

SETTLERS IN VIRGIN COUNTRY OBLIGED TO START PIONEERING AGAIN

One Hundred and Fifty Families in Chicoutimi Parish to be Dispossessed When Big Storage Dam is Completed at Kenogami.

A despatch from Quebec says: "At St. Cyriac, the fields they had won from the bush acre by acre, will be covered many feet deep by the water of the great new storage basin which will come into existence when the huge dam at Kenogami is completed." Four hundred and five settlers' lots will be expropriated by the Quebec Running Streams Commission to provide for the flooding that the dam will cause in the townships of Kenogami, Jonquière, L'Assomption, La Barre, and Plessy. As soon as their harvest is gathered this fall the families will be moved with their stock and their portable possessions to begin township, where they will begin again on the arduous labors of settlers in virgin country. Then the little village they had built

will be heard of him. He next turned up in Rumania, where he became prominent by his work in destroying the rich oil wells in the face of the advancing Austrian army, so that they would not fall into enemy hands. He had many wonderful experiences there. He once, on occasion saved sixty Rumanian deportees from death at the hands of the Bolsheviks at the risk of his own life.

It was he who at great risk carried the peace terms between Rumania and the Bolsheviks from Jassy to Odessa by airplane, and in doing so suffered a stroke. He was nursed back to health by the Queen of Rumania, who sent a letter of grateful appreciation to his father, the late Charles Boyle, expressing her thanks for the services of his son.

Adventured in Search of Oil.

Following, the amiable Colonel Boyle was appointed an extraordinary commissioner for Rumania, and organized a relief campaign for the people of that country. During the past year or two, he had been connected with the Royal Dutch and Shell Transport Co. in seeking oil concessions and developing oil wells in Mesopotamia and other part of the Near East. Last summer he had another exciting experience with the Bolsheviks, when he secured the release from a dungeon in Iași of a member of his staff and his wife. He returned to England last fall in poor health, and had been under the care of doctors and nurses since then.

CROP SPOTS GOOD IN RUSSIA

Increased Area of Winter Grain Fields—Plentiful Supply of Farm Labor.

A despatch from Moscow says: "Agricultural authorities in Russia concur in the opinion that the present winter has been favorable to good winter crops. It is estimated that winter grain fields this year, in comparison with last year, have increased their areas on an average of 18 per cent; in timber districts, 12 per cent; semi-starved districts, 20 per cent, and in the rest from 3 to 4 per cent. It is based on the favorable conditions now prevailing, may increase the area during the coming spring sowing time by 20 per cent as compared with last year."

The problem of farm labor is not worrying Russia; there are more hands than the country can absorb at present. The Government has advanced to the agricultural population about 20,000,000 puds of seeds, and to cover the lack of working cattle, the Government has taken measures to sustain it from Mongolia and Kirghiz steppes.

Earth to Moon by Airplane in Eighty Days

A despatch from Paris says: "The moon is 74 miles nearer the earth than astronomers thought. This discovery has been made by Albe Moreau, of the Bourges Observatory, as a result of special studies during the last month."

In announcing his discovery, he illustrates the distance from earth to moon—thirty times this planet's diameter—but points out that at the speed of modern airplanes it could be covered in eighty days, just the time it took Jules Verne's hero to get around the world.

He worked hard until he made sure he had struck something good, and then, in order to diversion, his claims formed what was known as the Canadian Klondyke Mining Co. With increased financial assistance good progress was being made, when the war broke out and halted development.

Provided Machine Gun Battery; Col. Boyle equipped and sent over sea a machine gun battery composed of fifty picked men and this division did service at the front. In 1916 he went over to London on business, and while there was commissioned by the War Office to go to Russia to organize the transportation system of that country. He was there during the re-

turn of the ship.

SHUT YOUR EYES DUMMY AND IN A JIFFY YOU'LL BE IN SLUMBERLAND!

WHERE'S SLUMBERLAND, MA?

I KNOW! —

IT'S RIGHT NEXT TO LAPLAND.

Randall.

THE BRIDEGROOM AND HIS BRIDE

One of the latest pictures to reach Canada of Prince Albert, the King's second son, and his bride, Lady Elizabeth Bowes-Lyon, whose marriage took place on April 26. Prince Albert is shortly to be made a Governor-General of one of the Dominions representing his father.

