2017 1.0. decently there arrived at Wain-William Park a strange alien animal, a yas, ball from the chill and windy plalega of Central Asia. The 6,000 mile him left the animal in good condition; and it came to a region much similar in e, mate to its own. The yak is the toologically connecting link between tumalo and domestic cattle, and mates readily with cattle, so it is hoped will Also with the buffalo. Thus it is hoped to evolve another type in the near future, or types. The yak is a hardy ranger. equal if not superior to the buffalo. It is distinguished by its long hair and horselike tail. Usually black in color, some are brown, & white. It will stand the most extreme cold and is remarkably free from disease. The meat is of finer grain than that of cat

OVERWORKED NERVES

is Through the Blood.

The early stages of nervous debility are noted by restlessness and irritability in which the victims seem to be oppressed by their nerves. As the trouble advances, common symptoms are a tired feeling; weakness in the knees and ankles; headaches, backaches and sleeplessness. The matter requires immediate attention for nothing but suitable treatment will prevent a complete breakdown:

The nervous system governs the whole body, controlling heart, lungs, digestion and brain, so that it is not surprising that nervous disturbances sportmen on the North cause acute distress. For troubles of this kind Dr. William's Pink Pills succeed when other treatment fails, for the buffalo as a big game, these pills make new blood, enriched passed forever! No wild with the elements on which the nerves but the truth; a possibility, thrive, and in this way reach the root of the trouble. In proof of this is the the is not only great pro- statement of Mrs. Dockerill, Stratarke herds may in the near ford, Ont., who says:-"My daughter, the otherwise useless Matilda, was suffering from nervous and of northwestern Cana- debility, and the usual remedies did and Mackenzie territory, not seem to help her.
