

# CANADIAN CATTLE REACH GLASGOW FIRST TIME IN THIRTY YEARS

### Event Was Marked by Public Reception, and Steer Valued at £35, Handed Over to Committee, Sold at Auction for £500.

A despatch from Glasgow says:—The first shipment of Canadian store cattle to arrive in Scotland in thirty years reached Glasgow last week and was received by an enthusiastic gathering of cattlemen, farmers and a special reception committee appointed by the City of Glasgow. The shipment consisted of consignments by Harris Abattoir Company, Toronto; the United Grain Growers, Limited; of Winnipeg, and H. P. Kennedy, Limited, Toronto, the last named firm acting as "retro-activates" for the United Grain Growers in the handling of their store cattle for export.

P. J. Irwin, representative for H. P. Kennedy in Glasgow, cabled that on the shipment being unloaded, a Canadian steer, valued at 35 pounds for ordinary market purposes was selected and turned over to the public reception committee by whom it was sold at auction for the sum of 500 pounds sterling, and the money turned over to the Unemployment Fund of the City of Glasgow. A banquet in honor of the arrival of the first shipment of Canadian store cattle was held, with celebrities from all parts of Great Britain in attendance.

### BRITISH EDUCATIONISTS IN CANADA

Notable figures from the Motherland are visiting Canada just now attending the National Council of Education meetings at the University of Toronto. Three of the visitors are shown. Sir Henry Newbold, lecturer and poet, who has just completed a tour of Canada; Miss Gilpin (centre), headmistress of Hall School, Weybridge, a notable Englishwoman, and Sir Michael Sadler (right), vice-Chancellor of the University of Leeds and one of the leading figures in the world of education.

### EXPLORER SUCCUMBS TO BLOOD POISONING

#### Earl of Carnarvon Discovered Tomb of Pharaoh After Seven Years of Fruitless Excavation.

A despatch from Cairo says:—The Earl of Carnarvon died peacefully at 10 o'clock Thursday morning. He was conscious almost to the end. His death was due to blood poisoning, through the bite of an insect, with the later development of pneumonia. When the earl died, his daughter, Mrs. Evelyn, and son, Lord Porchester, who arrived from India a day or two ago, were at the bedside.

In 1895 he married the late Mrs. Evelyn, daughter of the late Frederick B. Wombey, J.P. His wife inherited much of the fortune of the late Earl of Carnarvon.

### FIRE PROTECTION IN NORTH ONTARIO

#### Some of Latest Type of Gasoline Engines Have Been Decided On.

A despatch from Cochrane, Ont., says:—Considerable additions to the available equipment have been made for the coming season's work in the north by the Ottawa Fire Protection Service, according to E. C. Peck, supervisor for this district. Some of the latest type of gasoline engines with a pumping capacity of from 350 to 400 gallons per minute, have been decided upon and these will be used to protect town and village while they also will be available for use against forest fires in the bush.

### Canada from Coast to Coast

Halifax, N.S.—The steamer "Petrol," formerly a Government craft, is being fitted out here for a cruise of the Labrador, and will start north as soon as supplies are taken aboard. The expedition is being backed by Montreal interests for the purpose of determining whether gold exists in commercial quantities of any in the Labrador fields, and the findings of the expedition will largely determine the activities in that field this year.

Quebec, Que.—The plans for the construction of the new Basilica of St. Anne de Beauport have been completed and provide for a church which will probably be the most spacious and finest, from an architectural point of view, in Canada. In architectural style the new Basilica will be a combination of Roman and Gothic, and the steeples in front will tower 225 feet high. The Basilica will contain 20 altars in all, including those of the chapels.

Toronto, Ont.—That some thirty new freighters, most of them built in Great Britain, will be added to the fleets of the companies operating on the lower lakes, was the evidence of H. B. Clark, secretary-treasurer of the Matthews Steamship Co., before the Royal Commission investigating the lake freight rates. During the past year, the lake steamship companies moved an enormous volume of grain from the head of the lakes to the seaboard, and it is anticipated that the movement in 1923 will be equally large.

Chancellor Stanley Baldwin has announced a surplus in British finances of £110,000,000, instead of six or seven million pounds which had been estimated. It keeps to reduce the national debt according to law, but may be allowed to reduce taxation.

There are now 2,600 industries in British Columbia with an annual output of \$250,000,000 worth of goods, according to a bulletin issued by the provincial Department of Industries. The Provincial Government has been very active in promoting new industries for the province during the past few years, and has advanced large sums of money to new companies.

### Natural Resources Bulletin

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:—

While gold and silver are by far the most valuable minerals produced in Ontario, the province produces other minerals which have considerable economic value. The output of mica alone was 2,229 tons, of a value of \$56,432. Of this amount 2,113 tons was what is known as scrap mica, worth but \$10 per ton, whereas the 116 tons of rough-cabled mica brought \$255 per ton. The mica is mined principally in Leeds, Lanark and Frontenac counties, in Eastern Ontario. The Gatineau district of Quebec also supplies large quantities of mica. The total production of Canada last year amounted to 3,543 tons, valued at \$129,221.

### Great Britain Provides for Ex-Service Pigeons.

A despatch from London says:—The Ex-service Pigeons which were used during the war, from reference to the British Army, have been pensioned off by the War Department to the care of a welfare organization. The birds were pensioned off by the War Department to the care of a welfare organization. The birds were pensioned off by the War Department to the care of a welfare organization.

