How Clothing and Furnishing sales are increased by Long Distance

Some quotations from recent reports.

"Long Distance brought us so much business that we expect to enlarge our factory."

"Tried Station-to-Station service and find it very satisfactory for selling goods to distant points."

"Thanks to Long Distance, we are able to carry on without a large stock of goods. We call up wholesalers for our needs."

"We call up customers in outside towns and make appointments for try-ons."

A well-known firm of Ottawa retailers writes "We often use Long Distance in preference to writing."

We can tell you how to apply Long Distance to almost any business.

BATTERIES WINTER STORAGE

WHEN YOUR car is laid up for the winter, store your battery with us. A battery that is to remain out of use for over two months should be taken to the service station and placed in "Winter Storage." An "idle" battery is constantly discharging itself. Better play safe and have your battery with us when the car's first load up.

If the battery is in an undercharged condition, this will be detected and remedied in the tests and inspection which we make on the battery when it is brought to us for winter storage. You can readily see how this will not only save you money, but a whole lot of trouble as well, by catching the slightest advanced condition of your battery before it can grow into a big and serious one, while the battery is standing idle through the winter months.

We store all makes of batteries. For a nominal charge, little more than the cost of a freshening charge, we will safeguard your battery's health and return it to you, fully charged and ready for service when you start again in the spring.

Have your tires fitted up for next season during the slack winter months. We do it right.
