

AGREEMENT REACHED BETWEEN COAL OPERATORS AND MINERS IN FOUR STATES

A despatch from Cleveland, O., says:—Coal operators represented here and miners of Ohio, Indiana, Illinois and Western Pennsylvania on Thursday agreed to make a contract permitting immediate resumption of soft coal mining in the central competitive field, named a general committee to work out the details of the contract, and adjourned subject to call on the completion of the committee's work.

According to John L. Lewis, the making of an agreement with the operators represented here means that within the week 75 per cent. of the 600,000 men who have been on strike will be back at work, leaving the only idle properties those included in fields of Ohio, 15 per cent. of Western Pennsylvania, 8 per cent. of Indiana and 2 per cent. of Illinois.

In addition to this, a considerable tonnage of coal is being represented here, but not actually taking part in the conference, is understood to be willing to sign contract when completed, while a large part of Illinois and Indiana, officially against any settlement that does not involve an agreement to arbitrate everything on the expiration of the contract, is declared to be wavering.

British Reply to Poincare's Proposals

A despatch from Paris says:—In a note handed to the allied delegations at London on Thursday night, according to a Havas despatch from London, the British definitely outlined their attitude with regard to Premier Poincare's proposals. The plan for a 26 per cent. tax on German exports, says the despatch, is accepted by the British, as are also the proposals for seizure of the customs and the control of mines and forests, but the latter condition is agreed to only conditionally upon the Germans continuing recalcitrant and maintaining their opposition to the new customs lines.

KING AND QUEEN VIEW THE MAJESTIC

Wonders of World's Largest Ship Amaze Royal Visitors.

A despatch from London says:—"Why does any one want to travel first class?" That was the remark made by Queen Mary after she had inspected the great kitchens, bakeries and sculleries on the White Star liner Majestic at Cowes. With the King, the Duke of Connaught and the Prince George she passed two hours in the world's largest ship. The Queen was most interested in the domestic arrangements and questioned the cooks, stewards and stewardesses. While she was amazed at the sweep of the first class public rooms she took chief interest in the second class and stateroom quarters, whose excellence inspired her remark. The King displayed an intimate knowledge of the technical side of the ship's construction in detail with the Commodore Hayes and officers of the company. A lifeboat was lowered in three minutes, and it was explained how the ship's entire passenger capacity of 4,000 people could be cleared in twenty-five minutes.

Mrs. Winifred Elliott, a swimming instructor, won the congratulations of the Queen when her diving into the ship's pool. The King had a long talk with a beribboned gaiter man named Curran.

Prince George insisted on riding the electrically driven jumping horses in the gymnasium and every one was interested that the party overstay its schedule by half an hour. Later in the day Princess Beatrice and other nobles from Cowes inspected the White Star King and Queen returned to Buckingham Palace in the evening. They were heartily cheered by a big crowd at Waterloo station.

CABLE ENDS SHOULD LAND ON ENGLISH SOIL, SAY LONDON MERCHANTS

A despatch from London says:—was an integral part of the United Kingdom and no risk existed of inter-ference by marauding guerrillas or by Western Union and the Canadian cable company in Ireland and, as to the cable ends of the Gifford wireless station, have seriously inconvenienced big financial houses here having large daily transactions with the United States.

There is a widespread demand that these cable ends should be landed in England as soon as possible. This demand is voiced in the Daily Mail which says that when these cables were landed in Ireland that country

NATIONAL TROOPS OCCUPY CORK; FIRST PHASE OF REBELLION NEARS END

A despatch from Dublin says:—The National forces entered the city of Cork on Thursday, according to an official announcement. Patrick street, the Victoria Hotel, the military barracks and the newspaper offices are aflame, following dynamite explosions which blew up many buildings.

A despatch from London says:—London expert opinion in regard to the progress of the civil war in Ireland is that the first phase in the suppression of rebels—the phase of formally organized warfare—is now nearing its close.

The attack from the sea in Cork County and the evacuation of Cork city may well prove decisive, for that success is one which, if properly pursued, should soon end the existence of the Republican army as an organized force capable of holding the field.

The military position will be appreciated if it is remembered that the irregulars had absolute control of the whole County of Cork, with Kerry on the west and part of the County of Waterford on the east. North of this lay the fighting zone, which may be called the front line, and along this the Government troops with slow but steady pressure have been pushing northward.

The capture of positions at Aboyne and Drumcollogher brings them into Cork County at its north-western end, while they are evidently attacking near Clonmel, about 20 miles from its northeastern end.

