They were not, of course, followers of calling strictly parallel to those of the wing. the modern expressman and purchasing agent, yet the similarity is close enough to warrant the use of those terms "with reservations."

Their economic reason for existence was the result of poor commutation facilities in the middle ages. The housewife who lived just outside London or any other city could not run into town to do a little shopping as easily as she could to-day. A journey of even a few miles was a fairly serious and time-consuming proposition. Nor did all of the ladies who had the funds and the desire to spend them in the larger shops of the cities have the servants and liorses at their disposal that their more wealthy sisters of the across their eyes to shut out the light nobility had. Hence the "packer," or for they sleep it the daytime. "packman."

The "packer" was a trustworthy intation in his own community who acted as the go-between for those of that community who wished to shop in the name is "sacques." That is why the city. > New Uses for Paper. We have heard of paper suits, and ve have all donned paper hats at hildren's parties, but Germany is puting paper to an even more unique use. Whilst travelling in Germany recently an Englishman was struck by the curious window straps in the Ger- the waiter. man trains. Instead of being the orthodox leather ones they appeared

ed fibre. Later he was able to procure a portion of one of these straps, and, on investigating, found that they were simply made of paper. It had been twisted into tiny strands, and twisted again and again, then probably treated with something to strengthen it, for the straps must needs be very strong to hold up a carriage window, especially as those in the German trains are of a large and heavy type.

The seats in many of the trains are also covered with the same substance while baskets and many other article are made in the same way.

His Hearing Restored.

The invisible ear drum invented by 1. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York City. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated, or wholly destroyed natur al drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth Avenue, New York City, will be given a prompt reply.
