

Canada from Coast to Coast

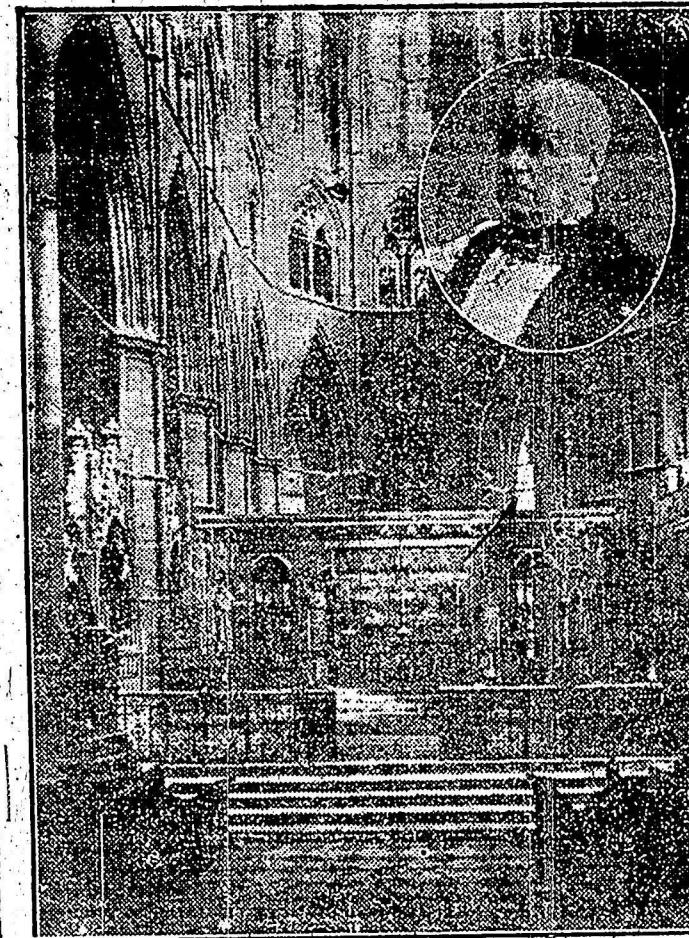

St. John's, Nfld.—To date 42,000, 1,200 strong. It is estimated that seals have been killed by the Newfoundland sealing fleet, according to that that Toronto has about one-half of wireless reports received here. The distinguished contingent.

Winnipeg, Man.—There was an increase of 51 per cent. in the immigration Thesis 8,500; Eagle 7,000; Ranger ton into Canada for February just 6,000; Seal 6,500; Sagana 5,500; Ter- passed, over the corresponding month of last year. The total immigration for the month was 3,290, as compared with 2,183 for February, 1922. From Britain there came 1,356 compared with 509 a year ago; from the United States 722, compared with 1,078 a year ago; and from "other countries" 1,212, as compared with 1,025 a year ago. For the eleven months ended February there has been a decline from 84,451 for the period closing with February, 1922, to 66,139 for the corresponding period closing at the end of February.

Regina, Sask.—Several hundred new sites were constructed in Saskatchewan last year, and indications are that the number erected in 1923 will equal if not exceed that number. In all parts of the province there is real enthusiasm as to the possibilities of sunflowers as an ensilage crop and of sweet clover as a hay and pasture crop, and the coming season will undoubtedly see an increase of several thousand acres over last year's acreage planted to these forage crops.

Vancouver, B.C.—There was a production of over ten million dollars in gold and silver in the northwest districts of British Columbia in the year 1922, representing an increase of more than fifty per cent. over the previous year. So many properties have been brought practically to the production point that the coming season should see exceptional progress.

Toronto, Ont.—According to the latest legal directory, this city harbors 597 law firms, as against 515 a year ago. The local office of individual barristers and solicitors is said to be

WHERE THE ROYAL WEDDING WILL BE CELEBRATED

The High Altar and Apse of Westminster Abbey where the marriage of Prince Albert, Duke of York, to Lady Elizabeth Bowes-Lyon, will be celebrated. It will be the third royal wedding of recent years to take place in the ancient abbey, the first being that of Princess Pegeen, and the second that of Princess Mary to Viscount Lascelles, inset is the archbishop of Canterbury, who will officiate.

Change in Immigration Act.

