**SELF-OILING — SELF-REGULATING**

With the Strongest Tower Built

It's the "Toronto" Self-Oiling Windmill — requiring "oil only once a year". All gears operate in a bath of special oil affected by neither heat nor cold — every bearing and working part thoroughly and automatically lubricated.

If you have a "Toronto" Windmill now, you can obtain this self-oiling feature by interchanging the head and using your present wheel. Most Toronto Windmills too, can be made absolutely self-regulating in operation. The "Toronto" Tower will stand for a lifetime because it is the heaviest, strongest and best-built one built for any windmill. See this new Mill now — or get my booklet.
