Talks on Bread and Other Things

The fundamental importance of Bread as the main food, the lowest priced food, the food which contains more of the elements of nutrition needed in the daily diet of both young and old than any other single food of general consumption, is universally acknowledged.

With sufficient bread and milk the children are well fed.

Bear Hunting in Rockies Best In History

In the Big Bend district of the Upper Columbia River in British Columbia lies the largest tract of grizzly bear hunting territory in the Dominion. On the two hundred mile stretch between Revelstoke and Kamloops, both on the main line of the Canadian Pacific Railway, there are approximately thirty creeks, some large enough to be classed as rivers. Of these at least twelve are known to be the habitat of the grizzly which, as of them have not heard the sound of a rifle in years.

This spring a systematic effort was made to place the hunting possibilities of this great district within the reach of prospective hunters in search of the thrill which only close quarters with Ursus horribilis can produce. Through the cooperation of all the best known sportsmen on the Upper Columbia, traps can be made in comfort. Game and fish are plentiful and the scenery is sufficient to satisfy the desire for water such as exists in the about the end of May it is possible to run in safety such well known waters as Surprise, Kimbark, Gordon, Picket and Death Rapids, as well as the far-famed Canyon of the Columbia itself. This trip appears to many as fully as the actual hunting.
