Truth

Nature never did intend Deceit for age or youth; And never meant us to invent One false word for the truth. It meant us in a truthful mood To deal with earthly brothers; And if we could not do some good, To do no ill to others.

Live for the light that shines in truth, With courage bold to sound it; And have the place where you have lived Some better than you found it.

And greet that light from every side, Regardless of the source, And live so that it will abide Till life has run its course.

Better live for truth on lower plains, With conscience clear as air; Than prosperity on ill gotten gains, And die a millionaire.

And as your prayer imploring runs For blessings which are desiring; Pray that false, untruthful ones May soon for truth be serving.

Joseph Wm. Weber, Redwing, Ontario.

Atrocities in House Building

There are no end of atrocities perpetrated against the little house in the name of the bungalow—creations that look like match boxes or bird houses or toy banks, with a shoulder jutting out here, and a dip in the roof there, and a dormer at the corner tucked under the chimney, says Ethel M. Chapman in the Farmers' Magazine in one of its latest issues. These houses may get by fairly well while they are crowded in a row of houses on a city street, but when we set a house out in the open country with a few trees for side pillars and the fields and the sky for a background, it should have character and meaning in every line.

Worship In Green Groves

Tree-planting this spring should be regarded as a religious duty by every farmer of Ontario, says Farmer's Magazine. So many trees have been cut down this winter that our Province will soon be a desert unless we replant.

SCHOOL REPORTS

PROMOTION EXAMINATIONS

Laurier Memorial

The Laurier Monument Committee announces that the public subscription, which was limited to a sum not exceeding \$5,000 from any individual subscriber, has realized \$35,293.00, representing many thousands of subscriptions. The sculptors have been chosen and the monument on the grave of the illustrious deceased is being prepared. The Committee, in its name and that of Lady Laurier, takes this occasion to tender heartfelt thanks to all subscribers. By order of the Committee, P. C. Larkin, Treasurer, Toronto, Ontario.

The Western Fair

September 10th to 17th

The speed events held in connection with London's Exhibition this year will be of special interest. A new plan is adopted whereby the entry fee is abolished. There will be a stall fee of \$10.00 for each stall, and any horse may start in any event in which it is eligible. The purses are \$300.00 for each event and there are ten events. The money will be divided 50, 25, 15 and 10%.

This should certainly be an attractive programme for the horsemen. The last day of the Exhibition, Saturday, September 17, will be a great day. The management have secured at tremendous expense, through Mr. Sloan, of Chicago, a series of automobile races. There will be seven cars and drivers and six events. The usual price of admission will prevail at the gates and grand stand. All information from the Secretary, A. M. Hunt, General Offices, London.

Reforestry

Planting a Tree for Each One Cut Down.

Sometimes it is said that in certain European countries the law compels the planting of a tree for every tree cut down, and it is urged that such a law should be enacted in the different Provinces of Canada. The expression, however, is only metaphorical. What European countries do provide, is that for every acre of forest cut down, in certain areas unsuitable for agriculture, another crop of trees must be started by either natural or artificial methods of regeneration on that area. When forest trees are planted the trees are set, say 2000 to the acre, and when they are harvested, sixty or seventy years later, they stand from 150 to 200 to the acre. If they had been planted 200 to the acre they would have grown short and full of limbs from the ground up, and would be useless for lumber. Planted thickly they reach upward for the light, making long, clear trunks. The trees which never reach maturity are thinned out either naturally or with the axe after they have served their purpose. Important facts about tree-growth are set out in Forestry Bulletin No. 69, "Care of the Woodlot," which may be had free upon application to the Director of Forestry, Ottawa.
