Canadian National Oil Electric Cars.

The Canadian National Railways have put into service amentifely new type of motive power which may go fair towards solving two of the most service problems steam roads are facing, namely, high filed costs and the competition of motor bus and lorry on the public high-ways. The oil electric cer is the name given to this new method of locometion and its creation is due to the mechanical officers of the National Railways who conceived the idea and carried it through. Relatively speaking the principle behind the power which drives the car, is simple. In one end of the ear is located a light-fuel oil engine operating on the Diesel principle and this engine drives an electric generator which provides the energy to move the car. The engine is started by a small electric motor operated from storage batteries and these batteries are, in turn, recharged by the generator when it begins to function, so that the cycle of performance is a close approach to perpetual motion.

Two sizes of cars have been built, the large or articulated type and a small type. The top photograph shows the large or articulated type and a small type. The top photograph shows the large type, consisting of two bodies being attached to the ends of the two bodies being attached to the ends of the two bodies being attached to the ends of the two bodies being attached to the ends of the two bodies being attached to the small car trip coat \$3.59. To safety locking pin, that the rear car is a photograph of the car has a total length of 102 feet and can accommodate 126 to corner is a photograph of one end of the car is located a light-fuel oil engine operating on the Diesel principle and this engine drives the car, is started by a small electric motor operating on the corner is a photograph of one end of the car is located a light-fuel oil engine operating on the corner is a photograph of one end of the car. The engine is started by a small electric motor operation of the first trial run of the small car.

. These Workers Are Happy With Their Carnings

I have over one thousand letters in my office written by men and women who are only the glad to tell others of their cuevess. I only wish that I could print them all fer you to read! Think how pleased Mrs. George Poole of Ontario must, bu that she sent me her name four years ago, Here is part of her have letter: "I have had my machine over four years, since taking up the work'! have never heen without money. As we live three miles from towns I have always wanted a car, and now I have one which my Auto Knetter is paying for. Last winter cleared \$525.00." And part of a wery interesting letter from Mrs. James Shaw, also of Ontario, reads as follows: "We have had our machine three years. -Last fall from October until two days before Christmas, it brought me in \$400.00." While most of my workers ire women, hundreds of men find-it profitable to turn their space time into dollars. Listen to Mr. Arilington Praser, who lives in a small Ortario town: "I was a little afraid of starting as I had never seen a kulting machine, but with the help of the instructions it was easy. I have only had the machine

five months and I have made \$325.69 in my spare time." When
