Canadian Assets of Uncounted Wealth

CANADA'S progress in the development of her forests and water powers has been in the nature of a triumphal march toward supremacy. Here are two tremendous industries that have grown in a few years to great proportions, forging ahead and developing hand-in-hand the rich assets of our practically unexploited tracts of timber and our hitherto unharvested waterfalls and streams.

Canadian production of newsprint is now proceeding at the rate of more than a million and a half tons per annum and the industry not only employs thousands of men, but yields satisfactory returns to many investors. It is one of Canada's newest and strongest branches of trade. Our main water-power developments have been followed by numerous new enterprises. Canada's abundance of water power will bring scores of manufacturers from below the border to this country.

The Bank of Toronto has been of valuable service in assisting the industries that are building up the nation. Its service to business of great magnitude has never obscured our conception of our duty to the people as a whole. The transaction involving a hundred dollars is given the same willing attention as that which deals in larger amounts. It is this service to all policy which has made of the Bank of Toronto an institution worthy of the finest traditions of Canadian banking. Everyone may feel certain of friendly reception and helpful co-operation at any of our branches.

(Special to The Standard.)

Born—On Friday, May 7th, 1923, to Mr. and Mrs. Calvin Boyce, a son.

Mrs. Alex. Hoy has returned home after visiting her grandmother, Mrs. Parliament, and other friends at Paisley. She also called on Mrs. Fred Graham at Walkerton.

Sunday last was Mother's Day. There was a good attendance at church. Rev. J. H. Harrower preached an enthusiastic sermon appropriate to the day. He chose for his text the 27th verse in Chapter 19, of the Book of John. The selections rendered by the choir, the hymns and service were all in honor of Mother. Bouquets of flowers were worn for the occasion.

Pleased to see Mrs. Adam Smith able to be out again after her recent illness of influenza. Mr. Joseph Hawkins is now able to take a walk from the village to his farm. Mrs. Leppard is now able to be out of bed after her severe attack of pneumonia and is steadily regaining her health again.

We extend our profound sympathy to the Adams family in their recent sad bereavement. Mrs. Chas. Martin of this place is a niece of the deceased.

Mr. Roddy Gordon of Toronto arrived last week to visit a few days with his wife and family here. Mr. Gordon had a good position in the erection of the new Maple Leaf Stadium, Toronto. The stadium is built right down in the park area of Toronto's new harbour. Soon it will be surrounded with flowers, shrubbery and the home of aquatic clubs. Provincial boulevards lead up to the main entrance and there is free parking space for between seven and eight thousand automobiles. Looks like this will be Ontario's ball park, not merely Toronto's.

Mr. and Mrs. W. E. Walker attended the miscellaneous shower given in honor of Mr. and Mrs. Newton Hutchinson, and their son, Mr. and Mrs. Hutchinson a prosperous and happy journey through life.

The falls here has been possessing its old-time grandeur this last few weeks. During the spring freshet the lake overflows, the water rushes over the dam and follows the river course to the falls, thus making the falls beautiful as of yore. Many people have been here to get a view of the falls at this time.

Now is the time of the year to make our yards and streets pick and span so when visitors and tourists come to our little village everything will be pleasing to the eye and see what a picturesque little burg we will have.

Asbury Day was observed in our school last Friday. It was a fine day. The children worked diligently cleaning the school and yard and planting flower seeds. In the afternoon some of the ladies of the section spent a few hours with the children at the school. Lunch was served. All took a walk to view the falls and then to the dam where the overflow of water also presents a beautiful scene.

(Held over from last week.)
