Weeds will be tolerated no longer in Ontario. The Ontario Legislature has placed its seal of approval on the new act which provides that allowing noxious weeds to grow is an offence punishable by a fine of not more than \$20 nor more than \$50. The farmers must cut not only weeds on their farms but also the weeds on the highways adjoining their farms. If they do not attend to the weeds on the roads, road commissioners will do the cutting and the cost will be charged at the rate of 75c per lot. The money will be used in repairing roads. The fact that the minimum fine is \$20 indicates that the Legislature really means to put teeth in the new law. The act will be enforced by weed inspectors. Township councils are charged with the appointment of the inspectors, who may, instead of bringing the land owner into court, cut the weeds himself and charge the cost to the farmer.

Legislation establishing all Provincial highways as "stop streets" will go into effect in Ontario right away. A special date for launching the new motoring regulation will be set. The Department of Highways has prepared 5,000 "stop" signs, which will be scattered throughout the country as rapidly as possible. As these signs are located, the motoring public will have to recognize them. Intersections of highways and county roads will be first cared for. Junctions of township roads and highways will next be looked after. The new system aims at reducing motor accidents in the country to the minimum. It requires, in fact, all vehicles to come to a dead "stop" before crossing a Provincial highway.

Here and There

The estimated gross agricultural wealth of Canada is \$7,500,000,000 according to the Department of Interior.
Concluding a stay in Canada, the Marquess and Marchioness of Exeter accompanied by Lady Winifred Cecil, sailed from Quebec recently on the Canadian Pacific steamship Minnedosa for England.
An aeroplane passenger and freight service to the central Manitoba mine area was inaugurated on June 1 by the Western Canada Airways. Limited, making the first commercial service to be operated in the Province.
Foundation work is proceeding rapidly on the new addition to the C. P. R. grain elevators at Port McNicoll, which when completed will have a storage capacity of 6,000,000 bushels, instead of the present capacity of 4,000,000 bushels.
A total of 1,384 English boys have already been moved from the U.S. and placed on farms in Quebec as an experiment of the British Immigration and Colonization Association according to the figures given out at the annual meeting of that organization.
According to figures of the Canadian Government, Canada has all countries of the world by a wide margin as an exporter of wheat. From August 1 to December 31, 1926, in that period Canada shipped 167,795,000 bushels; her closest rival being the United States with 94,191,000 bushels.
Days of the covered wagon were recalled recently. Mr. and Mrs. G. Barker and six children arrived at Blenheim, Saskatchewan from Parsall, North Dakota, in outfit consisting of a covered wagon, 19 head of horses and five wagons carrying their household effects and farm implements. They leased a half section of land.
General individual travel through the Canadian west is expected to be very heavy this year according to R. G. McNeill, general passenger agent of the Canadian Pacific Railway at Winnipeg. Several important parties will add to the number of travellers especially through the Canadian Rockies regions.
The life of John Pope, sailor aboard the American vessel Saturn, was saved recently by instructions volunteered by Surgeon Taylor of the Canadian Pacific steamship Minnedosa, after Pope had been accidentally injured by a fall of sixty feet from the mast. The two ships were 130 miles apart but how to land the injured and the ship and rushed to Quebec.

EXCLUSIVE

Willys-Knight with its Exclusive Sleeve-valve Motor is now obtainable at New Low Prices

The Willys-Knight sleeve-valve engine is patented, protected, exclusive. The only automobile engine in the world that actually grows smoother and more powerful with use. An engine that other manufacturers would gladly pay millions of dollars for the privilege of using.
Because of its simple sleeve-valve construction, there are no carbon troubles, no valve-grinding, no valves to weaken, nothing to adjust, nothing to replace or repair.
And now, Belflex Shackles—another exclusive feature—replacing the older-style metal shackles used on other cars. Belflex—a noticeable flexible, shock-absorbing, rubberized fabric—deadens road vibration, cushions the whole car, keeps the chassis permanently silent, and diminishes wear.
These advantages plus the comfort of the magnificently-built chassis—the regal beauty of line and finish—the richness and completeness of equipment—make the Willys-Knight Sixes the most advanced of today's motor cars. The new and wonderfully low prices make them the greatest values that have ever been offered in quality automobiles.
May we arrange a demonstration.

According to figures of the Canadian Government, Canada has all countries of the world by a wide margin as an exporter of wheat. From August 1 to December 31, 1926, in that period Canada shipped 167,795,000 bushels; her closest rival being the United States with 94,191,000 bushels.
Days of the covered wagon were recalled recently. Mr. and Mrs. G. Barker and six children arrived at Blenheim, Saskatchewan from Parsall, North Dakota, in outfit consisting of a covered wagon, 19 head of horses and five wagons carrying their household effects and farm implements. They leased a half section of land.
General individual travel through the Canadian west is expected to be very heavy this year according to R. G. McNeill, general passenger agent of the Canadian Pacific Railway at Winnipeg. Several important parties will add to the number of travellers especially through the Canadian Rockies regions.
The life of John Pope, sailor aboard the American vessel Saturn, was saved recently by instructions volunteered by Surgeon Taylor of the Canadian Pacific steamship Minnedosa, after Pope had been accidentally injured by a fall of sixty feet from the mast. The two ships were 130 miles apart but how to land the injured and the ship and rushed to Quebec.

EXCLUSIVE

Willys-Knight with its Exclusive Sleeve-valve Motor is now obtainable at New Low Prices

The Willys-Knight sleeve-valve engine is patented, protected, exclusive. The only automobile engine in the world that actually grows smoother and more powerful with use. An engine that other manufacturers would gladly pay millions of dollars for the privilege of using.
Because of its simple sleeve-valve construction, there are no carbon troubles, no valve-grinding, no valves to weaken, nothing to adjust, nothing to replace or repair.
And now, Belflex Shackles—another exclusive feature—replacing the older-style metal shackles used on other cars. Belflex—a noticeable flexible, shock-absorbing, rubberized fabric—deadens road vibration, cushions the whole car, keeps the chassis permanently silent, and diminishes wear.
These advantages plus the comfort of the magnificently-built chassis—the regal beauty of line and finish—the richness and completeness of equipment—make the Willys-Knight Sixes the most advanced of today's motor cars. The new and wonderfully low prices make them the greatest values that have ever been offered in quality automobiles.
May we arrange a demonstration.