The Provisional Government's success at Cork must make the whole resistance on the principal front hopeless. It takes the enemy in the rear at its geographical, political and military centre. The coup has been carried out by a resolute young officer, Major-General Dalton, who distinguished himself in the great war, and is now turning his military experience to account.

EVEREST CLIMBERS SET FINE EXAMPLE

Most Valuable Result of Expedition is Raising Standard of Human Achievement.

A despatch from London says:—"Mountaineering proper is not necessarily rashness, but a question of endurance, and of courage, of strength and steadiness, and of a feeling for nature and her most hidden beauties, which are often awe inspiring, but for that reason the more sublime, and, to a contemplative spirit, the more suggestive."

Sir Francis Younghusband, speaking before the Royal Geographical Society on the Mount Everest expedition, used the foregoing to express the sentiment which has animated all those connected with the expedition, and then said it was written thirty-three years ago by a Father Ruffin, who Pope Pius XI.

After describing what the expedition had accomplished Sir Francis said: "The experience gained this year shows that skilled mountaineers are able to take these unskilled in high altitudes. Geoffrey Bruce had never climbed a snow and ice mountain before. Yet under Finch's skilled leadership he was able to attain a height of 27,300 feet. And the Sherpa porters, though they were practically untrained in snow and ice work, were able, under Gen. Bruce's stimulating influence, to carry loads up to 25,500 feet, some of them making the journey four times, and so earning the unstinted praise of the best mountaineers."

"By careful organization and combination of effort, using experience to guide inexperience, and by the display of indomitable pluck on the part of the highest climbers, the expedition at a

bound brought the record up from 24,600 feet to 27,300 feet and thus left only 1,700 feet to be climbed before the crowning summit is reached.

"The standard of human achievement has thereby been sensibly raised. And many another traveler and many another struggler upward in every walk of life and in every country will be inspired and heartened in remembering what Finch and Mallory, Somervell, Norton and Bruce have so recently accomplished on Mount Everest. And this, to my mind, is incomparably the most valuable result of the expedition, and a result which makes their efforts in the highest degree worth while."

Moscow Citizens Dependent on Government Rations

A despatch from Berlin says:—Two-thirds of the inhabitants of Moscow—about 700,000 out of the population of 1,100,000—are still dependent upon Government rations.

The Soviet Government, through an organization known as the Central Council, is making an effort to meet the food shortage and claims to have made great strides toward keeping down the cost of food. The co-operative maintains twenty-five purchasing agencies in the provinces and also controls a number of factories engaged in the manufacture of food-stuffs.

In the distribution of bread the co-operative claims to issue 125 pounds a month to workers, 100 pounds to teachers and doctors, 90 pounds to government employees and 35 pounds to children and invalids.

Winnipeg, Man.—Wheat is being cut on Fred Role's farm, eight miles southwest of Winnipeg, and also in the vicinity of Miami, southwest of Winnipeg. These operations are first to be reported for the 1922 wheat harvesting season in Western Canada.

WHEAT CROP OF CANADA, 1922, ESTIMATED AT 320,968,000 BUSHELS

Bureau of Statistics Estimates Show Big Yield of Oats, While Barley, Rye and Hay Also Reach Huge Figures—Potato Crop Reported Good.

A despatch from Ottawa says:—Canada's wheat crop this year is estimated at 320,968,000 bushels, or slightly more than twenty million bushels larger than the final estimate of last year's crop, by the Dominion Bureau of Statistics. This estimate is based on conditions prevailing throughout Canada at the end of last month, and is arrived at by compiling data received from crop correspondents of the Department. The estimates of the yield of oats is 509,753,000 bushels as compared with 426,232,000 bushels last year, and of barley, 64,881,000 bushels, as against 69,709,100 bushels in 1921. It is estimated that the yield of rye will be 37,848,000 bushels, as compared with 21,455,260 last year, and flaxseed, 4,830,000 bushels in comparison with 4,111,800 bushels in 1921.

The estimated yield of potatoes, 102,974,000 bushels, is smaller than last year's final estimate, which was 107,345,000 bushels. The average yield per acre of Fall wheat is estimated to be 22½ bushels as against 22¼ bushels last year. The total yield of hay and clover is estimated at 15,545,000 tons, which is the largest on record with the exception of that for 1916, when the yield was 16,343,000 tons. Last year the total yield was only 11,366,100 tons. Of alfalfa (first cutting) the total yield is 483,000 tons as against 602,200 tons in 1921.

