

PRINCE ANDREW OF GREECE TO BE COURT-MARTIALED AT ATHENS

Britain Severed Diplomatic Relations With Greece as a Protest Against the Execution of Ministers Whose Policy in Anatolian War Proved a Failure.

A despatch from Athens says— who commanded an army corps at the time of the Sakaria operations, begins next week.

A despatch from London says— The British are much disturbed over the further Greek arrests, indicating that the Greeks are still unrepentant for their barbarous execution recently of former Ministers, and the British are particularly worried during the campaign to the Revolutionary Committee, which in conjunction with the Greek Government, will make arrangements for his trial.

The following official statement has been issued:

General Doumianis, former Chief of the General Staff, and General Valerakis, former Chief of Staff, and Asa Minor, have been arrested, and a warrant has been issued for the arrest of General Papoulas, former Commander-in-Chief of the army in the trial of Prince Andrew (brother of former King Constantine).

Emperor Constantine of Greece.

Imperial Conference Called for Next Year

A despatch from London says:—In the matter of an Imperial conference, Premier Bonar Law, in the House of Commons on Thursday, expressed the hope that it would be found convenient for all concerned to hold a meeting next year. He said invitations had not yet been issued. Regarding the time of the gathering, he felt that the date must depend partly on whether it is decided to hold an Imperial economic conference distinct from and before the regular Imperial conference.

CONSTANTINE TO RESIDE IN DENMARK

Executions at Athens May be Avenged by Bereaved Families.

A despatch from Palermo says:—Prime Minister Constantine and his family have been physically distressed by the tragedy of the six executions at Athens. They were not only the former King's friends, but a sense of the victims of his policy.

Constantine's entourage here foresees the eventual assassination of the five Ministers, and one of the executed, belonged to old Greek families with clanish connections, and these, according to members of Constantine's suite, will almost certainly attempt to avenge the deaths, and the material gain caused by the confiscation of the fortunes and lands of the men executed.

The position of Prince Andrew of Greece is also a matter of concern among the royal exiles here. An appeal has been made to the British Government for intervention on his behalf.

Constantine is now negotiating the purchase of a home near Paris, where he will probably take up his permanent residence there.

GERMANY AND RUSSIA ARRANGE SECRET MILITARY CONTRACT

A despatch from London says:—The Daily Mail, which for a long time has been claiming that Germany is preparing for a war of revenge against France, has just published a sensational announcement, according to which Germany and Russia are entering into a secret military contract.

The contract, it is stated, provides for the Russian army will constitute a skeleton to which, at given signal, immense numbers of German armament firms are being transferred to Russia. It is said, where they are putting out munitions in Germany for German use.

TEN DIE IN ST. BONIFACE COLLEGE FIRE

The ruins of St. Boniface College, near Winnipeg, after the fire in which ten people lost their lives. So far only three of the recovered bodies have been identified. Rumors of incendiary arson are rife.

IRISH REBELS FACE FIRING SQUAD AT PORTOBELLO BARRACKS

A despatch from Dublin says:—Three young men faced firing squads on Thursday. So far, eight prisoners have been executed at the order of the military court.

There was a dramatic scene in Parliament on Thursday night over the death of the youths, who were Joseph Spenser, Patrick Farrelly and John Murphy. First, Labor and Independent deputies rose and criticized the secrecy of the military courts. They demanded publicity for the trials.

Defence Minister Mulcahy, in answer, recited the circumstances of the arrests. The young men were residents of the workers' district in the city. They were arrested a month ago after an alleged attempt to destroy Oriel House. Spenser, it was alleged, had a revolver; Farrelly, a

A Mile With Me

Who will walk a mile with me? Along life's merry way? A comrade blithe and full of glee, Who dares to laugh out loud and free, And let his frolic fancy play, Like a happy child, through the flowery gay, That fill the fields and fringe the way.

Where he walks a mile with me, Who will walk a mile with me? Along life's weary way, My friend whose heart has long ago, To the stars shone out over the darkening sea, And the quiet rest at the end of the day.

A friend who knows and dares to do, The brave, sweet work that eases the way, Where he walks a mile with me, With such a comrade, sure a friend, I find would walk till journey's end, Through summer sunshine, winter rain, And then, farewell, we shall meet again.

Henry Van Dyle.

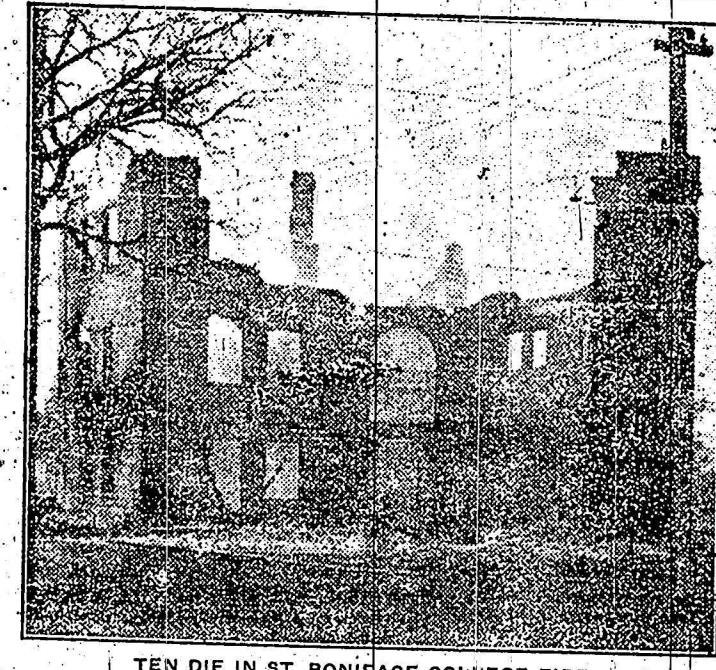

Comet Discovered by S. American Astronomer

A despatch from Cambridge, Mass., says:—The Harvard Observatory has received word by cable of the discovery of a comet by Skjellerup, the South American astronomer, at Cape Town, on November 26. The comet is designated 1925, and its position given as the constellation of Capricorn.

