ANALYSIS.

PAUL'S FAITH AND PRACTICAL SAGA-CITY IN A GREAT CRISIS, COURS. II. THE SAFE ESCAPE TO LAND, N. 44...

INTRODUCTION—The narrative of the voyage of Paul to Rone is the most valuable document regarding ancient methods of navigation which has come down to us from antiquity. This excellence it owes to its being the exact account of an eye-will be and having attached himself to Phurand having noted in his journe, the and having noted in his journal the whole details of the adventure. But apart from this technical value, the narrative thraws a most interesting light on Paul's practical wisdom and

his active to assume the functions of leift street in a great material crisis.

Whether safety of the ship is threat-ched by storm and mutiny, he displays a remarkable presence of mind before o a remarkable presence of mind before which the commander of the ship and the military officers on board have simply to give place. And this massil tery of the situation he owes to his mindiple faith in the power and goodness of God.

In the present lesson we are dealing with the practical measures adopted to save a ship rather than with the teaching with which Paul bought to save the souls of men. Yet or religion has to do with the whole of

is tince religion has to do with the whole of sorn life, and we see the power of faith no less in the practical counsels put forward by Paul at this moment than in the sermons which we have heard from him on so many occasions. It PAUL'S FARIN AND PRACTICAL SAGA-
