Scenery Under the Sea
The reported discovery of a plateau 150 feet beneath the surface of the Atlantic serves to remind us how little we know of the position of the earth's surface—nearly three-fourths of the whole—that is covered by the sea.

It was only in 1901 that the stupendous submarine mountain range was discovered by the cable ship Britannia.

The Edward VII. range too, in the North Atlantic, was unknown to oceanographers until comparatively recently, although some peaks rise to within 100 fathoms of the surface.

Near by is Mount Laura. Other, its summit, only thirty-six fathoms.

Vacuum cleaners are now being used to groom horses in the U.S. army.

Saves \$24 A Year

Cooking experts figure that the SMP Enamelled Ware Roaster will save the average Canadian family fully \$24.00 a year in meat bills. The secret is, it roasts the meat with very little shrinkage. Also, it makes cheap cuts taste like the best ones.

You place the roast in the roaster, put the lid on, and the roaster does the rest. No longer required. Every roast is perfectly cooked.

The cover fits close, so the cooking odors cannot escape. Grease cannot leak out, which means a sweet clean oven. It is a roaster that will save you money. Depend on it for \$24.00 yearly.

THE MERCHANTS' CORNER

Planning Your Advertising

The oftener your advertising appears, the more those possibilities every day, the more productive it becomes. You must never let the public forget your advertising. You must never give over your advertising to established trade a chance to forget you. You must exert every effort to complicate the situation. Among, bring in more frequently the occasions these are: The amount of money a customer, and to get an even increasing number of brand new customers; the character and variety of stocks; the size of each advertisement; the use of other means of advertising. These and other factors, with the problems and alternatives they present, must be carefully considered in planning advertising.

The year is the logical basis for the advertising plan. Each day holds sales possibilities. You must make

the appropriation to be used in the newspapers, a conservative allotment.

Never before in their history have the Canadian National Parks in the Rocky mountains had such an influx of visitors, both by rail and automobile, as this present season. This is now "on wheels" and the fore-sight of the Parks' authorities in opening up motor roads through the parks to connect with the great lines of motor travel, both in Canada and from the United States, has resulted in an immense increase in the number of automobile touring parties entering the parks. Last year the number was twice that of 1923 and this year, from the returns already in, it is certain that the 1924 figures will be greatly exceeded. What this means will be seen when it is stated that last season there passed, both ways, through Kamloops, the eastern entrance to Rocky Mountains park, 15,418 cars carrying 62,222 passengers. Large as these figures are, they will be much exceeded this year since they have been practically equalled by the totals to the end of July, 1925. The figures for the western entrance and for the Banff-Windermere highway show a proportionate advance. The various motor camps in the different parks are recording a greater number of parties than ever before. At Mount Rundle camp, in Rocky Mountain Park, the number of camping parties up to 21st July was 1,950 as compared with 1,280 for the same period in 1924. On one day this year there were 455 parties totalling 2,061 persons under canvas in this camp.

The number of visitors arriving by rail shows a gratifying growth, and this, combined with the increase of visitors by motor car, is reflected in the increased demand upon hotel space and in the greater use of park facilities. At Jasper Park, where the hotel accommodation was recently doubled, the Lodge has been taxed to capacity many times this season.

The year 1924 was the record one for the number of bathers at the Upper Hot Springs and the Cave and Basin in Rocky Mountain Park but of the middle of July this year the number had gone over 20,000, which was several thousand in advance of the same period in 1924. The largest single day this season saw 1,078 bathers at the different pools, which was nearly fifty per cent. more than the record day of last year.

Similarly the eighteen-hole golf course at Banff has been in almost constant use, while the new course at Jasper

had acquired the taste. Missionary (much encouraged) — "So you like religion very much?" Cawthal — "Yes, we acquired a taste for it from the last two missionaries we had."

Where Is Andy Gump?

THE Gump family is plunged in gloom! Min and Chester are desolate. Andy, the breadwinner, is still missing. Dame Rumor says that Andy is headed back to Toronto. There'll be a real clue next week.

Meanwhile, the best comic strips and magazine features are found every day in THE EVENING TELEGRAM. Rube Goldberg, Guy Williams, Blosser, Chic Young, W. J. Enright and others are daily contributors.

Read THE EVENING TELEGRAM every day for laughs as well as news. It is Toronto's favorite newspaper—read in five out of six homes. Buy it to-night from your news agent or subscribe now.

A GRATEFUL LETTER

From a Lady Made Well by Dr. Williams' Pink Pills.

Treaty Provides for Boundary Adjustments

Slight adjustments in the International Boundary between Canada and the United States which will remove certain anomalies and other difficulties in the work of the International Boundary Commission were provided for in a treaty signed at Washington on 24th February 1925. All matter concerning the boundary between the Dominion and the United States are handled by a joint commission composed of one commissioner from each country, Mr. J. D. Craig, Director General of Surveys, Department of the Interior, being His Britannic Majesty's Commissioner.

