Women of Canada

*I ask from all the people of Canada an earnest review of the real issue before Canada to-day. I ask from men and women a calm, thoughtful consideration of serious public questions; and, so far as I am concerned myself, I ask not favor but fairness. —ARTHUR MEIGHEN.

WOMEN OF CANADA, the coming General Election will be one of the most momentous in Canadian history, and Arthur Meighen asks YOU to give the issue fair, unbiassed consideration.

Women and men alike are called upon to decide whether political, industrial and economic stability is to be replaced by class rule, political and industrial chaos, and possible economic bankruptcy.

The facts are clear, and every Canadian woman will do her own thinking. She will not be misled by others. She will not blindly follow family political precedent, neither will she be carried away by the false theories or empty "isms" of theorists and extremists. Every woman will arrive at a personal decision by the application of practical common sense.

The great issue is the Tariff and here are briefly the facts.

The present Canadian Tariff, so far as it affects the necessities of life, is a very moderate one. It is simply a tariff maintained to keep Canadian factories in Canada, employing a steadily-increasing volume of Canadian labor and developing Canadian resources.

Meighen stands firm for the continuance of a reasonable tariff. It is now even more imperative than in the past. All other important countries are retaining or increasing their tariffs in order that they may hold their home markets for their own people.

Under Cramer's Free Trade policy Canada would be swamped with foreign goods, principally from the United States. Canadian industry would be ruined, thousands of men and women would be out of work with all the hardships to themselves and their children to be met. The farmer's great home market would be seriously affected, taxes would be increased, and Canadian working men would have to go to the United States for employment.

While King's Tariff policy is wobbly it nevertheless tends toward the destruction of the Tariff and would bring with it practically the same results.

MEIGHEN'S POLICY EVERYBODY KNOWS. It is the only means whereby confidence may be maintained and employment given to all classes of the people.

The foregoing is a plain statement of logical conclusions arrived at from the facts. Think the matter over carefully "without favor but with fairness".

Make your own decision, stand by it unmoved and be sure to exercise your vote.
