

# All Grocers Stock "SALADA" TEA

If you want something better—try it.

by Rafael Sabatini

## CHAPTER XI—(Cont'd.)

In the background, on a settee at the salon's far end, sat Aline staring in bewilderment and seeing for the first time, which, if unrecognizable through the mask of blood and dust that smeared it, was yet familiar. And then the man spoke, and instantly she knew the voice for that of the Marquis de La Tour d'Azyr.

"In danger?" Almost he stepped suddenly to laugh at the unnecessary question. "If I were to show myself openly in the streets just now, I might with luck contrive to live for five minutes."

He peered off the shaggy creature, and casting it from his thoughts, forth in the black, satiated that had been the general history of the hundred knights who had rallied in the Tulleries that morning to the defence of their king.

"My dear friend, unless you carry charitableness to the length of giving me to drink, you will see me perish of thirst under your eyes before ever the cannals has a chance to finish me."

"She started. I should have thought of it," she said in self-reproach, and she turned quickly. "Aline," she began, "I have a request to bring to you."

"Then, as Aline rose to view, she stepped from her background, and he had just perceived her he heaved himself from the shaggy creature, and he crossed the space of gleaming floor. "Madeleine," he said, "I had not suspected your presence here, and he seemed extraordinarily ill at ease, as if he were in an illicit net."

"I perceived it, monsieur," she answered, as she advanced to do Madame's commission. She paused before him, and from his heart, monsieur, I realize that we should meet again in circumstances so very painful."

"And since the day of his duel with Andre-Louis, the day which had seen the death and burial of his last hope of winning her—had they stood face to face."

"But if, monsieur, I beg, you are fatigued."

"You are generous to observe it. With your permission, then," and he resumed his seat. She continued on her way to the door and passed out with a hurried glance.

M. de La Tour d'Azyr, at last pleased, and with a sigh that he might endeavor to take some rest. When he had gone, Madame persuaded Aline to go and lie down.

Left alone, Madame lay down on a couch in the salon itself, to be ready for any emergency.

The timepiece on the mantelpiece chimed the hour of ten, and then, startling in the suddenness with which it broke the immediate silence, another sound vibrated through the feet in a breathless mingling of hope and dread. Someone was knocking sharply on the door below.

Moments of agonized suspense, culminating in the abrupt invasion of the room by the footman Jacques. He looked round, not seeing his mistress at all.

"Madame! Madame! he panted, out of breath. "There is a man below. He is demanding to see you at once."

She was perfectly composed. "Conduct him to me, and then beg Mlle. de Kerouan to join me if she is in."

The door opened again, and Jacques reappeared; after a moment's tapping briskly past him, came a slight man in a wide-brimmed hat, adorned by a tricolor cockade. About the waist of an olive-green riding coat he wore a his side.

"Andre-Louis!" she exclaimed.

CHAPTER XII: That gift of laughter of his seemed utterly extinguished.

"Rougeaux could not return," he informed her shortly. "At M. de Kerouan's request, I came instead."

"You! You are sent to rescue me?" The note of amazement in her voice was stronger than that of her relief.

"That, and to make your acquaintance, madame."

"To make my acquaintance? But what do you mean, Andre-Louis?"

## The New Ford The Coming Car is the Result of Years' Intricate Planning

"Has Henry Ford adhered too long to the single model T?" is the question answered by Samuel Crowther in the August issue of The Magazine of Business.

It was known that the change to a new model must come some day. But when? That was the question which Mr. Crowther analyzes.

"The designing of a new model offered little difficulty. For years the experimental laboratories at Dearborn have been turning out various sorts of cars under the direction of Mr. Ford and his engineers, as well as trying out all sorts of materials.

The great problems of a new design were those of which the public never thinks—the methods of production and the ability to obtain the materials.

"The Model T was produced to give individual transportation to people in general at a low price. The car was built to last and that belief it is due to you that you shall know when you are saving."

(To be continued.)

Touch of the Vanished Hand. Armless though he is, Charles Yulak, fifty-five years of age, has made such a success of the beading profession that he has \$4,053 in five different banks where he readily can lay hands on it—Los Angeles Times.

"When Americans fall in love with an idea, their enthusiasm is always intense even if it does not last."—Andre Tardieu.

Lindbergh has been presented with a life pass over the Canadian railways. One can presume, however, that he will continue to prefer the air route.

Men are like mosquitoes, easier to catch after a full meal.

Two years ago '81 changes were made in Model T. Mr. Crowther enumerates the difficulties involved. He set a date to begin changing over. The planning department had to calculate just the amount of material which would keep production going at top speed until that date and then permit any material left over to be used in design 4,759 punch and die and 6,500 jigs and fixtures. The labor cost of this amounted to \$5,682,387, while the materials ran to \$1,325,596. That is to say, these changes cost us \$7,007,983.

"If you have a mathematical turn of mind, you can estimate the work involved and the money cost of a complete new model, and then add to that the money lost during the time of production. That is not all. In designing for 2,000,000 units a year, one must make certain that the materials can be obtained without crowding the market. It has often been suggested that Ford cars would look better if they were upholstered in leather. So they would—but there are not enough leathers in the world to provide the material."

