to her work, and
that she had been
very successful in
her duties.

CAMPAIGN FOR FIRE PREVENTION IN CANADA BEGINS OCTOBER 9

A despatch from Ottawa says: Preventive Week, beginning on Saturday, October 9, and ending the following Saturday, has been appointed by the Minister of the Interior. It is made through a special order of the Canada Gazette. The Fire Prevention Week committee recommended to inspect houses and stores and other buildings to remove rubbish and to reduce fire hazards. It also recommends that municipal officials, fire departments, and hospitals should be inspected and any changes necessary to perfect safety. Fire drills for children and factory employees are recommended, and special instruction for teachers and the distribution of appropriate literature to pupils. Boy Scout leaders should give instructions to their troops as to the best means for co-operating with fire departments in the extinguishing as well as the prevention of fires. Regulations will be issued for the prevention of forest fires, to be studied by those in lumber camps, and by hunters and settlers. Regulations and laws respecting fire prevention will be given publicly by municipal officials and by public meetings or otherwise, the endeavor being made to impress upon citizens the national importance of safeguarding life and property from loss by fire.

PARLEYS REOPENED WITH IRISH LEADERS

Invited to Attend a Conference in London on October 11.

A despatch from London says: "The paralytic" is the view expressed in London and Dublin of the effect of a conference in London on October 11, which the Prime Minister invites the leaders of the Irish Home Rule movement to attend. It is an endeavor to settle the controversy.

Lord George makes as the note the effect of a conference in London on October 11, which the Prime Minister invites the leaders of the Irish Home Rule movement to attend. It is an endeavor to settle the controversy.

The various members of the British Cabinet are of opinion that there is nothing in the conference to prevent the Home Rule movement.

The Home Rule movement is understood that various members of the British Cabinet are of opinion that there is nothing in the conference to prevent the Home Rule movement.

The Home Rule movement is understood that various members of the British Cabinet are of opinion that there is nothing in the conference to prevent the Home Rule movement.

Birds Start Migration Early This Year

A despatch from La Conner, Washington, says: Migration of birds southward is starting early this year, and some of the smaller ones, not old enough to make the trip alone, are reported riding on the backs of cranes, loons and owls. At nightfall, when the larger birds settle down, their passengers look for accommodation elsewhere. Owls, it is said, have long been known to carry smaller birds southward on their backs.

Whipping and Deportation Sinn Fein Punishment

A despatch from Dublin says: The recent activity by the Republican police in Dublin, it now appears, was directed against a gang of criminals who were proving a society. Six men were captured and have been tried by a Sinn Fein court for attempted murder, robbery with violence and serious assault. Four pleaded guilty and confessed to wearing rubber shoes and carrying buttons and dummy revolvers. One of the victims was attacked with a hatchet and left dead.

NO MARKET FOR GRAIN SCREENINGS

Revenue Lost to Canadian Farmers Through Lack of Southern D. Mand.

A despatch from Port William, Ont., says: Giving up hope of local able to sell grain screenings, local elevators have commenced hauling their by-product out into Lake Superior and dumping it.

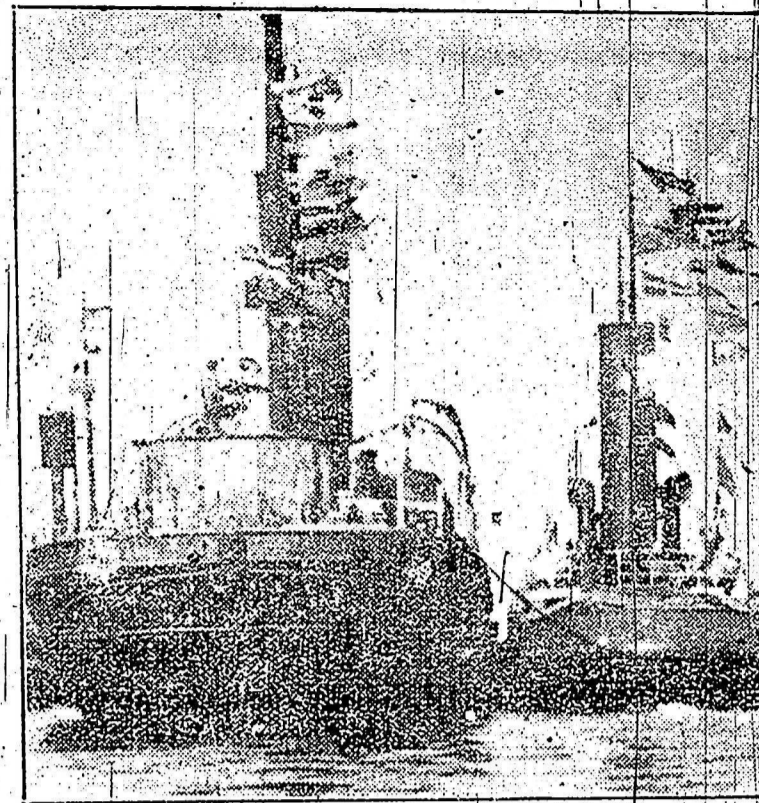

TREASURE CHEST LONG BURIED FOUND BY GERMAN SEARCHERS

A despatch from Berlin says: German searchers for pirate gold made the greatest find in his history. They dug up a chest containing gold, silver and jewels worth 20,000,000 marks (normally about \$5,000,000) which was buried by the pirate Stoerbeck in the marshes south of Ostervien in the marshes south of Ostervien.

