

Canada from Coast to Coast

St. John's, Nfld.—It is reported that Newfoundland Oil and Mineral, Limited, capitalized at \$2,000,000, has been incorporated for the purpose of developing and operating oil and other areas on the west coast of Newfoundland. The company is English. In all some 168 mining locations have been discovered and it is expected that all these areas will be taken up and leases issued by the Government.

Charlottetown, P.E.I.—It is estimated that about 5,000 barrels of oysters will be picked on Prince Edward Island this year before the season closes, an increase of 1,300 barrels over 1921. The demand is good, the price ranging from \$4 to \$8 per barrel. Some fishermen have already landed fifty barrels each.

Sydney, N.S.—The British Empire Steel Corporation has in progress a very considerable building equipment program, according to announcement. There is contemplated a complete renewal on a large scale of the coal tarring equipment, which will probably comprise an order of 200 forty-ton capacity steel cars and 600 fifty-ton wooden hopper cars.

Fredericton, N.B.—A surplus of \$70,576 over current expenditures is reported by the Provincial Government during 1922. This does not take into consideration the Valley Railway loan interest but regarded as a legitimate charge on the revenue of the province. The receipts from succession duties last year were \$26,597, as compared with \$151,325 in the previous year.

Montreal, Que.—For the purpose of outfitting Canadian importers and exporters in the possibilities of trade with the West Coast of Africa, an exhibition of West African products will be held in the quarters of the Montreal Board of Trade.

TO ASSIST POLAND AGAINST GERMANY ONLY 12,230 TONS OF COAL SENT TO FRANCE

French Parliament Voted Food Scarcity Threatened 400,000,000 Francs by Large While Prices Constantly on Increase.

A dispatch from Essen says—The total number of coal trucks the French have taken out of the Ruhr for the collection to Lithuania of Feb. 12 is 1,222, according to reliable sources. Each truck carries ten tons of coal. This amount includes the trucks which were in the Ruhr when the transport began on Feb. 12, and includes a small amount of coal trucks which were in the Ruhr before the transport began, and trucks which have been sent to France since the transport began. The impression that a continuous supply of coal trucks have been going to France the French have been sending loaded trucks back to France when the transport began, and the impression that a continuous supply of coal trucks have been going to France the French have been sending loaded trucks back to France when the transport began, and the impression that a continuous supply of coal trucks have been going to France the French have been sending loaded trucks back to France when the transport began.

As far as can be learned seven men and one little girl have been killed so far in the Ruhr war. German and French counts vary so widely it is impossible to fix individual responsibility for the toll.

A dispatch from Düsseldorf says—The third coal scarcity and constantly increasing prices of necessities are causing anxiety to both French and German officials in the Ruhr, and to the German Government. Meat, bread, butter, eggs and other daily requirements have doubled in price within a week in various districts, particularly the industrial centres, which are without railway services. Fresh milk is practically unobtainable.

The German content the speculation, are taking advantage of the helpless populations, are as much responsible for the mounting prices as the occupation of the Ruhr for the abnormal conditions. The newspapers are urging the authorities to take drastic measures to halt the rising prices and punish the speculators.

Constitution of Free State Moulded on Canadian Status

A dispatch from London says—That the municipality of Ireland from positive British aggression against the new republic is based on the impenitence of Canada. In the interesting statement made by Michael Collins, the late Irish leader, in a book which has been published and is being widely read in Dublin, it is, of course, a matter of history that the constitution of the new republic is based on the impenitence of Canada. In the interesting statement made by Michael Collins, the late Irish leader, in a book which has been published and is being widely read in Dublin, it is, of course, a matter of history that the constitution of the new republic is based on the impenitence of Canada.

Britain Putting Military and Naval Affairs in Order

A dispatch from London says—It is understood that the British Government is putting its military and naval affairs in order. It is reported that the British Government is putting its military and naval affairs in order. It is reported that the British Government is putting its military and naval affairs in order. It is reported that the British Government is putting its military and naval affairs in order.

THE DUKE'S BRIDE COMES FROM ROMANTIC STOCK

It is true that "All the World Loves a Lover," it is also true that a bride is an object of keen and sympathetic affection, especially when she is a charming and natural young girl whom one has chosen to live in the shadow of a great throne.

Lady Elizabeth Bowes-Lyon, who consented to become the bride of the Duke of York after she had proposed three times, comes of an ancient Scottish family. They have occupied Glamis Castle for over six hundred years, and are descended from the Stuart Kings. Glamis castle has been the home of early Scottish kings. Lady Elizabeth, it is said, withheld her consent to marry Prince Albert because of her natural dislike to the formalities of Court life and the high associations her marriage would involve. She is a retiring young woman, who loves the outdoors and all outdoor activities. The Prince is an airman and previously saw with the Royal Air Force. The picture shows Glamis Castle, and the parents of the young couple, the King and Queen, and the Earl and Countess of Strathmore.

CANADIAN GOODS AT BRITISH EXHIBITION

Many Lines of Manufactures to be Shown for First Time at London Fair.