### First Aid to Man Run Over by Train

Quick action on the part of a G.R.R. locomotive engineer probably saved the life of W. B. Clark, whose leg was severed by a train at the St. Remi Street crossing. The engineer immediately brought the train to a stop, and cutting off a piece of the rail rope made a tourniquet which he applied to Mr. Clark's bleeding limb and partly stopped the flow of blood. The leg had been severed below the knee, and when the victim was admitted to the Montreal General Hospital, it was found necessary to amputate above the knee. Mr. Clark was reported today as resting comfortably.

### Small Voices.

There is what Matthew Arnold calls the world-beaten car, that is assailed by the loud noises, and becomes unable to hear the softer, gentler sounds, in which there may come to us those "innumerable glimpses of eternity" that we must heed if we are to live aright and have our part in the everlasting here and now.

### FOOD GOING FORWARD TO COAST VILLAGES

#### Newfoundland Government to Send Powerful Ship to Break Ice.

A despatch from St. John's, Nfld., says:—Determined efforts are being made by the Newfoundland Government to send food supplies to starving settlements along the south coast, isolated for many weeks by the ice which blocks their harbors. The mail steamer Kyle, plying between this port and Sydney, N.S., was taken off that route and left for the southern settlements laden with provisions. Already several vessels have put out on similar errands of mercy, but all have fallen victims to the ice. All are held ice-bound in southern harbors, some of them having been unable to move for six weeks. The Kyle, larger and more powerful than the others, hopes to be able to break through the ice barrier. Tales of terrible suffering in many south coast villages have filtered through to the Newfoundland capital. The winter fell early, freezing in the harbors, and their usual means of winter sustenance. Later a series of bitter storms built a thick rim of ice along the coast, shutting out supplies that would have relieved the suffering of the people.

### British Has Huge Surplus.

Chancellor Stanley Baldwin has announced a surplus in British finances of £110,000,000, instead of six or seven million pounds which had been estimated. It keeps to reduce the national debt according to law, but may be allowed to reduce taxation.

# PACKAGE OF DYNAMITE CAUSE OF A LIVELY SPRINT

### When Attorney Produces Exhibit in Suit, Judge, Jury and Spectators Make Headlong Rush for the Exit.

A despatch from Detroit says:—Judge, jury and spectators dived several seconds off the record for the 100-yard dash Thursday afternoon, when enough dynamite to take all the shape out of the county building was found within a foot of the desk of Judge Clyde I. Webster. The discovery was made during taking of testimony in the \$25,000 suit of Aaron Haber, 14 years old, against Ray D. Baker, a contractor, for alleged carelessness. The contractor, it is claimed, left caps and dynamite strewn negligently about the ground near some work at East Warren and Fairview Avenues, and the boy picked up a cap and exhibiting it to the wall. In doing so he blew himself up in the chest. The suit was set for trial at 10 o'clock, but the judge, jury and spectators made a headlong rush for the exit as soon as the dynamite was discovered.

### Great Britain Provides for Ex-Service Pigeons.

A despatch from London says:—The Ex-service Pigeons which were used during the war, from reference to the British Army, have been pensioned off by the War Department to the care of a welfare organization. The birds were pensioned off by the War Department to the care of a welfare organization.

### Newfoundland Sealer Returns With 111,367 Pelts

The sealer John J. Smith, of St. John's, Newfoundland, has returned from his latest voyage with a record catch of 111,367 seals. The catch was made during the past season and is the largest ever recorded for Newfoundland. The seals were taken in the waters off the coast of Newfoundland and are being sold for their pelts. The pelts are used for a variety of purposes, including the making of coats and hats. The sealers of Newfoundland are an important part of the local economy and their catches are a valuable resource.

### Gets Death Sentence

Former President Radko of Bulgaria, who was found guilty of the assassination of King Ferdinand, has been sentenced to death by a Bulgarian court. The court found that Radko had conspired with other individuals to assassinate the king and that he had played a leading role in the plot. The sentence is the first of its kind in Bulgaria and is a reflection of the country's desire for justice.

### More Gold Now Being Produced

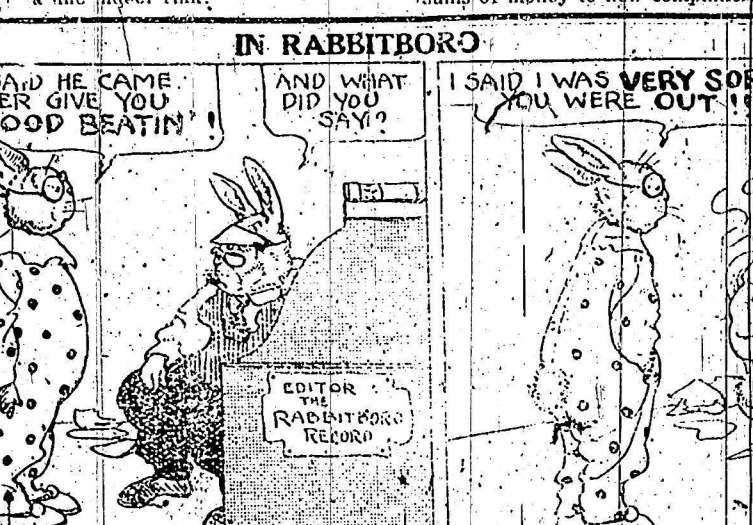

Annually from the mines of British Columbia and Yukon is more than the highest record ever established by the mining industry. The output of silver from Ontario during the first three months of this year has increased approximately \$222,000,000. This increase is due to a combination of factors, including the discovery of new mines and the improvement of existing ones.

### Armenian Relief Association

Canada has purchased a farm of 135 acres near Georgetown, Ontario, and will bring out to it in May the first of fifty Armenian boys, who will be trained in farming and fruit growing. Another party of fifty will be brought out in September. The boys are being trained to help rebuild their homes in Armenia after the devastation of the war.
