Ford advertisement featuring an image of a Ford car and text: 'Why Ford Predominates Low First Cost The low price of Ford cars and trucks has been one of the great dynamic forces in the development of motor transportation. Since January 1920 the average price of Ford products has dropped 38% and Ford prices are now the lowest in the history of the industry. And because Ford prices are so low the worker and his family enjoy the innumerable benefits and delights of owning an automobile; the merchant and manufacturer extend their business into new and profitable fields by means of motor delivery; the farmer carries his fresh produce to the best markets with none of the old-time hardships and delay—and all for very small initial investment. Fifty out of every hundred cars and trucks in Canada are Fords—due to the public appreciation of Ford values. See Any Authorized Ford Dealer. Ford CARS TRUCKS TRACTORS'
