

The AUTOMOBILE

THE OUT PRICE FIEND.

I picked up a lot of good bargains to-day. At prices unheard of before. A corking wrench and a vise for the bench. And a hat to keep off the floor. A sponge and a chamis that's softer than silk. And a hose, quite the best ever known. Just the thing, I would say, that I'd use every day. If I had a garage of my own, I got a reduction on packing for pumps. And then they were having a sale of bumpers that soften the hardest of bumps. All guaranteed never to fail. I settled a tire for use for a spare that had been run very far. And for one forty-five got a book—"How to Drive". Now all that I need is a car.

—H. S. Osborne.

NOW IS THE TIME TO MAKE REPAIRS ON YOUR CAR.

Many of the car owners plan to have their motor-driven vehicles overhauled during the winter, when there is the least temptation to drive, and when the advantages of this time are the most. One of the advantages of this time is that garage mechanics are not likely to be hurried. It is better attention can be secured at this time.

When an engine has done good service it is good economy to have it overhauled thoroughly, every worn part replaced, every part tightened up, and every oil changed. It is better to do this now than to have it done later, when the weather is cold and the car is not being used. It is better to do this now than to have it done later, when the weather is cold and the car is not being used.

STORIES ABOUT WELL-KNOWN PEOPLE

Word Famous Author.—The author of the "Mystic" is a man of many talents. He is a writer, a poet, and a philosopher. His works are read by millions of people all over the world. He is a man of great intellect and a man of great heart.

Chosen on the Crested Waves.—The sea is a great power. It is a power that is always with us. It is a power that is always with us. It is a power that is always with us. It is a power that is always with us.

And you must flow open your door at once.—The sea is a great power. It is a power that is always with us. It is a power that is always with us. It is a power that is always with us. It is a power that is always with us.

People Who Live on Stilts.

In the story of "The Martians," Mr. G. Wells makes the visitors from another planet machine-like beings which walk on a sort of tripod, taking immense strides with these stick-like legs, against which the fastest runner is unable to compete.

It is a story of the "Martians," Mr. G. Wells makes the visitors from another planet machine-like beings which walk on a sort of tripod, taking immense strides with these stick-like legs, against which the fastest runner is unable to compete.

"Down a Peg."

The expression taken from a poem is applied by a witticist which appeared in a recent issue. It was very much to the point. It was very much to the point. It was very much to the point. It was very much to the point.

Some Interesting Facts.

On July 4, 1894, there was but one practical automobile in the world. The following year the first automobile race was run near Chicago. In 1898 England had more motor vehicles than four miles an hour. In 1905 there is to say that as many as possible got their drink before it came to the greedy one so that he might have the last drop, which contained all the drugs.

Bison are not the only boarders which receive free meals and lodging from the government at Watwright Park, Alberta. Some of the members of the elk family also live at the same address. They have become so tame that they don't resent advances from total strangers.

"My Shadow," by Robert Louis Stevenson.

One of the first, to recognize the genius of Sir James Barrie was Robert Louis Stevenson, and Barrie repaid him by using one of Stevenson's quaintest lines in "Peter Pan." Every child knows that it is for his lost "shadow" that Peter returns to the Darling children's bedroom.

The following poem is from Stevenson's "A Child's Garden of Verses," the greatest contribution to child literature since Blake's "Songs of Innocence":

My Shadow.

I have a little shadow that goes in and out with me,
And what can he be the use of him is more than I can see;
He is very, very like me, from the heels up to the head,
And I see him jump before me when I jump into my bed.

The funniest thing about him is the way he likes to grow,
Not at all like proper children, which is very, very slow;
For he sometimes shoots up taller like an india-rubber ball,
And he sometimes gets so little that there's a none of him at all.

Sleep.

Come, Sleep! O Sleep, the certain knot of peace,
The balmy-place of wit, the balm of woe,
The poor man's wealth, the prisoner's release,<
The indifferent judge between the high and low;

In An Old Street.

The twilight gathers here like brooding thought,
Haunting each shadowed doorway and its door,
With gone, forgotten beauty that was wrought,
Of hands and hearts that come this way no more.

Flower Gems in Glass.

Marvelous artificial blooms that resemble Nature's finest specimens in every respect, except scent, are being made by expert glass-blowers.

Every part of a flower or plant is faithfully reproduced, from the long, delicate stem and colored petals to the almost invisible pollen.

