Address and Presentation

On Friday evening last the editor of this paper and his family were made the recipients of the following address and a substantial cheque from this congregation of the United Church. We deeply appreciate the expressions of good-fellowship and encouragement contained in the address and the thoughtfulness which prompted the presentation. Our work in connection with the church has always been a pleasure and we hope to be able to continue to serve. Following is the address:

Chatsworth, Nov. 11, 1927.
Dear Mr. and Mrs. Collins and Family:
The Church, which owes so much to you, seeks at this time to express to you its deepest sympathy and its most grateful appreciation of you. Your service, rendered through long years, has been marked by a zeal and efficiency noteworthy in the annals of any Church; and we are very conscious that we are under a lasting debt to you. We pray that in this hour of your trouble, the same spirit which has marked your attitude to all the tests of life will give you strength to face in like manner this test. Our sympathy, our appreciation, our help, is yours—to make use of as you will. Will you accept this cheque as an appreciation—very inadequate, of all that you mean to us? We so very sincerely trust you will be able long to continue with us as an example to our younger generation of what loyal service is.

Sincerely,
John Fraser.

Canadian Buyers Profit by Canada's Export Trade

IN the distant reaches of Britain's far-flung empire you will find General Motors cars, built in Canada by Canadian craftsmen, from Canadian materials.
In five years over 110,000 automobiles have been sent overseas by General Motors of Canada to carry the standard of Canadian quality around the world.
This represents a truly important contribution to Canada's export trade.
It represents millions of dollars to be spent in wages to Canadian workmen, in the purchase of Canadian metals, wood, hides and the countless other materials entering into the manufacture of General Motors cars.
And it represents a greatly augmented production of General Motors of Canada, resulting in lower costs of manufacture, in economies of purchasing, in greater savings of time and labor through greater volume.
Thus, because in India, in Egypt, in Malta, Ceylon or South Africa, someone is buying a General Motors car from Canada, General Motors can offer to you, in Canada, a product of higher quality at a lower price than otherwise possible.
