

Save Unnecessary Expense in Telephoning

"He's not in his office just now!"

How often have you put in a call for — say Mr. Brown of the Robinson Machine Company — and when connection was made, learned that he was out?

Because you asked for Mr. Brown, it cost you — because of the extra service we rendered — about 20% more than if you had asked simply for the Robinson Machine Company.

The majority of Long Distance users find that if they put in a call for a firm — not for an individual — at the lower Station-to-Station rate, they can always get in touch at once with the particular person they prefer to talk with, or with a clerk who will answer the purpose.

Our gain will come when you appreciate the speed and economy of Station-to-Station service. After 8:30 P.M. the evening rate on Station-to-Station calls is only about one-half the day rate.

Every Bell Telephone is a Long Distance Station.

Could Not Eat

Constipation is caused by a torpid condition of the liver. Douging with salts, castor-oil, etc., to move the bowels, cannot afford more than temporary relief.

If you are to rid yourself of this ailment and the scores of annoying symptoms and diseases which come in its wake, it is necessary to get the liver right by such treatment as is suggested in this letter:

Mrs. Alvin Richards, R. R. No. 1, Seely's Bay, Ont., writes: "For two years I was afflicted with indigestion, and in the morning when I got up my breath was bad. I had a poor appetite, and just felt like eating certain foods. I used many different medicines as a laxative without benefit, and the doctor's medicine did not help me at all. Finally I tried Dr. Chase's Kidney-Liver Pills, and found them better than anything I had ever tried. I can highly recommend them to anyone troubled with constipation or kidney troubles."

CAMPING

ONTARIO'S forest wealth is dwindling. Every year forest fires take disastrous toll. Careless campers cause eleven cent. of Ontario's forest fires. Last summer 212 cases of forest fires were reported. This summer be careful.

Save Ontario's Forests They're Yours

When you build your fire to make tea, fry bacon or add cheer to pipe and story-telling time, use a woodsman's precautions.

The real woodsman builds his fire on an old fireplace, if there be one handy. Failing that he scrapes away all litter, moss and fibrous rotted wood down to the mineral soil, or the bare rock, and preferably some place close to the water. He knows that if fire gets into the moss or the upper woody layer of forest soil, or in a half-rotted log or stump, it "holds over," burns away unnoticed, underneath, and unless followed up and carefully put out is liable to break into a flame later. He knows how hard it is to put such deep-smouldering fire out. So he makes his cooking fire surprisingly small and compact, and chooses a spot that is absolutely safe.

It is a mark of his finished woodsmanship how thoroughly he drowns his fire out with plenty of water when he is through with it. Save the forests. You may want to camp again.

DON'T

- DON'T take chances with fire in Ontario's forests!
- DON'T throw away cigarette or cigar butts, pipe "heels" or burnt matches until you are dead sure they are out.
- DON'T neglect to drown out your fire with lots of water.
- DON'T build your camp fire against a rotten log or stump — not in windy places; not near moss patches; not near the base of a tree.
- Build it in a former fireplace, or on a flat rock, or on a spot cleared down to the true soil below, or by the edge of the water.
- DON'T forget that the upper layer of ground in the forest consists of particularly rotted wood which will burn.