CANADIAN CONSUMER PAYS HIGH PRICE FOR UNITED STATES GOODS

A despatch from Ottawa says: "The hands of wholesalers and retailers have \$100 worth of goods imported to consumer, the pyramiding was done from the United States by a Canadian greater, and the \$100 worth of goods wholesaler, under a duty of 35 per cent without allowance for cost of manufacturing, because of pyramiding of profits, fact, cost by pyramiding alone on the cost of the goods, on profits and \$32.55."

Of the added cost through sales taxes paid, cost the consumer on sales taxes paid, cost the consumer and duties, in the first instance, the goods had passed through various Treasury collected a total of \$4.11 while the consumer paid \$40.94.

The latter case, the goods being handled by the special Agricultural Committee of the House of

Thursday by Isaac E. Pedlow, retailed through additional channels, the

merchant, of Renfrew, Ont., and a former member of the Commons,

while the consumer paid \$2.50.

In the case of goods imported by a wholesaler and sold by him to a manufacturer and then, in manufacturer form, passing in turn through to duty and profits on duty,

A Chapter's End?

Are the sands of Irish rebellion at last running out? Charles Burgess, Erskine Childers and Rory O'Connor are dead. When Childers, the real brains of the rebellion, was executed, Liam Lynch took his place.

And now Lynch has been sent to death in a running fight. Eamion de Valera is fleeing to some new hiding place and the women supporters of his rebellion and his few faithful lieutenants have been scattered.

Ten thousand "irregulars" are in Irish jails. Sixty-seven of their leaders have been executed. Lynch, the last first-class fighting man in the rebel ranks, is gone.

If Cosgrave was to govern, the rebellion had to be put down. Executions and reprisals seemed the only way. If the fight of the Irish rebels comes to its final stage, only the enemies of Ireland will mourn over the news.

Halifax and Prince Rupert Linked by Radio

A despatch from Prince Rupert, B.C. says: "Radio communication tests between Prince Rupert and Halifax, N.S., have proved successful. The tests were carried out by Jack Barnsley, of this city, communication being established in a few hours."

HAPPY ONCE MORE

To the thousands of Canadians who love the outdoors and especially the sport of fishing spring spells freedom to seek and prepare their lures in the open for precious weekends. The three fishermen in the picture are about to enjoy the success of their day's fishing in salmon shot over a camp fire. Roughing it for a night or two is the nearest many modern men can get to an expression of their pioneering instincts."

IN RABBITBORG

Clear as Mud.

"Did he tell you the way?"

"No, he only gave me directions."

Natural Resources Bulletin

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:

In order to assure the continuance of the forests of Ontario, provincial and other nurseries are making preparations to produce up to twenty million seedlings per year. There are large areas in the province which are suitable only to the production of timber, and it is a portion of the program of the Ontario Forest Branch to replace these areas.

This, however, is but one means of continuing the forest production. The more important and at the same time the most productive method is to protect the forests already existing and encourage natural reproduction. To do this, it is essential that care be exercised and forest fires prevented. The Forest Branch is doing good work but needs the help of all interested in the province's welfare.

SIEGE OF IRISH CAVE HAS DRAMATIC END

Three Republicans Drowned While Endeavoring to Escape and Four Captured.

A despatch from London says: "The spectacular siege of the little hold of Irish Republicans, which had been holding out against the Free State forces in a cave 100 feet from the top of the Clashmoun Cliff, on the wild shore of the Shannon, in County Kerry, has come to a sensational ending."

Of the men who had been fighting under a continuous machine gun fire since Monday night, fell from the cliff into the Shannon while trying to escape in the darkness of Wednesday morning, and were drowned; Commander Walter Stevens, of London, was captured, according to a despatch to the Central News from Tralee.

The men in the cave, evidently believing their position insecure, were endeavoring to sally forth and reach the protection of an adjoining cave when the casualties occurred. The body of Commander Lyons was washed out to sea by the rising tide.

Weekly Market Report

TORONTO

Manitoba wheat—No. 1 Northern, \$1.10; No. 2, \$1. Smoked meats

Manitoba barley—Nominal.

All the above track, bush parts.

Am. corn—No. 3 yellow, \$0.46; No.

2, 97c.

Bailey—Milling, 59 to 61¢; accord-

ice to freight outside.

Buckwheat—70 to 78¢.

Pens.—No. 2, \$1.45 to \$1.50.

Milkfed—Del. Montreal, freight

bags included: Bran, per ton, \$20;

shorts, per ton, \$11; middlings, \$16;

good feed flour, \$2.15 to \$2.25.

Ontario wheat—No. 1 White, \$1.20

to \$1.22, abroad, per freight outside.
