## GETTING BEST BY TEST SAVETHE GIRDLED TREES

FARM CROP EXPERIMENTS CONDUCTED BY DR. ZAVITZ

List of the Varieties to Be Tested This Year and Directions for Those Who Would Co-operate in This Work—Good Seed.

(Contributed by Ontario Department of Agriculture, Toronto.)

The Ontario Agricultural College has been particularly fortunate in originating, through hybridization and selection, the highest yielding varieties of several of the farm crops of Ontario as shown by results of experiments at the College and over the Province. Leading varieties of other crops have been secured locally or through importation.

Some of the new and interesting ones are: Field Cabbage, Suihua, Golden Wonder, Hubam Sweet Clover, Golden Nugget Corn, Sorghum, Perfect Model Sweet Turnip, etc. The following list indicates the material available for the co-operative experiments for 1925:

Number	Crop	Plots
1	Three varieties of Field Cabbage	3
2	O.A.C. No. 21 Earliest and Finest	3
3	Two varieties of Spring Wheat	3
4	Two varieties of Winter Wheat	3
5	Three varieties of Spring Rye	3
6	Three varieties of Spring Oats	3
7	Three varieties of Spring Barley	3
8	Japanese Beans	3
9	Eight varieties of Flint and Dent Hybrid Corn	3
10	Two varieties of Mangels	3
11	Three varieties of Field Turnips	3
12	Two varieties of Field Turnips	3
13	Two varieties of Field Turnips	3
14	Two varieties of Field Turnips	3
15	The planting of Corn at six distances in the rows	3
16	Sudgy Grass and other varieties of Millet	3
17	Sunflower and Corn for Fodder	3
18	Grass Peas, Vetches and Suihua	3
19	Rape, Kale and Field Cabbage	3
20	Three varieties of Binomial Sweet Clover	3
21	Two varieties of Alfalfa	3
22	Hubam, Binomial White and Binomial Yellow Sweet Clover	3
23	Three varieties of Field Beans	3
24	Stove Corn for test on different dates of planting from 1st to 15th of May	3
25	Low and High Grade Fertilizers and Manure with and without Sweet Clover	3
26	Different quantities of Lime with Sweet Clover	3
27	Three grain mixtures for Grain Production	3
28	Three grain mixtures for Fodder production	3
29	Hubam Sweet Clover at 100 and 200 lbs. per acre in rows for seed production	3
30	O.A.C. No. 72 Oats, at three dates of seeding	3
31	O.A.C. No. 13 Oats, at three dates of seeding	3
32	O.A.C. No. 211 Soy Beans, sown broadcast and in rows	3
33	Perfect Model Sweet Turnips thinned at three distances in the rows	3

Any person in Ontario who grows field crops may apply for any one of the experiments for 1925. Each applicant should make a check on the list as the material for the experiment might be exhausted before the application is received. The material to be forwarded in the order in which the application is received. No charge is made for the experimental material. The produce belongs to the property of the experimenter. A report is required after harvest. Each person should carefully write his name and address on the material. All material addressed to the Agricultural College, Guelph, Ont., requires full name—Issued by the Dept. of Extension, O. A. College.

**At Lambing Time.**

Cleanliness and good treatment two important things to keep in mind at this particular time. The head and arm of the attendant should be first washed with a little disinfectant such as carbolic acid or kerosene. The coal tar dips in the ewe's udder and the hand gently inserted into the vagina. The object should be to ascertain whether or not the lamb is coming in the proper position, that is head and front feet first. If the protrusion appears normal then it is a question of aiding delivery by gently pulling on the front feet of the lamb. At such times the lamb should be lubricated with linsed oil which tends to soften the vagina and allow it to stretch. Unless the case is a very severe one it will usually yield to treatment. Under conditions where the lamb is not coming in the proper position, then the case is a much more difficult one to handle. The lamb may be turned back, or again the hind end may come first, in any case it will be necessary to correct the position of the lamb. It requires considerable patience and very careful handling to do this in order to prevent injury to both lamb and mother. When the lamb has been put in the right position the ewe may be able to deliver it herself, but if unable to do so help may be given by the use of pure hog's lard inserted into the womb of the ewe after difficult parturition will be very beneficial in heating it in case it has been injured in any way. If she has been injured she should be kept in a dark and quiet place, and if possible a rubber tube attached to a syringe using some coal tar disinfectant or boracic acid in warm water.

**Use of Marl.**

Marl is a good form of lime for the soil that needs lime. Two to three tons per acre of air-dried marl will not be too much. Broadcast on the roughed land and harrow in. It is always best, however, to have marl sampled and analyzed before using. Marl, on air-drying it, readily crumbles, falling into a more or less fine powder which is easily distributed on the land.

**Fig. Fire, Accident, Automobile, Plate Glass, and other Insurance.** Marant's Bonds, etc., apply to Lucas & Henry, Markdale, Ont. 40ff.

**WOOD'S PHOSPHODINE**

It is the most powerful tonic and invigorant of the whole system. It is sold in three sizes: 1 lb., 1/2 lb., and 1/4 lb. It is sold by all druggists, or mailed in plain wrapper, for 25c. Address: THE WOOD MEDICINE CO., TORONTO, ONT.

**Cook's Regulating Compound**

A safe, reliable regulating medicine for the bowels. Sold in three sizes: 1 lb., 1/2 lb., and 1/4 lb. Sold by all druggists, or mailed in plain wrapper, for 25c. Address: THE WOOD MEDICINE CO., TORONTO, ONT.

**CHICKWOOD**

Chickwood is a very troublesome weed in stock or sowing places. Some seasons it is much worse than others as climatic conditions favor its growth or otherwise. Constant hoeing will keep it in check, and hand weeding is also often necessary.

**Sweet Peas and Pansies.**

If well-rotted manure is thoroughly mixed with the soil, sweet peas and pansies may be planted in same lines each year.

**For Service—Winsome Dick, one of the best registered hogs in Canada, is for service at the old stand. Wm. (Sooty) Elliott, Barkley, 43ff.**

## SPADE WORK THAT GETS THE TRADE

To get steady sales in satisfactory volume you must build up confidence in your store and its service.

Advertising in The Standard will give you the confidence of such confidence. Advertising in The Standard is the best way to tell the folks about your store, its service, and about the goods you have to offer.

Let our advertising in The Standard be a standing invitation to the folks around here. As a rule, Progressive Merchants Advertise.
