If all the fish stories which we have heard are true there should be some instruction given as to the regulations governing the catching of trout. Rev. John Lennox, formerly of Temple Hill, who returned from California a few months ago after the death of his wife, who died at Arcata Calif., has received a unanimous call from the Presbyterian Church at Havelock. Orders for extra copies of the Standard, when Markdale's Chapter for the County Pioneer History will appear are coming in, one envelope containing a request for twenty copies together with the price, 5 cents each. The new C. P. R. service between Walkerton and Owen Sound was inaugurated Monday without any fuss or excitement, although we noticed by the announcement in one newspaper that Shelburne was due to receive a call from the new train between Saugeen Junction and Flesherton. We were in Shelburne a few days ago and it was still located about the centre of Dufferin county and there was no mention of changing its location so as to get in on the new train service. Possibly a map of Grey County would be a good investment for the newspaper in question.

Word was received here on Tuesday of the death that day at Meaford of Mr. Samuel Dutcher, father of Mrs. Everett Madill of this place.

There were a large number of visitors in Markdale for the opening of the fishing season on May 1st. Some fairly good catches of trout are reported and we have heard no complaints regarding the annoyance generally caused by the mosquito.

At the sale of the Madill butcher business held here on Saturday last Wm. McKennie was the highest bidder and is now in possession. He has engaged a practical man and by paying strict attention to the business and supplying first class meat hopes to merit a fair share of the trade.

On several occasions farmers residing close to the village have had reason to complain because of damage done by the boys from the village who use small rifles or other fire arms. Some of these young fellows cannot walk by an empty building without taking a shot at a window pane or the stove pipe if there happens to be one. This is a dangerous practice as there are times when animals make use of these buildings for shelter and to hit one of these with a bullet would be an expensive experiment.
