EGG GRADING

As with all other Legislation relating to the grading of produce, considerable criticism is heard everywhere. This is to be regretted, as there has been nothing enacted by the Dominion Department of Agriculture which will redound to increased consumption of the commodity with the inevitable resultant increase in price. The producer is assisted by the increase in price and the consumer is protected so that he knows what he is getting when he asks for a certain grade.

Bacon, Butter, Cheese and Eggs are now graded. There are Nationally Standardized Grade Names that must be used only on the quality which that grade embraces. A difference in price will be made in the various grades. The Producer of High Grade Eggs will receive better prices for his high quality product.

As the producers and store-keepers are vitally interested in the Act, which came into effect on July 7th, a short explanation is given of the most important Clauses of the Act:—

Clause 4 means that every case, package or container of eggs that is shipped or delivered by those who receive eggs on consignment or buy eggs for re-sale, must be labeled or tagged on both ends conspicuous, letters being used with the name of the Class and Grade of the eggs contained therein strictly according to the Canadian Standards for eggs. As, for instance, "Fresh Extras" or "Storage Extras," according to whether they are really fresh-gathered eggs or storage or preserved eggs. Any producer or other person, however, who does not wish to grade his eggs or has no facilities for so doing, may pass on or ship his eggs to a wholesale or retail dealer, delegating the candling and grading to such wholesale or retail dealer, providing [illegible] labels or tags [illegible] per cases in which such eggs [illegible] with the words "Ungraded Eggs or Shipper's Duty," which means that the eggs must not be resold unless they have been candled and graded according to the Canadian Standards. Such ungraded eggs, however, must not be shipped, delivered or sold to a consumer.

When cartons or other separate packages of eggs are packed in cases, such cases and cartons or packages must be labelled or tagged as aforesaid.

Clause 5 means that any person selling eggs, offering eggs for sale, or displaying eggs for sale, or delivering eggs direct to consumers in a public place or public manner, shall mark, label or tag such eggs or containers in which they are held with the name of the class and grade of such eggs, using conspicuous letters on such labels, tags, etc. This regulation it is understood, applies to pedlars selling eggs to consumers from house to house, producers, and all others selling eggs in a public market place or in an ordinary business way. Producers and others desirous of selling eggs to consumers must acquaint themselves with the classes and grades of eggs, and grade them correctly, as complaints lodged by consumers and others are liable to be investigated, and inspectors have the power to inspect in all public places and places where such business is conducted.

Clause 6 states that an allowance will be made, not exceeding 6½ per cent., for eggs found in parcels of eggs which are below the grade stated, this to be an average allowance, and apart from breakage. In the instance of eggs purchased from vendors for re-sale, complaints with respect to eggs below stated grade must be made to the vendor within twenty-four hours; otherwise, the person in whose possession such eggs are found will be held responsible.

Clause 7 means that every retailer of eggs shall cause to be displayed in a prominent place in his place of business a card setting forth classes and grades of eggs as defined by the Canadian Standards, for the information of consumers, so that they may know what these classes and grades actually mean as regards the quality of eggs according to the Canadian Standards.

Clause 8 means that the class and grade of all eggs offered for sale must be as described according to the Canadian Standards as regards quality and weight, but the eggs may be better than the class and grade they are described as being.

Clause 9 states that no person shall buy for sale or re-sale or expose, offer for sale, or sell eggs which are unfit for human food. This means that those selling bad eggs will be held responsible for so doing. They cannot plead ignorance; they must know.

Clause 10 specifically states that all persons who receive eggs on consignment, or who buy eggs for re-sale, in making returns for same must make returns for such eggs on a graded basis, making separate returns of the grading, according to the Canadian Standards (using the form schedule A), to the person or persons from whom the eggs are bought or received, provided such eggs are bought or received from producers in lots of as much as 15 dozens in one day, the less than 15 dozen exemption applying only where eggs are received direct from the producers.

Clause 10 (2) means that anyone to whom eggs are consigned, wishing to transfer them to another party without candling and grading them, must do so within 48 hours from the time the eggs are received.

Clause 10 (3) means that those in charge of the enforcement of the regulations may demand to be notified in the case of a transfer, for the purpose of candling and grading, and may prescribe the conditions under which such transfer may be made.

Clause 11 states specifically that any inspector charged with the enforcement of the regulations may enter any premises or conveyance and make full investigation to ascertain whether or not the egg regulations are being violated in any way. This is law, and resistence would be at the peril of the person resisting such entry and inspection.

