DUKE WITNESSES BUSH CARNIVAL IN QUEENSLAND

Spear Throwing by Aboriginals in Beaudesert Amuses Royalty.

Brisbane, Queensl.-No more distinctively Australian scene was wit- som nessed by the Duke and Duchess of York during their recently concluded tour of the Continent than the bushman's carnival and native corroboree at Beaudesert, Queensl. The royal car was escorted by a detachment of mounted troops from the wayside railway station to the field, where a troop of 50 stalwart mounted bushmen in His own vacation having flow, blue shirts and slowched hats gave a For what shall he who sings remarkable exhibition of bareback riding and cattle drafting.

Afterward a number of aboriginals from the Baarmbah settlement, fantastically garbed and painted for the occasion, rushed into the ring with spears, boomerangs and woomeras and began a spear-throwing competition. The spears were thrown a great height and quivering in the air, landed point first in the ground around one of the performers who constituted himself the target. The spears fell in showers almost at his feet as he Some folks can't work before ta moved away at various distances. A Tributary Nation. Quebec Evenement (Conc.): The conomic advantage enjoyed by the United States as compared with Can da rests in the formidable tuctics em ployed by them to acquire protection against our competition, whilst we leave them, free to lavade our territory to the detriment of our own workpeople. The American nation floods the Canadian market with ite products, but it is impossible for our articles, with the exception of a very few, to compete upon the American market. The American worker thus has the advantage of selling at home and in Canada, while we can only sell in Canada. The day this unequal sit uation is changed to our advantage we shall see the best American work-men demanding entrance into Canada In the meanwhile we are and shall remain a tributary country to the United States. Why Firestone Tires Are Better

One of the outstanding developments by Firestone Engineers is the Gum-Dipping process which impregnates and insulates every fibre of every cord with rubber-adding strength to the cords and reducing internal friction and heat so destructive to tire life.

The Firestone Dealer in your locality will gladly explain to you the extra value of Gum-Dipping. He is prepared to demonstrate how the cords of the carcass are saturated in a rubber which makes motoring more economical with added comfort and safety.