Conditions throughout Eastern Canada continue to be favorable, says the report. In the Prairie Provinces good rains have fallen throughout Manitoba and prospects in this province are favorable. In Saskatchewan the crops in the southern districts are generally excellent, but in the central and northern districts they have suffered considerably from drought and the yields have fallen throughout Manitoba and prospects in this province are favorable. In Saskatchewan the crops in the southern districts are generally excellent, but in the central and northern districts they have suffered considerably from drought and the yields have fallen throughout Manitoba and prospects in this province are favorable.

For the three Prairie Provinces the forecast in bushels is as follows, figures in brackets indicating the final estimated yields of 1921: Wheat, 297,781,000 (280,038,000); rye, 35,102,974 (19,109,700); flaxseed, 4,360,000 (3,945,700). For Manitoba the figures are: Wheat, 33,444,107 (30,954,000); oats, 73,028,000 (49,442,500); barley, 24,534,000 (19,681,214) bushels last year. The total yield of hay and clover is estimated at 15,545,000 tons, which is the largest on record with the exception of that for 1916, when the yield was 16,343,000 tons. Last year the total yield was only 11,366,100 tons. Of alfalfa (first cutting) the total yield is 483,000 tons as against 602,200 tons in 1921.

Conditions throughout Eastern Canada continue to be favorable, says the

CANADIAN NEWS ITEMS

Charlottetown, P.E.I.—Farmers in this province are organizing receiving stations for fowl and other products and are advertising receiving dates preparatory to forwarding carloads of products from the different centres to Montreal, Boston and New York.

Halifax, N.S.—A record run of salmon has entered the Margaree river this season. The angling far exceeds that of recent years, and it is reported that 100 salmon were taken on the fly early this month from a comparatively small stretch of the river. A good run of salmon almost invariably ascends the Margaree with the beginning of the autumn rains towards the beginning of the spawning season. This year the water remains high and steady throughout the whole spring season. St. John, N.B.—Prospects are excellent for a good apple crop in the province of New Brunswick this year, according to the provincial horticulturist, who has just completed an inspection trip through the orchard districts. Early apples will be a beautiful crop. Quebec, Que.—Twenty-five of the sixty members of the British House of Lords and Commons have already accepted the invitation of the Montreal Board of Trade to be its guests on a trip across Canada to celebrate the hundredth anniversary of the organization. Accommodation has been secured for one hundred members of the Board of Trade. The idea of the Board is to contribute to the interests of the Dominion and Empire by affording members of the Imperial Parliament a means of seeing Canada and meeting representative Canadians.

Windsor, Ont.—Dodge Brothers, automobile manufacturers, Detroit, have purchased a factory site in Windsor and will erect a plant to care for their Canadian trade and possibly their export trade. There is seven and a half acres in the site, which is particularly well adapted for manufacturing and shipping.

Regina, Sask.—The famous Manitoba ranch of 100,000 acres of grazing lands, in the western part of the province, is being acquired by the Provincial Government for community grazing. Representations are now being made to the provincial authorities to place a superintendent in charge of the ranch with a number of cowboys and that a charge of 50 cents a head per month be imposed on all cattle pastured up to about 6,000 head.

Edmonton, Alta.—The Federal Government has endorsed a plan of \$50,000 to the Province of Alberta "for the purpose of aiding and advancing the farming industry by instruction in agriculture." The payment will be made from the revenue fund of Canada for the year ending March 31, 1923, and under the authority of the Agricultural Instruction Act.

5,000 Lives Lost in Chinese Typhoon

A despatch from Hongkong says:—Five thousand persons are believed to have lost their lives in a typhoon that swept over Swatow, 250 miles north of here, on Wednesday night. Dead bodies are floating in the harbor amid the wreckage and nearly every house in the city was damaged. The flood following the wind drove all the inhabitants from their homes.

Warehouses were demolished by the storm and their contents lost or extensively damaged. Two British steamers were swept ashore and their crews, it is believed, will be lost for pirates before they can be salvaged.

Swatow is a port of 50,000 to 60,000 inhabitants at the mouth of the River Han, near the eastern border of the province of Kwang-tung. It is the port for the city of Chao-an-Hsien, twenty-five miles inland.

Personal Liability for Fire Bill Drafted

A despatch from Vancouver says:—A draft of the proposed personal liability for fire bill was read and endorsed at the annual meeting of the Association of Canadian Fire Marshals here on Thursday.

This Act, which will come into force 60 days after receiving royal assent, will be adopted by every province in the Dominion. The purpose of the Act is to enable fire departments to recover the cost of extinguishing fires from persons, who, through criminal negligence, are responsible.
