Preliminary estimates of the ensilage crop as compiled by the Provincial Bureau of Statistics, state that the

And His Family Medicines

MOST people first knew Dr. Chase through his Receipt Book. Its reliability and usefulness made him friends everywhere.

When he put his Nerve Food, Kidney-Liver Pills and other medicines on the market they received a hearty welcome, and their exceptional merit has kept them high in the public esteem.

Take Dr. Chase's Kidney-Liver Pills for example. There is no treatment to be compared to them as a means of regulating the liver, kidneys and bowels and relieving constipation, biliousness, kidney disease and indigestion.

One pill a dose, 25c a box at all dealers or Edmanson, Bates & Co., Ltd., Toronto.

present indications point to a record crop in some sections, where this class of fodder is grown. We presume that Riverdale is one of the famous corn growing sections referred to, as a stalk of corn measuring fourteen feet was discovered here last week. We suggest that the Wodehouse reporter consign his hop poles and lemon ladders to the brush heap and come across in a flying machine to see and behold our truly marvelous epilage, before the aeroplane route is rendered impossible.

Do Your Bit to Prevent Bush Fires

YOUR co-operation—the co-operation of all the citizens of Ontario—is the biggest need in Ontario Forestry to-day.

History shows that impoverishment and national decline follows from the destruction of a country's forests.

Most of the area of this Province is non-agricultural, and is left to Nature only for growing trees. The Government sells the trees.

Every summer in Ontario an average of 1375 bush fires are burned over, equal to a strip 130 miles long by 5 miles wide. The yearly desolation of the hands of fire turning the southern part of the Province into a rocky desert of thousands of acres, even the soil has been destroyed by fire.

Save Ontario Forests
They're Yours

The average yearly number of forest fires in Ontario is about 1375. The vigilance of the Fire Rangers keep two-thirds of Ontario's forest fires down to an average size of less than five acres. But the others are big enough to raise the total average to 350 acres.

Forest fires in Ontario are destroying provincial assets of timber and pulp wood upon which the Province relies to help pay her share of Canada's War Debt. Forest fires destroy fish and game, decrease the regularity of stream flow, cause spring floods, land erosion and the crippling of water powers; turn revenue-producing areas into rock deserts.

Out of every 100 fires in Ontario's forests only three are caused by lightning, while ninety or more are due to man's carelessness.

One thousand acres are the chance of prevention. All they can hope to do is to see the smoke in time to prevent them from putting them out. They are a deadly menace beyond control.

The problem of adequate protection of Ontario's Forests is most entirely a moral one. The whole public of Ontario, the vast majority of whose fires are caused by human carelessness due to lack of civic responsibility. The tendency is to leave the responsibility to the Government for protecting forests from fire. The Government cannot protect the forests belonging to the people of Ontario unless the people of Ontario cooperate. Forestry needs your participation, your public spirit, your regard for the general welfare of Canada.