The chest in which the treasure was found measured six by three feet, was thought to contain brass only, but tests showed that they were gold, and they have an art value of about 20,000,000 marks.

Germany since the year 1390 have been hunting for this treasure. According to German law the finders are entitled to 10 per cent, the property owner getting the rest. The owners have been negotiating with the Government, deploring that for patriotic reasons they want the treasures to remain in Germany.

It is said that the neighborhood will yield other treasure chests, because Stoerbeck is known to have buried other chests. The discovery makes a fact of what had become a national fairy story and folk-song.

THE "BRUSSELS" NOW A CATTLE BOAT
Captain Fryatt's famous steamship, which has been converted into a cattle boat and sails between Dublin and Preston, England.

SEED WHEAT FOR STARVING RUSSIA

Faith of Peasants Looks for Bountiful Harvest Next Year.

A despatch from Moscow says: "Surely God has punished Russia enough. I planted grain in the full faith that it would grant a rich harvest next year, though whether it will let me or another reap it I know not," said a peasant in Saratov Province to Mr. Webster, representative of the British Save-the-Children Fund, a few days ago.

The speech expresses the sentiment of hundreds of thousands of peasants in the famine area, for by a year's force the peasant possesses a month's seed. The Government got seed grain distributed before the famine was prevented. There was planted in Saratov Province 100,000 bushels of seed wheat in 1920, and the Government got seed grain distributed before the famine was prevented.

The remarkable success of the seed distribution augurs well for the prospects of Government food distribution, now beginning, which can use the same mechanism. The efficiency of the latter is vouched for by the Canadian trade delegate, Col. Mackie, who has just made a trip to the Volga.

"In 30 years of timber cruising in the Canadian Northwest, I had ample opportunity to study the best methods of transportation up country from the railway, with my companion, Mr. Wilgress, who speaks Russian fluently. I investigated just how this was being done along the railroad to Kazan and at various points in the Tatar Republic. Frankly, I do not see how it could have been improved."

Report Arctic Weather by Wireless

A despatch from London says: A staff of British weather experts will leave England within the next few days to take up posts at the weather observatory which has just been erected on the lonely island of Jan Mayen, 300 miles east of Greenland. Each day this group will send weather reports to the British Weather Office at three-hour intervals by wireless. Their service will enhance the weather service to such an extent that the British Weather Bureau will be able to give intelligence to mariners and aviators about weather conditions extending virtually around the world.

Five human heads must be held as trophies by the men of Formosa who would woo and win a wife.

Overtures for Peace Made by Greeks

A despatch from London says: The London Daily News Balkan correspondent states that he has learned on high authority that the Greeks are making approaches to Kemal Government for peace.

King Constantine, of Greece, is expected to confer with representatives of foreign powers in the hope of stabilizing the situation in Asia Minor as Mustapha Kemal is understood to decline to deal directly with the Greeks. The Greek financial situation is growing worse.

Workingmen's Classes

Announcement is made of a mass meeting of members and prospective members of the Workers' Educational Association in the Social Service Building of the University of Toronto on Tuesday evening, October 4th. The object is to arrange for classes during the winter season, to continue those formerly conducted, and to initiate new ones. Public speaking, trade union law and Marxian economics are proposed in addition to economics, international finance, psychology and logic, political philosophy, British history, English literature and composition.

Through these classes, for which the provincial university supplies most of the tutors and nearly all the funds, workers in any occupation have an opportunity to secure the advantages of higher education. Similar classes are conducted by the University of Toronto in Hamilton and in Ottawa. The Workers' Educational Association had last year its most successful season in Canada and hopes are entertained that the coming season will be even better. The arrangement is based on the one which has been so beneficial in Great Britain and furnishes another example of the varied type of work done for the community at large by the provincial university.

Canada From Coast to Coast

Victoria, B.C.—The new drydock under construction at Skinner's Cove, Esquimalt, for the Dominion of Canada will, when completed, be able to accommodate the largest vessel afloat. This dock will have a total length of 1,150 feet, a width of 120 feet on sill and of 135 feet on the coping level. The depth of the sill will be 40 feet. The caissons are to be of the ship floor type and will be made of steel. The dock will be constructed of concrete with the exception of the sills, copings, keel, block supports, etc., which will be of granite.

Edmonton, Alta.—What is believed to be the largest single shipment of cattle of the year from the Edmonton Stock Yards, comprising twenty cars containing 40,000 head of prime beef cattle, left here for Montreal, where they will be transferred to boats for shipment to Glasgow.

