Each hair of the head has a nucleus at its root. Although few human beings can control their hair, some shaggy-haired animals are able to make their hair stand on end at will.

MARKDALE STANDARD

VOL. 41 MARKDALE, ONT., THURSDAY, MARCH 8, 1923. Established in 1875

EFFICIENT FARMING

Incubation and Brooding. The success or failure of your whole year's work may depend upon your work in the incubation season.

When the machine is of a reliable make, and good fertile eggs are used, with accurate thermometer registering 102 1/2 to 103 degrees at the level of the top of the eggs without too much variation throughout the incubating period of 21 days, you should secure a hatch equal in number and condition to that of any other hatch.

Start Your Garden Seeds Early

This Can Be Done in Home, Greenhouse or Hotbed.

For earliest and best results with vegetables and flowers in the garden, seeds of some of the varieties and species must be started early.

Among the vegetables that may be started inside are: Brussels sprouts, cabbage, cauliflower, celery, eggplant, muskmelons, peppers and tomatoes.

Among the annual flowers are: geranium, nastur, balsam, calceolarias, carnation, four-o'clock, gailardinia, larkspur, jacobin, marigold, mignonette, nasturium, nicotiana, pansy, petunia, phlox, pink, salpiglossis, scabiosa, ten-week, sage, salvia, snapdragon, verbena, foxglove, cosmos, sweet sultan, verbena, wallflower and zinnia.

When putting manure into pit, shake each forkful to break it apart and spread it evenly in layers.

The Sunday School Lesson

MARCH 11, 1923

Jesus in Gethsemane, Luke 22. Golden Text—Christ also hath once suffered for sins, the just for the unjust, that he might bring us to God.—1 Peter 3: 13.

Lesson Setting—The opening part of the text is a dramatic chapter. Jesus and his disciples are in the upper room.

Application. One is conscious of a certain reverent hesitancy in applying our Lord's words to ourselves or to others.

Cost of a Kick. A writer in Wallace's Farmer calls attention to some very expensive kicks by the farmers.

Acquiring Fame in Old Age. When a man is old to do good work, whatever the answer, it is certain that many of the world's greatest men had their best work after they had passed their sixtieth birthday.

MY NEIGHBOR. I do not know my neighbor, I know that he has lost his goat. When I am struck in my sheep with a notice on my back, he herds the sheep and milks the goat.

Ripping Rhymes. I do not know my neighbor, I know that he has lost his goat. When I am struck in my sheep with a notice on my back, he herds the sheep and milks the goat.

TEETH AND BODY ALL SWOLLEN

Put-a-lives Relieved Both Urinary and Sick Kidneys

Who who know they have kidney trouble—who suffer with pain in the back—who are up frequently at night—who complain of the weakness of their feet—who feel the wonderful medicine made from fruit juices and tonics, will find relief from kidney and bladder troubles—as proven by this letter.

The Dairy

The new-born calf should be put to the teats in 12 hours. When a calf is removed, feed from two or three teats of its dam's milk.

Some fine quality hay should be fed before the calves when they are a week old and they may be fed a little alfalfa when they are two weeks old.

Buying Nursery Stock

There are several considerations to be taken into account before purchasing nursery stock. There is a large variety of apples that are available.

Lead Children to Nature

Not many spring weeks have passed since the first of April, and the weather is now in the hands of the sun.