At the bottom of the fall of sales during the first half of the year, Mr. Crowther points out, is the fact that the Ford company is not making Model T cars, but is preparing for the introduction in car industry which at some day will be written as an industrial epic.

A Democratic Game. Robert Hunter in New York Scribner's Magazine: Golf has always been the most democratic of sports. Common hand by the sea is usually called the links; and all of the historic courses—such as 14th, Aramsted, Musselburgh, Blackthorn and St. Andrews were laid out on common land. The best players have usually been artisans. Golf in earlier centuries seems to have been the favorite sport of the common and hennier sort of people. Whether they had easy access to the links. History is very uncertain as to the origin of the game. There are those who are convinced that it was imported from Holland and it is not unreasonable to believe that the Scottish sportsmen of property and position may have brought balls and clubs from Holland and adapted the Dutch game of Kolf to the links of their native land. In any case, it has been the game of the common for centuries and the pastime of the people residing near such public ground.

Some Conservative M.P.'s speak too loudly, as critics. Labor members complain that a man can't hear himself interrupt.

Spillwater at Mansfield: Is your husband a member of any club? Wife: He is a member of the public house.

This is the reason you quit the comforts of home and pay an exorbitant rent for an overblown shack by a mosquito-infested river, where the drinking water is warm and the fishing is rotten, and call it a vacation.

Hon. J. Malcolm, Minister of Trade and Commerce at Ottawa, arriving on the "Aquitania." In the group, LEFT TO RIGHT, Mr. and Mrs. Malcolm, Mr. and Mrs. R. O. Campney, of Ottawa, and F. K. Morrow, of Toronto.

## Callouses Wilson Publishing Company

Quick, safe, dull relief from painful callouses on the feet. Dr. Scholl's Zino-pads. Put on and pain is gone.

A NEW STEP-IN CHEMISE. The woman or girl who enjoys making dainty undergarments will find the attractive step-in chemise shown here quite simple to fashion.

View A has face sewn around the straight top edges, while View B is untrimmed. No. 1623 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 1 1/2 yards 36 or 39-inch material, and 5 yards 2 1/2-inch lace for View A. Price 20 cents the pattern.

The secret of distinctive dress lies in good taste rather than in lavish expenditure of money. Every woman should want to make her own clothes, and the home dressmaker will find the designs illustrated in our new Fashion Book to be practical and simple, yet maintaining the spirit of the mode of the moment. Price of the book 10 cents the copy.

HOW TO ORDER PATTERNS. Write your name and address plainly, giving number and size of such patterns as you wish. Enclose 20c in stamps or coin (coin preferred) wrapped carefully for each number and address your order to Pattern Dept., Wilson Publishing Co., 73 West Adelaide St., Toronto. Patterns sent by return mail.

The Husband Errant. London Daily Telegraph. (Conts.) The body who is a director of the Chicago Service Bureau is busy in year in year out, investigating why husbands leave their homes. For a long time past Miss Underhill has handled 50,000 cases of desertion annually. Yet in advantage, it is a confession of impatience that she writes of the head of the University of Chicago, that she is a Christian. In all her innumerable cases of fugitive husbands Miss Underhill classifies them as "deserters." By this she means to mean proof that the husband errant had every right and reason to depart and the wife was wholly intolerable. There are philosophers who hold that in every quarrel both sides are to blame, but this philosophy is too subtle for the honest human reason. Without pretending to a fraction of Miss Underhill's vast experience, of human incompatibility, we are prepared to maintain that there are cases of desertion in which the deserted is altogether right. This is the most austere divine axiom, and surely Chicago is not such a hollower of conventional felicity that the thing is not there known.

Reasonable. "I wish you wouldn't keep humming that same tune over and over again." "But there are twenty reasons."—Amherst Jeff.

Another alliteration which is popular in Canada is: Canadian Coal for Canadian Citizens.

## Kitchen Kinks DISCUITS BAKED IN A FRYING PAN.

On day outings in the country, or when camping, one sometimes wishes to bake biscuits but has no oven. Every camper, however, has a frying pan. Grease the entire inside of the frying pan, sides and all, and heat it.

Make the biscuits very thin, so they will not quite reach the top of the pan when fully raised. Fill the heated pan with them, put a tight cover over the pan, weighting it down, and then watch the fire to see that it remains hot enough but, not too hot. In this way the pan becomes a little oven and bakes very well indeed. Since the biscuits will bake in just a few minutes, the first batch may be kept hot, wrapped in a cloth, while a second or third batch is baking.

RIPE PEACHES STEWED. It sometimes happens that one has on hand peaches that seem almost too small to peel, or they may be so hard they are not fit to use. When this occurs use half a teaspoonful of sugar to a pint of water and add half a tablespoonful of fresh butter. Put the peaches in and cover the vessel; boil till the fruit is tender. Serve hot. The peeling can be rubbed off if the peaches are boiled for a few minutes, but it is usually not objectionable, while the seeds add greatly to the flavor of the fruit.