Regina, Sask.—Directors of the Municipal Life Insurance Association have fixed the rate of premium to be paid by farmers for the current year at twenty-five cents an acre on the net seeded acreage. Based on all claims received this levy practically means a five per cent rate. Claims amounted to \$1,068,001.

Winnipeg, Man.—Harvesting has begun of the potato crop on the Silver Heights Farm, once part of Lord Strathcona's estate of that name, and claimed to be the largest potato farm in the whole of Canada. Over three hundred acres are planted to potatoes and the yield is expected to be around 215 to 220 bushels per acre. A large patch of Irish Cobb's is also being yielded more than 100 bushels per acre. Shipments are being made to Kansas and Minnesota, as well as many Eastern Canadian cities.

Ottawa, Ont.—Gold to the value of \$8,194,129, representing 396,391 fine ounces, was produced in Canada during the first six months of the year, according to the official statement. This amount of gold represents 82 per cent of the amount mined during 1920. A feature of the market for gold is that all sales to the Royal Mint, Ottawa, are paid for in New York funds.

Toronto, Ontario.—The week of November 21 to 27th will be known as Canadian Book Week for the purpose of demonstrating to the Canadian people the rapid growth and the two Canadian literature in recent years.

Weekly Market Report

Toronto.	Gal., \$2.50; per 5 imp. gal., \$2.35.
Manitoba wheat—No. 1 Northern, \$1.46; nominal; No. 2 Northern, \$1.43 1/2; nominal; No. 3, \$1.39, nominal.	Maple sugar, lb., 19 to 22c.
Manitoba oats—No. 2 CW, 53 1/2c; No. 3 CW, 51c; extra No. 1 feed, 51c; No. 2 feed, 48c.	Honey—60-30-lb. tins, 14 1/2 to 15c; 30-15-lb. tins, 14 to 14 1/2c; Ontario comb honey, per lb., \$3.75 to \$4.50.
Manitoba barley—No. 3 CW, 75c, nominal.	Potatoes—Per 90-lb. bag, \$1.75 to \$1.90.
All the above track Bay ports.	Smoked meats—Hams, med., 35 to 37c; heavy, 26 to 28c; cook, 55 to 56c; rolls, 27 to 28c; cottage rolls, 30 to 31c; breakfast bacon, 33 to 38c; special brand breakfast bacon, 45 to 47c; backs, boneless, 42 to 43c.

Light poultry—Spring chickens; 20 to 28c; roosters, 16c; fowl, 20 to 27c; ducklings, 25c; turkeys, 60c.	
Margarine—22 to 24c.	
Eggs—No. 1, 44 to 45c; selects, 50 to 52c; cartons, 52 to 55c.	
Beans—Can., hand-picked, bushel, \$4.25 to \$4.50; primes, \$3.75 to \$4.	
Maple products—Syrap, per imp.	

The Folly of Fret.

That careful, delightful book, "The Folly of Fret," by Henry Adams, is a phrase, "The Folly of Fret," is better than the usual exhortations have been preached. The uselessness of worry, the recipients have been preached, three delivered, many millions uttered, on that theme, the end of applied science in our is toward the reduction of waste and the elimination of waste, a big part of fret and worry.

Worry about the human mind. We imagine that all sorts of things are sure to happen to us. But thoughts ought to be kept back—and they are. Fretted by worry about losing a position in business or our standing in society, we would be less exact for ourselves. If we would spend the energy expended in trying to do our work still better, to serve our country, the community we live in, and to discharge the various delicate offices of friendship with our neighbors, we would be less exact for ourselves.

Worry is quite another matter from proper carefulness, that with a position and looks all round is object of acceptance.

A man who investigates before he asks questions before deciding, who makes no jump in the dark, is not a worry man. He is a man of "fret," merely leads him in his circles, like a tethered dog. All his fuss and clamor is nothing but an ecstasy of motion and emotion.

Man-power is too precious to be thrown away in these gyrations that are the pantomime of fret.

Give us more of the calm, big men who plan and then proceed. They do not fret in a fretful and a fever. They make up their minds and they serve their country. They do not so good and so contented, they do everything in a quiet way. They do not fret. They do not fret. They do not fret.

But the quality of the work is not the quantity of the work. The quality of the work is not the quantity of the work. The quality of the work is not the quantity of the work.

A Promising Outlook

careful study of the conditions of the country. The development of the spirit and leadership ability is due to a combination of influences. Perhaps the most direct institution for their promotion is the boys' and girls' club work. Then there are the better rural schools, more capable teachers, live country churches, active farmers' clubs and Women's Institutes, all co-operating to lead the junior farmers to enjoy the blessings and the advantages of a full life. Therefore, the national outlook is dependent upon our rural youth the future is certainly most promising.

Cooking Heaters.

Four electric room heaters of the latest type have been mounted by an English inventor on arms extending from a base, each separately adjustable to angle, it being possible in turn to so cooking can be done on them.
