

# EXCLUSIVE

## Willys-Knight with its Exclusive Sleeve-valve Motor is now obtainable at New Low Prices

The Willys-Knight sleeve-valve engine is patented, protected, exclusive. The only automobile engine in the world that actually grows smoother and more powerful with use. An engine that other car manufacturers would gladly pay millions of dollars for the privilege of using.

Because of its simple sleeve-valve construction, there are no carburettor troubles, no valve-grinding, no springs to weaken, nothing to adjust, nothing to replace or repair.

Now, Dufflex Shackles—another exclusive feature—replacing the older-style metal shackles used

on other cars. Dufflex—a noiseless flexible shock-absorbing, rubberized fabric—deadens road vibration, cushions the whole car, keeps the chassis permanently silent, and diminishes wear.

These advantages plus the comfort of the magnificently-built chassis—the regular beauty of line and finish—the richness and completeness of equipment—make the Willys-Knight Sixes the most advanced of today's motor cars. The new and wonderfully low prices make them the greatest values that have ever been offered in quality automobiles.

May we arrange a demonstration.
