Live Stock Breeders

One important feature of handling live stock is finding of the right market.

The profit side of producing live stock is found in the marketing end.

Getting pannifly has resulted in the sale at country points of many cattle at prices much below the market value.

Regardless of how your stock is handled, you pay the freight, the yard, and selling charges.

By shipping your own stock you get the market on a competitive scale.

Pleasantville, N.Y.—Four years ago I was a very sick woman. The doctor said I had pneumonia. He kept me in bed for five weeks and I lay there so weak that I could hardly get about. A dear friend advised me to Dr. Pierce's remedies and I did so. After taking a bottle of the Golden Medical Discovery and one of the Favorite Prescription I found I was getting so much stronger that I continued using them, together with Dr. Pierce's Pleasant Pellets, until I fully recovered my strength.

When discovered flames were bursting

The community has suffered the loss of a thoroughly good citizen. He was a prominent farmer and as such was a valued member of the Township Agricultural Society, nor were his services local in this line, as he was for some time a director of the East Grey Agricultural Society of Flesherton. He was a life member of the U.C.O. In the church he has been ever kind and always alive to his duties as a member. In 1878 he was