Her Gospel of Beauty.

I once knew a fine old Quaker grandma who would ask, "Now, which way do you like a root of this?" if she saw you admiring a flower she had provided it was one she could divide with you.

The Mystery of the Beehive

Nature has many marvellous secrets which mankind has not yet succeeded in solving, and perhaps the most fascinating is that concerning the manner in which bees succeed in building their honeycombs with such remarkable geometrical accuracy as to rival even the greatest of human engineers.

The bees' cells are hexagonal in form. A great naturalist named Reaumur, noticing this, asked an equally famous mathematician to calculate the angles, and so on, which would give the most space with the greatest economy of material in the construction of a cell similar to that of the bees.

The Queen's Circular Cell. In other words, if man endeavored to construct a cell such as the bees build, and wished to use the smallest amount of material and secure the greatest amount of space possible, he could not do better than the bee.

How have bees succeeded in solving this problem? Some of the latest theories have been put forward; but we are to believe the latest theories of various naturalists, the bees themselves do not deserve so much credit as she is given. The fact is that the bee is a creature of great intelligence, and she is able to solve the problem of the hexagonal cell.

Does a Garden Pay?

I am not sure whether my garden pays for itself. It takes a lot of work to get it into shape, and it costs a good deal of money to buy the seeds and the tools. But it is a pleasure to have a garden, and it is a pleasure to have a garden.

Milk in Bread Making.

The Chemist's Department of the Ontario Agricultural College studied experimentally the effect of whole milk, skimmed milk, condensed milk and milk powder in making bread.

Spice Work.

The agent marched up the four steps and rang the bell briskly. "Good morning, madam," he said, bowing politely to the mistress of the house.

A Prayer.

It is my life to lead, it is my life to lead, it is my life to lead, it is my life to lead, it is my life to lead, it is my life to lead, it is my life to lead, it is my life to lead.

MUSIC IN THE HOME

Music, I take it, is one of life's great pleasures. It is a pleasure that is always with us. It is a pleasure that is always with us. It is a pleasure that is always with us. It is a pleasure that is always with us.

Rippling Rhymes

The days of my years do not linger, the gait of old Time can't be slowed; he leads me along by the finger so fast that I burn up the road. I cry in the dawn, "It is morning," I turn, and behold it is noon; I sigh, and the shadows give warning that evening is coming dissonant. I cry in the noon, "It is winter," I shiver, and, odd ones, it is spring; this season departs like a sprinter, and summer is having its fling. And still I find time as I hurry to help out a neighbor or four, encouraging pilgrims who, warty, and dithering up hearts that are sore. "I'm never so busy," I mutter, "I can't do a kindness or three"; I carry the sick man some butter, the widow a firkin of tea. "Each minute is priceless," I chatter, "but still I shall pause for a spell, and visit that suffering hatter who fell fifty yards down a well." If a man would be counted a winner he'll look at his watch as he jumps; and still I shall comfort the tinner who's down with the heavens and the mumps. Life ends, with its plans and its worry, the treasures of youth are laid down; and what shall avail all my hurry, if there are no stars in my crown?

Swallowed the Object.

It was the "Object" drawing lesson where the boys were supposed to bring some article a hammer, a box, or what not, with them to school to serve as model.

Its Handicap.

The mistress of the house called fixedly at her servant, taking in her appearance from head to toe. "Mandy," she finally remarked, in a tone of kindly criticism, "your dress looks rather shabby. Hadn't you better have it turned?"

An Old Specimen.

It happened in the Adirondacks. "What," demanded the amateur hunter of his guide, "what is the name of the species I just shot?"

RED COFFEE

Pure! No chicorée!

HEALTH

BY DR. MIDDLETON

Scarcely over the life, is on the increase of 870 cases reported of January, 1905. During the month there were a number of cases of double pneumonia. Preventive measures known were kept in mind. Keep your health in good condition. Offer to your friends a glass of healthful coffee. The health of the nation is the health of the world.

When you are in a hurry, you can get a glass of healthful coffee. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you.

When you are in a hurry, you can get a glass of healthful coffee. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you.

When you are in a hurry, you can get a glass of healthful coffee. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you.

EA

Good for you. Good for you. Good for you. Good for you. Good for you. Good for you. Good for you. Good for you. Good for you. Good for you.

When you are in a hurry, you can get a glass of healthful coffee. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you. It is a drink that is good for you.
