made it whole and beautiful go Even for young Christian mended vase holds its to straight Him with their broken resolution and ideals, can and will make them whole and strong and beautiful again.

Easy Way to Mix Bordeaux.

A convenient modification of the safe way to make Bordgaux mixtures, ssuring the most effective spray solution, is now recommended by sevral experiment stations The old method, long followed by

dareful and progressive growers, was make the standard 5- 36 B' cleanx mixing five pounds f crater sal hate with twenty-five galions of vater in one container by mixing live pounds of copper ulphate with wenty-five gallons of burne! lime with another twenty-five gallers of vater in another container; and by ouring the two dilutions together.

The modified method, said to be just safe and more convenient, is deribed as follows: Suppose you have fifty-galion

nk to fill with 5-5-60 Bordeaux, aco in this tank five gullons of the ock copper sulphate solution, equivent to five pounds of crystals, and en add therty-five gallons of water. Next, take five gallone of the etock ne, equivalent to five pounds of one lime, dilute it with five gallons water, pour it(into the copper sulhate solution, and stir the two to-

ther. Remember always to dilute the copper sulphate before mixing. Mever add con entrated copper sulpinte either to weak or strong lime

fusion is sure to result if the machines, limestone of excellent quality is to be station.
