

## A DEPOSIT ACCOUNT Creates Credit Standing

The pages of our deposit ledger are more than a record of the deposits and withdrawals of our clients; to them we read something of the character and ability of the men and women who are our depositors.

Many a customer, through the introduction furnished by such an account, has created a credit standing with the Bank that has developed into one of his most valuable assets.

From a connection with us now, and later on, should you find yourself in need of assistance, you can come to us with your standing already largely established.

One important feature of handling live stock is the finding of the right market.

The profit side of producing live stock is found in the marketing end.

Getting panniky has resulted in the sale at comparatively low prices of many cattle at prices much below the cost of production.
