

Extend your farm operations

NO progressive farmer needs to be urged to produce to the limit of his facilities. His problem is to find the means—the capital.

Is it more stock, more housing, feed, seed grain, implements or new land to be cleared or broken?

The Bank of Toronto is ready to assist responsible farmers for these, or any purpose which will enable them to increase their production and profits.

VANDELEUR

(Special to The Standard) Mrs. Harry Baker is spending a few days at the home of her parents, Mr. and Mrs. Jos. Halbert, of Harkaway.

Miss Eva Burnett, of Markdale, spent the week-end with Mr. and Mrs. J. I. Graham and family. Mrs. L. Johnston has returned to her home, after spending a few weeks with her sister, Mrs. Davidson, of Paisley.

Miss Edna Burritt, of Kimberley, is the guest of her sister, Mrs. Dave Graham.

Mr. and Mrs. T. H. Richardson and daughter, Nettie, also Messrs. J. Richardson and T. Burnett, of Harkaway, motored down and visited Mrs. Jane Richardson and Miss E. Clock recently.

Mrs. John Warling is under Dr. A. A. Powers, of Orango, President of the United Farmers' Co-operative Company, will address the Farmers' Club on Friday evening, of this week.

The local baseball team went over to Bunesan last Friday afternoon and played a League game with the Glenelg Centre team, which resulted in a score of 11-1, in favor of Vandeleur. The game was played at the Bunesan Farmers' Club Picnic and was a quiet, friendly affair. The Glenelg boys are good sports and took their beating without a word. The batteries were: Vandeleur, R. Graham and Bowler, Glenelg, McDonald, McRae and Burke. Umpires, Boland and Muir.

PRICEVILLE

All vegetation is looking remarkably well.

The home guard is inflicting heavy losses on the Colorado beetles, invading the country these days, but the enemy is receiving innumerable reinforcements daily.

Hector McDonald, South line, has been engaged taking the census in the South East Ward, of Glenelg. Alex. McLean, a returned soldier, has been sent by the Government to Guelph to enter some Mechanical Training Course.

Mr. and Mrs. Fred Karstedt motored down to Grimby to spend over the week-end with Mrs. Karstedt's friends.

Robert Dingwall, a young student for the Ministry, conducted the service in the Methodist Church on Sunday morning last, in the absence of the Pastor, Rev. R. J. McCarten. The congregation are interested in Mr. Dingwall and wish him every success.

Rev. R. J. McCarten, after attending Conference at Orillia, remained over at Allendale to take some medical treatment, and we understand he is already feeling some improvement. Mr. Patton, the plastering expert, of Flesherton, has been working on Mr. Jones' house and is now at W. G. Watson's.

STRATHAVON

(Special to The Standard.) Mr. Wm. Morgan and son, Charlie, motored to Stratford on Friday to spend a few days with Dr. Torrie.

A large number from here attended the Garden Party at the 10th line church on Thursday.

The basketball team played with Bogner at the Garden Party on Wednesday and came out 7 to 9 in favor of Strathavon.

Mr. and Mrs. C. White, of Toronto, are visiting with the latter's brother, Mr. E. McKibbin.

Rev. W. Smalley left on Monday for Ohio to visit his father, who is very ill at present.

Mr. and Mrs. J. Morrison, of Derby, and Mr. Angus and Miss Christine Torrie, of Harkaway, were callers at Mr. A. Torrie's last week.

Miss M. Carmichael was the guest of Miss C. Long on the first of the week.

There will be no service in the church here, owing to the absence of the Pastor.

ROCKLYN

(Special to The Standard) Wedding Bells are ringing. We have had some refreshing showers lately and the crops are looking well.

Miss Hazel Falls, of General Hospital, Owen Sound, spent the past week with her sister, Florence, who we are pleased to state is regaining health and strength.

Mrs. Alf Kelly and children, of Sask., are visiting friends in this vicinity.

Mrs. G. Yeasell, accompanied by her sister, Mrs. A. Glas, of Orillia, spent a few days last week with Mrs. Will Clugston.

Mr. E. Abercrombie has purchased a car.

CHERRY GROVE

(Special to The Standard.) Mr. and Mrs. E. Brady visited with the former's niece, Mrs. Thos. Irwin, near Cayton, the first of the week.

A Friend of the Family

Over fifty years ago a young physician practiced widely in Pennsylvania and became famous for his uniform success in the curing of disease. This was Dr. R. V. Pierce, who afterwards established himself in Buffalo, N. Y., and placed one of his prescriptions, which he called "Golden Medical Discovery," in the drug stores in the United States and Canada, so that the public could easily obtain this remarkable tonic, corrective, and blood-maker. Dr. Pierce manufactured this "Discovery" from roots and barks without alcohol—a corrective remedy, the ingredients of which nature had put in the fields and forests, for keeping us healthy. Introduce pure red blood into the system, and health is assured. When you feel run-down, out of sorts, blue and despondent try the energizing influence of this reliable tonic. You can obtain Golden Medical Discovery in tablet or liquid form at all drug stores, or send 10c for a trial package to Dr. Pierce's Laboratory in Buffalo, N. Y.

Miss Elsie Petch, of Epping, is on a visit with her aunt, Mrs. Will Myers, Jr.

Mr. Ran Bradey was in Owen Sound last week.

Mr. and Mrs. John Burton were guests of Mr. and Mrs. Will Myers, sr., recently.

Mr. E. Bradey, sr., put on a successful buzzword bee on Monday.