Maps of the vicinity of the north-westernmost point of the lake of Woods, based on notes of the survey of 1872, showed that this moraine boundary intersected in five places the boundary passing through the lake, and the treaty recently signed provides for the moving of the boundary point known as the "northwestern most point" of the lake of Woods, 4,783 feet due south, and thereby transferring to Canada two small water areas of about two and a half acres in extent which were formerly part of the United States, but which were entirely surrounded by Canadian waters, a somewhat anomalous situation. The treaty also stipulates that the southern boundary of the provinces of Manitoba, Saskatchewan, and Alberta, shall consist of a series of straight lines joining adjacent boundary monuments, instead of the previous series of curved lines which are difficult of determination. The straight lines never deviate from the curves of the roads more than a few inches, and the total area involved is only about 25 miles in length. In this case the United States, the gainer. A small zone of water in Grand Manan channel between the towns of New Brunswick and the state of Maine and formerly of controversial jurisdiction, has been divided between the two countries by extending the boundary 2,382 metres from its former terminus, to the High seas. The treaty also provides for the permanent maintenance of the boundary line in a state of effective demarcation by repair and removal of boundary monuments, and the reopening of boundary visits.

The adjustment of the boundary in the Lake of the Woods region is a matter of considerable satisfaction. The earliest reference to this point is contained in the description of the boundaries of the United States in the Treaty of Paris of 1763. By the treaty of Ghent, 1814, commissioners were appointed to decide upon the boundaries within the Great Lakes as far west as the north-westernmost point of the lake of Woods. In 1818 the 45th parallel of latitude was decided upon as the boundary line of the Woods in the Rocky mountains. In 1823 the latitude and longitude of Paris is 90 feet high. The masts are among the tallest in the world, and are twice the height of St. Paul's dome. Five other stations are being built simultaneously with Rugby—at Bodmin, Bridgewater, Skegness, Ormskirk and Dorkesher. Britain confidently hopes to lead the world in wireless development, and link up with the Mother Country not only the far-flung Dominions and colonies, but every other part of the world.

A few months ago the newspapers recorded Palmquist's death. He was drowned in a pool barely six feet deep.

Britain Leads in Wireless Progress.

The new wireless station which the British Government expects to open next year at Rugby will make it possible for Great Britain to talk to the entire world within the aid of inter-medies. Trials start in November with twelve "Eiffel Towers," as the giant masts, which rise 320 feet in the air, are called. Never before has the Eiffel Tower in Paris been approached so nearly in height with the British Empire, although the famous tower in Paris is 99 feet high. The masts are among the tallest in the world, and are twice the height of St. Paul's dome. Five other stations are being built simultaneously with Rugby—at Bodmin, Bridgewater, Skegness, Ormskirk and Dorkesher. Britain confidently hopes to lead the world in wireless development, and link up with the Mother Country not only the far-flung Dominions and colonies, but every other part of the world.

Baby's Own Tablets Are Fine for Nervous Sleepless Children.

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these tablets which are pleasant tasting little lozenges that promptly relieve the minor ailments of young children.

Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, Auburn, Me. "My little girl was nervous and could not sleep.

"Bill Bird—'It's a cinch these cherries will never make a pleat.'

A Family of Z's.

Some persons have a queer, not to say a perverse, humor in names, and when they happen to be parents they often inflict on their offspring names that are a lifelong embarrassment. A writer in the Boston Herald recalls the case of a man named Zorrel Cook, who, having been cursed with an unhandy name, determined that all his children should suffer with him.

Zorrel Cook married Polly Lombard at Henderson, New York, early in the nineteenth century. His large family of children were named as follows:

Zorrel, Zerome, Zerimus, Zephronia, Zerodria, Zedina, Zogotus, Zelora, Zethaniel, Zeruth, Zelobus, Zedella and last of all James.

It is fair to presume that James was a posthumous child. If Mr. Cook had lived the boy would probably have been named Zephaniah or Zebrahabel.

Last Liar Has Best Chance.

"When I was in India," said the club-bora, "I saw a tiger come down to the water where some women were washing clothes. It was a very fierce tiger, but one woman with great presence of mind, splashed some water in its face and it slunk away."

"Gentlemen," said a man in an arm-chair, "I can vouch for the truth of this story. Some minutes after the incident occurred, I was coming down to the water. I met this tiger, and as is my habit, stroked his whiskers. Gentlemen, those whiskers were wet."

Willie's Proxy.

"Willie, won't you have some more ice cream?"

"No, ma'am. Mother says I don't want any more."

Color Six Centuries Old.

Beige, the frothy color of the day, was popular six centuries ago. Monks who illuminated old manuscripts used this color for garnishing their saints and angels.
