

## Efficient Farming

### ATTACHMENTS FOR ARM MACHINERY.

John, who lives not far from me, that when buying new tools it pays to order the extra attachments which would add dollars to my income in the course of a year. These extras could be fitted successfully in a few minutes and required very little storage space.

He did not wait Blanton so he

had the trucking device and order with modern improvements.

As extra equipment he pur-

chased sets of bushels, col-

lectors, and a legging device,

which prepared to load corn,

wheat, and other grains on

the truck, and within the time

spent in a crop sale, his

work with his former outfit

was cut down to a minimum.

After a week with his outfit,

he began to work for himself,

and the results were excellent.

He has now a team of horses,

one team of mules, and a team

of cattle, and is doing well.

He has a team of horses,

one team of mules, and a team

of cattle, and is doing well.

He has a team of horses,

one team of mules, and a team

of cattle, and is doing well.
