had no difficulty in being pleasant to his followers in the House of Commons. "When I met somebody in the lobby whom I don't know from Adam and I see that he expects me to know who he is, I take him warmly by the hand, look straight into his eyes, and say, 'And how is the old complaint?' I have never known it to fail."

The laws of nature are not enforced by dilatory courts; your punishment begins the moment you break them.

Surnames and Their Origin

FRASER

Variations—Frazier, Frasier, Frazier. Racial Origin—Norman-French. Source—A locality.

This is another of the Highland clan names which, though borne by Celtic families, trace back to origin in Normandy.

All of these clan names were formed in the same way, by brights and nobles from the army of William the Conqueror, or the sons of such followers, who, either to strengthen the foreign relations of the conqueror, or because they were not satisfied with the spoils of war which fell to their lot in conquered England, sought their fortunes in the north at the court of the Scottish king.

COCHRAN

Variations—Corcoran, Coghraane. Racial Origin—Irish. Source—A given name.

The family name of Cochran holds high place in the annals of ancient Ireland, prior to the Anglo-Norman invasion, in which it appears as "O'Corran."

The name traces back through the O'Carroll or the "O'Carroll" clan to Owen More ("Eoghan Mor") being closer to the old Irish spelling, "Corera," meaning "red"; hence the family name of "O'Corran," meaning "the descendant of the Red One."

The Silence.

(November 12, 1920)

The soul of England trembles in this breath.

This air of England that our warriors breathe

When in the valor of true hearts aware Of England's need, they to her heart bequeathed

Immortal legacies No heaven's deep Of nothingness is this. The air's astr To sound of shadowy voices. They who sleep

Their omnipotent silence wake. Though sleeping blur

The vision of our vigil, Love may hear The voices of the loved. Love's legions lead

From the celestial ramparts, and so near They rest to England's heart, that on this scope

Maybe they gaze content, and hear the toll Of bells that ring the psalm of England's soul.

The people to whom we are most grateful are those who raise our standards who awaken in us generous impulses, who enrich us with spiritual gifts, and who make us resolve to express ourselves completely in service to others.

Famous Last Words.

"I wonder if it's loaded. I'll look down the barrel and see."
"Oh, listen! That's the train whistle. Step on the accelerator, and we'll try to get across before it comes."
"They say these things can't possibly explode, no matter how much you throw them around."
"I wonder whether this rope will hold my weight."
"It's no fun swimming around in here, I'm going out beyond the life lines."
"Which one of these is the third rail, anyway?"
"There's only one way to manage a mule. Walk right up in back of him and surprise him."
"That firecracker must have gone out. I'll light it again."
"Watch me skate out past the 'Danger' sign. I bet I can touch it."
"These traffic policemen think they own the city. They can't stop me. I'm going to cross the street now. Let the chauffeurs look out for me."
"That's a funny noise that snake makes. I think I'll step on him."
"I've never driven a car in traffic before. But they say it's perfectly simple."
"I think I'll mix a little nitric acid with this chloride of potassium and see what happens."

Magic in Names.

Is there any young person who has not from his reading derived a sense of the magic of the East? And if the reasons for his impressions were analyzed, would not the mere sound of names be found in large part accountable? Spicy odors, tropical jungles, strange beasts and reptiles and peoples, all play their part; but it is such words as Samarkand and Gand, Bosphorus and Bombay, Ceylon, Gangete, Kashmir and Himalaya, ringing poetically in the youthful ear, that fill the youthful mind with impulses of the imagination—and is it not because it is so besprinkled and bejeweled with magical names, rather than because it has tigers and cobras and elephants in its forests? China does not have the fascination for youth that India has—perhaps because there is less romance in the singsong Chinese syllables. Hongkong, Yangtze, Shanghai, Hwangho have somehow the uncountedness of jargon rather than the ring of magic.

WINTER HARD ON BABY

Three-Pile Games.

The outfit required is only three piles of small articles. At the beginning each pile may contain as many articles as the players wish, nor need the piles all contain the same number. Each player in turn takes as many counters as he pleases from a pile—all there are in that pile if he wishes—but he can draw from that pile only at that particular play. The other player has the same privilege in his turn. He who takes the last counter may be either the winner or the loser, as the players may agree beforehand.

Electric Tree.

In the forests of Central India a tree has been discovered which has most curious characteristics. The leaves of the tree are of a highly sensitive nature, and so full of electricity that any person who touches one of them receives an electric shock. It has a very singular effect upon a magnetic needle, and will influence it at a distance of even 70 ft. The electrical strength of the tree varies according to the time of day, being strongest at midday, and weakest at midnight. In wet weather its powers disappear altogether. Birds and insects never approach it.

HOW TO BE HEALTHY DURING THE WINTER

Many Troubles May be Avoided if the Blood is Kept Pure

Do not let your blood get thin this winter. For people who have a tendency towards anaemia, or bloodlessness, winter is a trying season. Lack of exercise, lack of fresh air, and a more restricted diet lead among the things that combine to lower the tone of the body and weaken the blood.

As soon as you notice the tired feeling, lack of appetite and shortness of breath that are warning symptoms of thin blood, take a short course of treatment with Dr. Williams' Pink Pills. Do not wait until the color has entirely left your cheeks, until your lips are white and your eyes are dull. It is so much easier to correct thinning of the blood in the earlier stages than later. This is well illustrated in the case of Mr. B. M. Day, Newcastle Bridge, N.B., who says: "From my own experience with Dr. Williams' Pink Pills I can most heartily recommend them. Some time ago I was badly run down and my blood seemed thin and watery, accompanied by the usual symptoms of this condition. A friend recommended Dr. Williams' Pink Pills, and after taking several boxes I felt like a new man."

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent you by mail at 50 cents a box or six boxes for \$2.50 by writing direct to The Dr. Williams' Medicine Co., Brockville, Ont.

The Skipper's Only Fib.

The deep-sea fisherman often has a sharp tongue and is not likely to get the worse of a verbal duel. But George, the skipper of a Yarmouth trawler, who fishes in North Sea Fishers and Pichters, by Mr. Walter Wood, certainly met his match once whether he knew it or not.

"There's land people who come and bother you with foolish questions," he complained in recounting the hardships of a skipper's life. "I try to put 'em off, but can't allus do it. There was an old lady who worried me past endurance with her questions, asking if the horizon's were caught in barrels, as she'd sometimes say, and then she aggravated me to the extent that I told the only fib I ever spoke in my life."

"How do you kill 'em when you've caught 'em?" she asked.

"We bite off their heads," I answered.

"She looked at the catch of herrins we had. 'My! My!' she murmured, 'walkin' away. How tired your poor jaws must be!'"