Come to the picnic in Penolton's Grove next Friday afternoon, June 24th, and see the baseball match between Cherry Grove and Townline, A. & E. teams.

Little Almada Myers was taken ill with a severe attack of pneumonia last week, but with prompt medical aid, the disease was checked in its incipient stage. Her grandmother, Mrs. Wilson, of Lauriston, came over to assist in nursing the little girl, who is now well on the way to recovery.

Sunflower as a Silage Crop

Much interest is being taken both in Canada and the United States in the value of sunflowers as a silage crop, particularly in districts where corn is not a reliable crop. The claim is made that sunflowers are a harder crop than corn; withstanding both drought and frost to a greater degree. Insofar as the claims put forth for sunflowers as a food for cattle are virtually of recent origin, experiments and investigation regarding them are practically in an introductory stage. It is interesting to note, however, that an analysis of sunflower silage fed at an Idaho agricultural experimental station indicated that it compared favourably with corn silage. In Canada also, studies of the relative value of sunflowers and corn for silage purposes suggest that in nutrition there is not any great difference, although corn is to be preferred where it can be plentifully and easily grown. Where this is not the case, sunflowers are an excellent substitute.

SPRAYING OF POTATOES

Absolutely Necessary to Prevent Blight and Rot.

How to Fight These Fungus Enemies—Directions for Spraying—Must Be Timely and Be Thoroughly Done.

(Contributed by Ontario Department of Agriculture, Toronto.)

Potatoes are sprayed to prevent such fungus diseases as Early Blight and Late Blight and Rot. Efficient spraying depends upon an understanding and appreciation of what fungus diseases are.

Fungus diseases are caused by plants known as fungi. These plants, unlike ordinary flowering plants, have no green coloring matter (chlorophyll), and are unable therefore to manufacture their own food. All their nourishment must be obtained from decaying animal or vegetable remains or from living animals or plants. Those fungi which derive their nourishment from living plants injure them in so doing in various ways, and thus give rise to what are known as fungus diseases.

Late Blight and Rot is the most destructive disease of potatoes in Ontario. In wet seasons it frequently destroys a very large proportion of the crop and causes a loss of many thousands of dollars to the farmers of the province. This is to a large extent a needless loss, for Late Blight and Rot can be prevented by timely, thorough and intelligent spraying with Bordeaux mixture. This has been proven by numerous field experiments both in this country and the United States. Spraying every year is an insurance. Can you afford to neglect it?

Directions for Spraying.—Spray with Bordeaux mixture, strength 4 to 6 pounds of copper sulphate (blue stone) and 4 pounds of lime to 40 gallons (Imperial) of water. Commence spraying with Bordeaux throughout the season. Forty to 100 gallons of the Bordeaux mixture will be required for each application, the amount to be used depending upon the size of the plants. Take special care to see that the spraying is very thorough done if the weather is at all damp about the 15th of July, as Blight often begins at this time. Add a poison when necessary for Potato Beetles—arsenate of lead paste 3 1/2 pounds to each 40 gallons of the liquid spray or Paris Green 2 pounds to 40 gallons or a mixture of 2 pounds of arsenate of lead paste and 1 pound of Paris Green to 40 gallons. From three to seven applications should be made, depending upon the season; the wetter the weather the more frequent the spraying should be. Do not put off spraying because it looks like rain. If the spray is on the plants half an hour before the rain comes it will be dry and sufficient of it will stick to prevent infection, which is the object of spraying. Spraying should prevent not only Late Blight and Rot but also Early Blight and Potato Beetles. For Late Blight and Rot only, it is not necessary to commence spraying until about the 10th of July, but in Ontario, it is usually advisable to spray for all three.

A hand pump barrel sprayer can be used for small lots of potatoes. Most men who grow any considerable acreage of potatoes consider that a power potato sprayer is a good investment. The best results from spraying are obtained with machines fitted with T-joint attachments so as to insure covering both surfaces of the leaves at each spraying. Efficient spraying of potatoes depends:

1. Upon the use of the proper fungicide. Bordeaux mixture has so far proved to be the only satisfactory spray mixture for potato diseases.
2. Upon timely and repeated spraying. Spraying should be commenced when the plants are from six to eight inches high, and repeated at intervals of from a week to ten days throughout the growing season. From three to seven applications will be required, the number depending upon the weather, the water the weather, the more frequent the spraying.
3. Upon the liberal use of Bordeaux mixture. Thorough spraying can only be done when sufficient of the spray mixture is used. From 50 to 150 gallons of Bordeaux mixture should be used per acre at each application. When the plants are large not less than 100 gallons per acre should be applied.
4. Upon thorough spraying, which means the covering of every portion of the plant.
5. Upon spraying before rather than after prolonged rainy periods. Infection of the plants takes place during or soon after rain. Therefore it is of the utmost importance to have the spray mixture on the plants when the rain comes. If the spraying is completed half an hour before rain commences the Bordeaux will stick to prevent infection. If the spraying is left until after prolonged rain infection will take place before the Bordeaux can be applied to the plants. Putting off spraying because it looks like rain is one of the most frequent causes of failure to obtain results from potato spraying.—J. M. Hewitt, O. A. College, Guelph.

Dig out borers from trunks of peach trees.

Spray underside of rose leaves with nicotine sulphate to kill Leaf-Hoppers.

Grass, clover, alfalfa, or fall sown rye, are usually ready for pasture now.

Watch carefully pear trees and young apple trees for Blossom Blight. Break off infested parts. Repeat every second day till danger is past. Disinfect tools and any cuts made.
