The Harp. Our Might-Have-Beens. The harp was one of the favorite string instruments among most of the ancient peoples. Although very primitive to begin with, it was improved little by little, and more and more strings were from time to time added to it. The ordinary harp, sometimes called the big David's harp, which is played sitting or standing, and of which the strings are plucked by the fingers of both hands, has a range nearly equal to the piano. The harp tenets were originally produced by pressing the thumb against the neck of the strings or using hicks. The use of pedals for this purpose first came in 1820, and later seven, being the number. The pedals are also used to produce different tones and notes, and to make the tone louder or softer. Old as it is, however, the harp is one of the least complete of instruments of to-day.

With The BOY SCOUTS

Field Secretary Edgar T. Jones has just returned from a visit to some of our far north Troops and it is thought our brother Scouts, leaders and friends will be interested in learning how Scouting is shaping in these comparatively isolated places. He first wishes to remove the usually accepted idea that up there it is the "Frozen North." It is a wonderful country of splendid farms, forests of the finest timber, mines of gold, silver, copper, etc., a veritable "flowing with milk and honey" land, ready to receive a large influx of people, and undoubtedly possessing a great future. Scouting has gotten a firm grip there and is ready for all future extension and demand.

A GOOD MEDICINE FOR SPRINGTIME

Do Not Use Harsh Purgatives—A Tonic is All You Need.

Not sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite lacking, nervous headaches, and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia.
