Save Ontario's Forests They're Yours. DON'T take any chances with fire in the forest. DON'T throw away cigarette or cigar butts, "bits" or burnt matches until you are dead sure they are out. DON'T neglect to drown out your camp fire thoroughly with lots of water. Stir up the ashes and throw on more water. DON'T build your camp fire against a rotten log or stump—nor on high exposed windy points; nor near moss patches; nor at the base of a tree. Build it in a former fire place, if any at hand, or on a flat rock, or on a spot cleared down to the true soil below, preferably by the edge of the water. DON'T forget that the upper layer of ground in the forest consists of partially rotted wood which holds fire and slowly burns. The only real soil which will not burn is beneath.