SOFT GINGERBREAD. One cupful of sugar, 1 cupful of treacle or syrup, 1 cupful of corn milk, 1/2 cupful of butter, 2 eggs, 1 tablespoonful of ginger, 1 tablespoonful of cinnamon, 1 teaspoonful of ground cloves, 1 nutmeg.

Mix all the ingredients, adding wheatmeal gradually till it forms a softish dough. At the very last, add 1 teaspoonful of baking soda dissolved in hot water, and bake in a steady oven till ready.

DELICIOUS SALAD. Mix together 1 cupful of very small peas (freshly cooked or canned); 1 cupful of chopped celery, 1 cupful of chopped pennants.

Make dressing for this as follows: 1 level teaspoonful of mustard, 1 level teaspoonful of flour, 1/2 teaspoonful of salt, 1 teaspoonful of sugar, yolk of 1 egg (beaten), 1/2 cupful of vinegar (dilute if extremely sour), 1/2 cupful of sweet milk.

Mix the dry ingredients, add the egg, then the vinegar, then the milk. Cook in a double-boiler, stirring constantly until rather thick. When cold mix it well through the salad. This recipe served six persons.

STEWED RHUBARB. Two pounds of rhubarb, washed, and cut in cube lengths, 2 cupfuls of sugar, and 2 cupfuls of water.

Bring the water and sugar to the boiling point, add the rhubarb and let that come to a quick boiling, but do not stir. Shake the pot if the rhubarb is not covered. It should be brought to a boiling point quickly and then immediately allowed to cool. The rhubarb becomes tender in the hot juice while cooling. This is delicious if a person likes the rhubarb in whole pieces and with plenty of juice.

CANNING RHUBARB. Pour in preserving jars while still hot the fruit thus prepared and seal immediately. Have the jars clean and hot, ready for the rhubarb.

SUBSTITUTE FOR CITRON. When without citron for a cake or pudding, use dried peaches or apricots. If you do not need oil or sugar, but should be washed, dried, and then cut into thin pieces. If added to cake batter, roll them in flour. They give a delicious fruity taste and make a fine substitute for citron.

The Vegetable Garden in August. Usual: August is an old month in the home vegetable garden to far as planting is concerned, but it need not be. Of course, long season crops can be planted now with any chance of a harvest, but many quick maturing kinds still have time to mature a crop before winter comes. It is very important at this time of year to be careful of the varieties chosen for planting, as many kinds that are successful for early season use will not give good results again.

There is still time to mature a crop of Chinese cabbage if an early variety is planted during the first ten days of the month. This vegetable is really at its best during the cool months of fall, and light frosts only serve to make it milder. As a matter of fact, real good quality can be had in this vegetable during the hot months of summer. Sow the seed in rows about fifteen to eighteen inches apart where the plants are to remain, and thin them to stand about eight inches apart in the row. This vegetable is delicious served like cabbage.

Another salad plant not given the attention its merits deserve, is kale. This plant, sown now, will not give the large heads of earlier seed, but the small tender leaves will be even more delicious than the larger heads, and the plants not used this fall can remain in the garden over winter. In early spring, these plants will quickly produce a fine salad crop. If the plants are to remain outdoors all winter, Dwarf Siberian is probably the best variety to use for late sowing. Plant in rows two feet apart and thin the plants as space demands. When sown thickly in the row, the plants thinned out may be used for boiling greens. This vegetable produces "greens" at a time when such are not generally available, and, in view of this fact should receive more attention than is usually given it.

Early varieties of turnips, such as extra-early Milan and Early Red will still give a good crop of roots for storage over winter. Save them in spaces made vacant by the removal of early crops. During the first half of the month make two or three plantings of spinach for fall use. Victoria and King of Denmark are good varieties for this purpose. A liberal top-dressing of nitrate of soda, or other nitrogenous fertilizer, will hurry maturity and produce extra large growth.

If radish seed is planted during the

## THE WOMAN Auto Touring and

It is not only the man who is interested in auto touring, but the woman is also. The woman who is interested in auto touring is interested in the woman who is interested in auto touring.

## August 27 September 6 CANADIAN NATIONAL EXHIBITION TORONTO

The program of Canadian National Exhibition, Toronto, from August 27 to September 6, includes a wide variety of exhibits and entertainment.

The Women's Chamber of Commerce is holding a series of lectures and demonstrations during the exhibition.

The Women's Club is also holding a series of lectures and demonstrations during the exhibition.

The Women's Association is also holding a series of lectures and demonstrations during the exhibition.

The Women's League is also holding a series of lectures and demonstrations during the exhibition.

The Women's Guild is also holding a series of lectures and demonstrations during the exhibition.

The Women's Society is also holding a series of lectures and demonstrations during the exhibition.

The Women's Club is also holding a series of lectures and demonstrations during the exhibition.

The Women's Association is also holding a series of lectures and demonstrations during the exhibition.

The Women's League is also holding a series of lectures and demonstrations during the exhibition.