The comet's perihelion, or nearest approach to the sun, is expected to occur on December 15. It is expected to be brighter than Biela's comet, which was last seen in 1802, and to be a very peculiar one. It is expected to be brighter than Biela's comet, which was last seen in 1802, and to be a very peculiar one.

DESECRATING HISTORIC GROUND.

The steam level at work at the gravel and sand pit at Brimley Heights, near Hamilton, which caused the degradation of the War of 1812 Historical Society, it was announced the country in which the buried British soldiers and unknown American soldiers who fought in the war of 1812. The excavating has been stopped.

Canada from Coast to Coast

St. John's, Nfld.—According to reports, the British Treasury has signed a guarantee for \$10,000,000 to the Commission for the establishment of pulp and paper mills at Humber, Newfoundland. The Newfoundland Government has guaranteed the contractors, Armstrong Whitworth & Co., a contract for the construction of a mill at Humber, Nfld. The initial work has already begun.

Lunenburg, N.S.—The Lunenburg fishing fleet landed a record catch of 312,075 quintals of fish during the past season, it is announced. This is 16,925 quintals in excess of the 1919 record. The estimated value is \$2,000,000. The average catch per vessel was 3,121 quintals. The Marquis Belle Wolfe, with 5,600 quintals headed the fleet.

Fredericton, N.B.—A road map covering the whole of the Province of New Brunswick is being prepared by the New Brunswick Automobile Association and will be available for distribution in March next, just in time for the summer tourist season.

Montreal, Que.—Loaded with five million feet of lumber to be used for the extension of the wharves of the eastern section of the port of Montreal, a steamer has arrived here from Vancouver with the largest cargo of its kind that ever entered the harbor. The cargo consists of British Columbia fir, in size 12" by 12", and in length up to 60 feet.

Port William, Ont.—It is reported that thirty-six storage tanks capacity one million bushels each, added in the new year to the

Algoma Trapper Takes Giant Timber Wolves

A despatch from Sault Ste. Marie, Ont., says:—Walter Grunlund, a trapper at Mile 154, on the Algoma Central Railway, brought to the Sault the hides of two of the largest wolves ever trapped in the North country, for which he will receive the Government bounty. Both were grey timber wolves, and one measured over six feet, while the other was five feet eight inches. Grunlund was one of the men who discovered the two dead Finlanders at the side of the lake at Regent last August.

To-Morrow

Whatever yesterday was, we have to-morrow. It is worse than useless to brood over the past; to spend our time in mental back-tracking, examining the way by which we came, unless we mean to make that review of our past history count for a better performance in the time to come. Mistakes are instructive; but he who spends his energy bewailing them destroys his usefulness.

It will not do to live in the past; nor does it serve the purpose for which we were put on earth to live in a rosy dream of the future, without going to work to bring that dream true.

"Some day when I have time," you will hear a man say; and that period of elegant and abundant leisure he imagines seems never to arrive. The disposition to postpone burdens him with an ever-increasing accumulation as day is added to day; and the end of his life comes suddenly and finds him still clutching at the vain shadow of the man he might have been, the things he might have done.

Time now quickly becomes to-day, and we must get ready for it. College students are preparing for their to-morrow; but the ones who have developed habits of indolence and tastes of luxury do not think of the life after college as imminent. It seems a long time off. They are inclined to believe that they will be able to find their way to the life after college as they will be fit for life when it is ready to deal with them. There comes the shock of an awakening when the stern facts confront those who must accept life on its terms, not on their own.

The counsel that we should take "thought" in an ancient sense, which implies an intense anxiety, which we must not sap our strength by the consuming futility of worry. If we are to let a dead past bury its dead, even so we are not to borrow trouble for coming days. We are not to be ruled out of a careful, rational preparation. We are not to stand against a readiness, in mind and soul and body, for whatever the days may bring.

We cannot prophesy what will happen to us; but we can discipline the character by that no misfortune can blast and wreck us. Half the battle is always to grapple courageously with the foe. Many of the victories of the football season have been won on the morale of teams that refused to be afraid of their concealed superiority. They did not get this inspiration to victory by contemplating with grief and failure.

Nor does any of us, in the course of life, derive a conquering spirit in bewailing his lost chances, his flurried high hopes, his broken dreams, his best of each hour as it comes, and does his best in it. The past has no power on the future of the man who will not let it down him or becloud to-morrow.

Winipeg's Labor Mayor

S. J. Farmer, a member of the Labor Party, and member of the provincial legislature, was elected Mayor of Winnipeg during the war, was elected with a majority of 3,000. He is also a member of the provincial legislature.

Association With Music

Angels are said to be wholly without a material form, and are said to be able to appear in any form they wish. They are said to be able to appear in any form they wish. They are said to be able to appear in any form they wish.

Canada's Finest Athlete

Lined Canadian aged 22 years, is declared to be the best all-around athlete in the Dominion. He has excelled in football, he is captain of the Argonauts hockey, lacrosse, baseball, boxing and wrestling. He has just received \$5,000 a year to become a professional hockey player.

Why Rains Often

The reason why it rains so often is because the atmosphere is so full of water vapor. The sun heats the water on the earth's surface, and the water evaporates into the air. The air then rises and cools, and the water vapor condenses into clouds. The clouds then release the water as rain.
