Carillon Towns.

ve the noise of a crowded stree just been visited. They differed much, was it to be defined? In this reflective mood, again my ear caught the sound of he bells. They answered the ques tion. It was the tower melodies which united these places, inflyidual as they were in other respects. Then came the thought: Why should one not see the many carillons of the Low Countries, each in its own historic place, and write them down for foreign wan-

Thereupon we set forth to find the carillonneur at the Hague; courteously he gave us suggestions and advised us to consult the bell-master at Gouda. So we betook ourselves to Goud and sought out the carillonneur, who told us a friend of his had come upon con- the roads, an siderable information about carillons in some old volumes in the library. By the best of good fortune it turned out two days of each week when the

Outside it was a deluge of rain. with a black sky. Within the library we were dry, it is true, but there were no lights. Just at closing time the book of most importance to us was minutes left, and with a fair list of carillon towns safely recorded in our olebook we went back to the Hague. That very night, the most convenient of messages, the postcard, with paid reply, was ddispatched to "Den Heer Clokkenist" of the principal Dutch nd Flemish towns.

By noon the next day replies began ome. . . A morning or two later the long time old "portier" at the hdtel, affectionately regarded by many traveler, held up a dozen answers o his ear, as if listening to their message, and greeted me with: "Hush, I hear carillons ringing through all the

nd." With the answers came many necial invitations. Several ines a bell master volunteered (if the orgomaster gave permission, to play some other time than the regular our, if it would convenience us. . . in the Low Countries all the carillon was are so near one another that tle foreplanning is needed. he Viriln region, indeed, has an area anly

out twice that of Wales or of the ate of New Jersey. It is in form most a right triangle with Malmedy, southeast of Liege, at its right angle, and with its hypothenuse, running fom Boulogne to the mouth of the Ems, northeast of Groningen, along the North Sea coast-line of Relgium and Holland,-William Gorham Rice, "Carillon Music and Singing Towers thed Ol World and the New."

Scientists Testing Truths

of Cold Shoulder Theory Scientists of Amsterdam have been easuring the amount of heat given It by the human body to find why ome parts give of more heat than thers. Drs. E. Sluiter and G. van linberk devised an apparatus for tudying the temperature of the skin; overed and uncovered, and found hat much less heat was given off over yers of fat and a great deal more here the skin lay close to bony suraces.

Whether this neans that people puilt on generous lines are as cool as cucumbers on the outside and "red hot" within, with skinny folks just he opposite, is not stated. However, the experiment would seem to indi- cause and one cause only-a disordercate that a fat person might make the ell condition of the stomach and coolest bedfellow on a hot night.
