Killing Hydro

(London Advertiser)
Toronto interests seek to establish that Premier Drury is out to smash, wreck and bury the whole hydro scheme in Ontario.

The commission he has chosen to investigate the expenditure on the Chippewa undertaking has been condemned before it ever starts operation.

This commission is painted as nothing short of a crowd of assassins waiting to get their hands on hydro.

The Drury Government could not wreck the hydro proposition, even if it had the notion and desire to do so.

The hydro power business is an established fact. It is doing business with hundreds of industrial concerns.

It has become a habit for some of the Toronto Drury haters to shout "He's killing Hydro" every time the Premier dares to raise a hand or ask a question that seems to cast any reflection on the management of the development schemes, or the amount of money that it is proposed still to spend.

It is not possible to mislead the people of Ontario on this "killing hydro" propaganda. No person wants to kill it. The wild men in the case are all being brought in and set up by the Drury hangers.