A change has recently been effected in the immigration laws of Canada which, whilst not drastic, should have the effect of facilitating to some extent the flow of new peoples to Canada through the removal of a clause which has in the past worked certain hardships and to many worthy cases constituted itself a certain handicap to entrance. What is known as the "continuous passage clause," devised purely as a barrier to the entrance of Asiatic peoples, but which inevitably operated against the nationals of many desirable countries, has been removed from the statutes, and provided an immigrant complies with other clauses of the Act, it is no longer necessary for him to commence his journey to Canada from his native land.

The following classes are permitted entry to Canada providing they comply with other regulations of the Immigration Act:

1. A bona fide agriculturist entering Canada with sufficient means to begin farming.

2. A bona fide farm laborer entering Canada to follow that occupation with reasonable assurance of employment.

3. A female domestic servant entering Canada to follow that occupation with reasonable assurance of employment.

4. The wife or child under 18 of a resident of Canada legally admitted, who is in a position to care for dependents.

5. A United States citizen, providing it is shown that his labor or service is required in Canada.

6. Any British subject, by birth or naturalization, entering Canada directly or indirectly from any of the British Dominions or the United States.

7. His Excellency the Governor General of Canada, or any member of the Royal Family.

8. Any person who is able to satisfy the authorities that he has sufficient means to maintain himself until employment is assured.

All other immigrants, including the last two classes, are required to be in possession of \$250 on applying for entry to Canada except in the case of those who are in a position to care for dependents.

It is further provided that none of these provisions shall apply to immigrants of any Asiatic race.

Every immigrant shall be in possession of a passport issued by the government of the country of which the immigrant is subject except in the case of British subjects landing in Canada directly or indirectly from the British Dominions or the United States, and United States citizens, farmers, farm laborers, domestic servants landing in Canada.

It is further provided that coal from the

anthracite area could be placed in Toronto at about \$16 or \$17 a ton. There would be additional charges for re-tailing. The coal was superior to Pennsylvania anthracite, now being delivered to Canadian points.

Mining conditions in the Alberta field were superior to those in the Pennsylvania field, and the coal itself was clean and did not deteriorate. The public would not need further education in using Alberta coal. If the field was developed, it would also provide a profitable tonnage for the Canadian National Railways.

Bound with a new book for children is a mirror that reflects the pages and contains pictures, only half of which are printed.

A silver tag attached to the dorsal fin of a salmon before its release after the eggs have been removed at the Dominion Government hatcheries in Saskatchewan, last year, had the greatest number of tax-paying farmers, with a total of 6,500. Ontario came next with a total of 6,138 and Manitoba third with 3,455. The totals for the other provinces were: Alberta, 1,638; British Columbia, 640; New Brunswick, 43; Nova Scotia, 198; Prince Edward Island, 40; Quebec, 150; and Yukon, 3.

All arrangements have been completed between the Dominion Government and the Overseas Settlement Committee for the emigration of children, domestics, and nominated adults from Britain under the \$600,000 appropriation made by the Canadian Parliament. It is estimated that this sum will secure 5,000 children, domestics, and 4,000 adults under the scheme of educational work, has been elected to be president of the National Council of the League of Nations.

next twelve months will thus be 13,000.

FREE STATE TROOPS SEARCH FOR VALERA

Scouring Tipperary Mountains for Republican Leader and Adherents.

A despatch from Dublin says:—Six columns of Free State troops under General Pratt are scouring the mountains in Tipperary for Eamon de Valera, Dan Breen and other Republican adherents who escaped the National troops when Liam Lynch was fatally wounded and captured. This operation is the best organized effort yet made to capture de Valera.

The area in which the troops are operating is very mountainous, and movements are trickling through.

Thomas Keating, one of the Southern irregulars, died on Thursday from his wounds in the "Dungarvan Hospital." Keating, with a party of irregulars, was surprised by troops operating at Coolnashan, near Dungarvan, County Waterford. The irregulars refused to surrender and were fired upon, Keating receiving a mortal wound. He was one of the most active of the Southern irregulars.

The number handled are enormous. The Department of Marine and Fisheries announces that eggs to the value of £1,000,000 are undergoing incubation in the Dominion Government hatcheries in the provinces indicated.

These eggs are now well developed and under normal conditions they will hatch all, though the spotted and infertile eggs having been removed.

A man should never be ashamed to own that he has been in the wrong; it is but saying, in other words, that he was wrong when he was younger.

The number of forest rangers engaged in the work of forest control, with the object of preventing fires in the vicinity of the borders of Quebec and Ontario, will be tripled during the coming season, according to a statement made by the Provincial Minister of Lands and Forests. It is anticipated that a similar protection will be afforded the forests on the Quebec-Maine line.
