

QUEENSTON-CHIPPAWA POWER PLANT SET IN MOTION BY PREMIER DRURY

Largest Electric Power Plant in the World Formally Opened by the Provincial Premier and Miss Marion Beck in the Presence of Thousands of Delegates from Various Municipalities.

A despatch from Queenston says:— Nearly five years of skilled engineering, night and day labor, and overwhelming financial anxiety were rewarded with success on Wednesday when power was officially turned on at the Queenston-Chippawa development. Sir Adam Beck, on whose shoulders the tremendous weight of responsibility has rested during the entire anxious period, presided at the ceremony, and received ovations from over 1,000 municipal representatives such as few Canadian public works have ever been accorded.

With glowing faces and a "big" smile, Sir Adam Beck, Premier of Ontario, presided at the opening of the power plant. The ceremony was held in the presence of thousands of delegates from various municipalities. The plant is the largest in the world, with a capacity of 55,000 horse-power.

Plans to Increase Trade With Canada

A despatch from London says:— Southampton, which will become familiar to traveling Canadians as the new base for the Canadian Pacific and Cunard steamship services, has decided to improve its port at a cost of thousands of pounds. Negotiations are proceeding for the purchase of the world's largest floating dock, and a scheme has been approved which will allow the largest Cunard and White Star liners to approach and leave the docks without difficulty. Furness, Withy and Company, Limited, according to the London press, are inaugurating a new service to the Pacific coast of Canada.

Belgians Alter Name of Celebrated Battlefield
A despatch from Paris says:— Possession of a concession to French soldiers to alter the name of Waterloo, the battle which gave Belgium its name, will have more need than ever of a name to show them where Napoleon's army was defeated. The name of Waterloo will be changed to "Waterloo de la Victoire" while other well-known names will also be renamed.

KING GEORGE WILL RIDE WITH PRINCESS MARY ON HER WEDDING DAY

A reception is planned at St. James's Palace, with more than two thousand invited guests. The young couple will pass part of their honeymoon at the beautiful Villa Medicea near Florence, which has been chosen by Lady Sibley Scott, to whom they will travel in France and Belgium and possibly in Switzerland. The most exquisite textures will be used in the Princess's wedding dress, which already has been placed in charge of a one-time war service worker. Work has been begun on it in the little town of Braintree, Essex. The romance surrounding the details of the dress will make it truly a poem in silk. The wedding ring will be made of British gold.

The Princess is often seen nowadays driving and shopping with Viscount Lascelles. She is more popular than ever with the people.

PRINCESS MARY, ONLY DAUGHTER OF HIS MAJESTY KING GEORGE V. Whose marriage to Viscount Lascelles will take place in February. The picture at the left shows the Princess in the uniform of a V.A.D. nurse; the centre as she is to-day, and at the right as a girl of fifteen. Below is her autograph.

EFFORTS TO CUT SUBMARINE TONNAGE THWARTED BY FRANCE

France Asks for 330,000 Tons of Auxiliaries and for the Same Strength in Undersea Craft as Britain and United States—Mr. Balfour Points Out the Menace to Britain.

A despatch from Washington says:—The effort to reduce and limit submarine and auxiliary naval tonnage met with complete failure on Wednesday in a session of the International Conference Committee on Armament. The session was marked by sensational interchanges between Mr. Balfour and M. Sarraut concerning the naval preparative of Great Britain and France and the possibility of war between those two nations. France insisted on an allowance of 90,000 tons of submarines, an amount equal to the maximum Mr. Hughes originally proposed for the United States and Great Britain, and three times the present French tonnage, and asked for 330,000 tons of auxiliary craft.

Mr. Balfour in point but firm terms immediately charged that the French contemplated using submarines illegitimately against commerce, pronounced the French naval building plan a menace to Great Britain, and declared that under the circumstances Britain could agree to no limit on the construction of cruisers, destroyers and other anti-submarine craft. M. Sarraut denied that submarines were to be used illegitimately, protested that a large submarine tonnage was needed to protect France and her colonies, and expressed surprise that British defence plans should arouse French fears of aggression, with Britain allowed a capital ship tonnage greater than that of France and Italy combined.

Mr. Balfour retired with the assurance that, in the event of war between Great Britain and France, Britain would be able to maintain its superiority in the sea.

Keeping the Nation Strong

A close study of any particular rural locality would undoubtedly show a surprising set of influences flowing out to every phase of national life. The business, social and moral contribution made by the thousands of rural communities over the country to our nation has been such that under no consideration can we as a people afford to permit the source of supply to dry up. This means that rural life must be watched with the greatest solicitude. The nation's human seed-bed ought not to be allowed in any degree to lose its richness, and the life of our farm youth should have the eye of every statesman, and of every public-spirited person upon it to the end that the full unfolding of the lives of the rising generation may be accomplished both for individual and national advantage. Rural communities need a satisfying institutional life. There is required something that will give the boys and girls of the farm a broad view of the interesting life in which they live. In hundreds of communities in Ontario the boys' and girls' club work is accomplishing this very thing in quite a satisfactory manner. We would that there was developed a sufficient leadership that every last farm boy and girl in the province might have brought into their lives such inspiration and information as comes from association in the most progressive of these local boys' and girls' organizations.

Prince Opens Victorian Memorial in Calcutta

A despatch from Calcutta says:— Amid scenes of great splendor and in the presence of enthusiastic crowds, the Prince of Wales opened the Victorian Memorial, dedicated to the Queen-Empress Victoria, whose memory is held in the highest esteem throughout India. The building is in the form of a vast marble palace and is required fifteen years to erect it. The building comprises a museum, commemorative of India's glory. It contains portraits of the old Emperors of Delhi and of famous men who labored for India during the Victorian era.

Cucumbers were originally tropical vegetables.

PRINCE'S INDIAN TOUR IS A SUCCESS

Much Cause for Congratulation in Opinion of Official Circles in London.

A despatch from London says:— The reception which Calcutta has accorded to the Prince of Wales has been watched here with keen interest, because it has been recognized in official circles that it would be the supreme test of the success of his tour. The reports that have come in have relieved anxiety greatly and have made it clear that the popularity of the Prince is gaining a victory over the fires of discontent. In the last few weeks, it is pointed out, he has visited two capitals—Patna, the capital of Bihar and Orissa, and Calcutta, capital of Bengal. In both Calcutta he proclaimed a "happy" and in both on the day of the Prince's arrival he achieved a partial success, but both in Patna and Calcutta, after the first day of the Royal visit the natives refused to be bound by the orders of the extremists and took part in the official program with all the enthusiasm that could be expected of them. This is due no doubt, partly to the Prince's extraordinary personality, and partly to the love the natives of India always display for their ruler.

Meetings Throughout Ireland to Consider Treaty

A despatch from Dublin says:— Special meetings continue to be held to consider the Irish treaty. The Cavan Urban Council has adopted a resolution setting forth high appreciation of the terms of the treaty, and, recognizing the great services rendered by the members of the Dail Eireann opposing the treaty, declaring: "We manfully request them for the sake of our dear country to bury their differences and to stand with Galabin and McKeown for ratification."

Turn German War Plants to Peaceful Pursuits

A despatch from Paris says:—The Allied Council of Ambassadors has decided to place in the hands of General Nollet, head of the Disarmament Commission, the task of converting the Deutsche Werke, the group of plants used during the war for the manufacturing of German armaments, into workshops for the manufacture of industrial machinery. The plan of conversion will call for the employment of 20,000 workers who were employed in the manufacture of war material.
