## Home Made Bread

Home made bread is without doubt the cheapest and most healthful food that can be produced for human consumption. It is the most completely digested solid food in the world, over 90% of it being transformed into health and strength. It yields nearly twice as much nourishment as rice or potatoes. and is ten times as nourishing as an equal value of meat. No bread is more truly wholesome or more perfectly satisfactory than that baked at home in which Royal Yeast Cakes are used.

Scientists have discovered a new and truly wonderful use for Royal Yeast Cakes Physicians are prescribing it with remarkable success for conditions attributed to poor blood conditions. Soak a cake of Royal Yeast for half an hour in a cup of luke-warm water with one teaspoon sugar Then stir well and strain once or twice through muslin and drink the liquid. BETTER results will be obtained by allowing it to soak over night and drinking half an hour before breakfast. Repeat as often as desired. Send name and address for free booklet entitled "Royal Yeast for Better Health."