A despatch from London says—That large sections of the Canadian public which believes that Canadian exports to Britain are confined to bulk foodstuffs and raw materials may be surprised to read that there will be exhibited at the British Industries Fair, which opens here next week, the following lines of manufactured goods from the Dominion:

Canned milk, paper, wood, fibre, carvings and mouldings, boots and shoes, breakfast foods, whisky, soap, garments, electric goods, toilet preparations, wallpaper, etc.

There will be a special Canadian section at the Fair for the first time in its history. A recent cable, in which the correspondent reported the growth of Canadian export trade to this country in such unclassified lines as sugar, sole leather, cotton textiles, wire, mica, etc., has been cited as over optimistic. The Dominion Trade Statistics now to hand confirm the statements in every particular. During the last six or seven months there has been a marked revival in Canadian trade with this country.

The Letter

In the good old days, it is a matter of familiar remark, people took the time to write long and careful letters. Even business communications were copious and deliberate. Friends, separated by days of more or less troublesome journeying, committed to one long letter what to-day might be held on the installment plan, in many instalments, or even intrusted to the wire. It is often declared that letters writing, like the manufacture of Ceylon tea, is a dying art. Yet our postal routes carry an increasing burden of what passes for written messages from human being to one another.

Letters are not the talk. They do not hesitate. They are not in search of a word. Their language is generally more formal than the language of speech. They merely touch upon a "hot point" here and there whereas in conversation there would be more to say of matters which in the time of paper shortages, were not written.

Yet letters are definitely intensive of the personality beyond them. One kind of letter goes under the name of an invitation, and is a personal letter. It is the nature of the letter. There is a type of letter that is called the letter of condolence, sympathy, or congratulation. It is a letter of condolence, sympathy, or congratulation. It is a letter of condolence, sympathy, or congratulation.

SUPERIOR VARIETY OF WHEAT TESTED

University of Alberta Proves That New Strain Surpasses Even Marquis Yield.

A despatch from Edmonton says—Three-year wheat tests, carried out by the Department of Field Husbandry of the University of Alberta, have definitely resulted in the discovery of a high producer.

The new strain can even exceed the Marquis yield by as much as nine bushels an acre. It is quite evidently a superior variety to Marquis, judging by the yield carried for the last three years.

Professor Cady states the test in 1920 gave 49 bushels to the new Marquis and 50 for Marquis 111, which is the new variety. In 1921 the yield was 41 and 50 bushels respectively. In 1922 it was 25 and 25, showing that in each case the new strain far exceeded the yield of the well-known Marquis wheat.

Great Britain was Canada's best customer last year. Figures issued by the Dominion Bureau of Statistics show that the value of Canadian exports to the United Kingdom during 1922 was over \$34,000,000 higher than the export of goods to the United States. Canada sold to the United Kingdom goods to the value of \$1,277,894,484, and to the United States \$1,156,247,217.

Despite a reverse weather, with the Nova Scotia colonies got away to a good start in 1922 and the output of January was practically double that of the same month in the previous year. The average daily output was about 14,000 tons, which it has only exceeded since pre-war days was made partly when the output hovered on 6,000 tons.

WE'RE GOING A-MILKING, SIR, THEY SAID FROM THE STATES AND MERRY, BIRMINGHAM, ENGLAND

Weekly Market Report

Table with multiple columns listing market prices for commodities like wheat, barley, and flour. Includes prices for Northern wheat, Manitoba wheat, and various types of flour.

The Girl That Was Kept Home From School

BY W. M. MATHW

An address was given at the Annual Convention of the National Educational Association in Boston last July, reference is made to a little girl who fell behind her class in arithmetic when she reached the sixth grade of senior high class in the elementary school. She was a pupil of average intelligence, and her failure in arithmetic so aroused the curiosity of her teacher that the case was made the subject of an investigation. It always came in multiple-choice questions in arithmetic. It was found that the girl was unable to understand the meaning of the word "per cent." She was given a lesson on this subject, but she was unable to understand it. She was given another lesson, but she was unable to understand it. She was given a third lesson, but she was unable to understand it. She was given a fourth lesson, but she was unable to understand it. She was given a fifth lesson, but she was unable to understand it. She was given a sixth lesson, but she was unable to understand it. She was given a seventh lesson, but she was unable to understand it. She was given an eighth lesson, but she was unable to understand it. She was given a ninth lesson, but she was unable to understand it. She was given a tenth lesson, but she was unable to understand it.

British New Airplane Engine

Orders New Airplane Engine

A London dispatch says that the British Airplane Engine Company has received orders for the new engine. The new engine is a four-cylinder, water-cooled, rotary engine, which will be used in the new British biplane.

WHAT DID THE DEFENDANT SAY WHEN YOU FIRST MET HIM, OFFICER BLUE? HE ASKED ME IF I COULDN'T FIND A HOUSE TO FIT HIS LATCHKEY, AND THEN HE HIT ME ON THE BEAN! WHAT HAD HE BEEN DRINKING? HOME MADE HOOCH, I THINK. YOU THINK I AMN'T YOU A JUDGE? NO, YER, OFFICER! I'M ONLY A COP!!