The above explanation refers to the principal clauses in the amended egg regulations as affecting domestic trade in eggs or eggs for home consumption.

Schedule "A" referred to above, is the form of grading statement prescribed in Regulation 10, of the regulations, and is attached to all copies of the Regulations issued by the Federal Government.

The placing of the grading of eggs for home consumption on a legalized, standardized basis would appear to open up a wonderful opportunity for all concerned and interested, from producer to consumer, and while, no doubt, just at first, there will arise some difficulties in the application, administration and enforcement of the Regulations, it appears evident that those entrusted with the enforcement of the law are anxious to render all possible assistence to all concerned.

Grading Farm Produce

One of the best bulletins ever sent from Ottawa has just come to hand from the Dairy Branch, Department of Agriculture, Ottawa. It is a resume of the observations made by Mr. J. A. Ruddick, Dairy and Cold Storage Commissioner, on a three months' trip through New Zealand and Australia.

These two Colonies have come to the front in the supplying of Great Britain with Cheese and Butter, Canada has been forced to take second place, with the possibility of losing entirely her market for cheese to New Zealand. Is it not time something was done to awaken Canadian Farmers?

Briefly, Mr. Ruddick's chief points are as follows:

1 Payment by test for all milk delivered to Cheese Factories.

2 The Factories are under efficient, well paid management.

3 There is no antagonism between cheese and butter factories and milk condensaries, as in Canada.

4 The quality of produce produced is placed equally on producer and manufacturer.

5 There is a Nationally Standardized Grade which must be stamped by Government Inspectors on every shipment, regardless of its size.

6 Producers take a keen interest in the Marketing of their products.

7 Legislation providing for inspection of dairies, factories, etc., registering of marks, stamps, brands; condemnation of all unclean, unsanitary dairy apparatus and equipment, etc., has been enacted.

8 Owners of dairies and farms must give, within reasonable time, any and all information demanded by the Minister of Agriculture.

9 All dairy produce must be graded and stamped with Government Grades. Cheese must be over 14 days old before removed from storage for shipment, and butter must be left in cold storage for three days.

The above are a few points clearly emphasized in the bulletin. His conclusions are far-reaching, as they are concise, but should command the attention of every producer of milk for cheese or cream for butter production.

1 There must be keener appreciation of the supreme importance of quality.

2 The apathy engendered by the lack of competition in the past must be dispelled, and a new spirit aroused to meed the remarkable change of situation that has come in the last two years.

3 The universal grading and more frequent deliveries of cream for buttermaking and the proper maturing of cheese in suitable temperatures before shipment, should be put into effect as soon as possible.

4 Some re-organization of the factory end of the business is imperative. The old ramshackle building with its poor equipment, of which there are too many, no matter how well it may have served in the past, must give way to something more in keeping with modern needs of the business. Every factory must have sufficient revenue to provide for competent cheese and butter makers. This will cost some money, but it is worth while, and will pay in the end.

5 There must be the fullest co-operation between all the elements that make up the dairying industry in Canada. Private or selfish interest must not be allowed to stand in the way of any improvement that has for its object the general good of the industry. The making of butter and cheese should be recognized as an important manufacturing business, which it is, and should be treated accordingly.

6 Finally, I would insist with all the emphasis possible that the unfair and demoralizing practice of holding cheese and butter makers financially responsible for "cuts" in the sale price of butter and cheese on account of defects in quality, should be dropped as quickly as possible.

In the Imperial Food Bulletin in a recent issue, commending the grading regulations, the following appeared: "Canada will always be up against formidable competition, both within and without the Empire, and her Dairy Policy will have to be well nigh faultless to regain lost ground and gain anew her former prestige." This applies equally to eggs, bacon, grain, etc. Farmers of Canada, this is a challenge to you. Farmers of Grey County, will you accept that challenge. It is for you to say. Results can only be obtained by giving your whole-hearted support to them, and regulations which will eventually raise your produce to the premier position in the British Market, with its attendant higher remuneration.

"I Can Now Do My Work Without Feeling Tired"

Mrs. A. Moffatt, Roxton Falls, Que., writes:

"I suffered from a run-down system and nervous debility. I could not sleep or rest at night, and felt so weak I could not walk any distance. I took several tonics, but they only helped me while I was taking them. Mother advised me to take Dr. Chase's Nerve Food, and I felt great benefit from the first box, and continued taking several boxes. Today I feel like a new woman, and am able to do my work without that dreadful tired feeling."
